HOW TO LOAD APPLE PAY

- **This section exposes the steps to load Apple Pay fast and successfully. Note: Carding Apple Pay is quite different from Carding Apple store. Below are the steps regarding the Apple Pay carding method:**

Verify the Accounts

- **You have to verify an account on the Apple device you use. Without verification, the amount of money you can load will be limited.**
- **Do not worry about getting blocked because Apple does not know that your trying to load.**
- **Add CC or Debit Fullz**

- After creating a verified Apple account, add a card on Apple Pay using a CC or Debit Fullz info.
- The most important part is using the correct CC BIN and getting a {Non VBV} CC. The BIN 475585 is known to work well for apple pay. You can purchase a CC with that BIN from me on telegram as it's very hard to find on any sites. He is vouched and verified for cards, and also gives walkthroughs.
- Non VBV CC example : 4154178722541265:12:25:406:Jason Wolterman::3101 North SideAve.:Henrico: VA::23228

CASHING OUT

- NOW ONCE IT LINKS, ITS BEST TIME TO WIPE THE CARD (CASHOUT) THERE ARE MANY METHODS OF CASHING OUT;

- P2P SEND TO ANOTHER APPLE PAY -TAP AND PAY AT STORES OR -ATM
- USE TO BUY THINGS ONLINE etc.

NOTE: IF YOUR SENDING TO A DIFFERENT APPLE PAY ACCOUNT DO NOT SEND IN WHOLE.

IF YOU HAVE A \$1000 CC LIMIT SEND IN \$200 INCREMENTS AND TRY NOT
