

## Credit Karma Debit Card Cashout

**CHANNEL:** <https://t.me/ravenet2>

More updates from [t.me/Ravenet\\_bot](https://t.me/Ravenet_bot)

In this guide we are going to take over a credit karma spend wallet debit card. Then we clear money from the card.

To do this you need:

High balance CC from the bin provided below

Socks v5

SSN and DOB of CC you will use

Start by purchasing the bin indicated and make fullz out of the bin

Get a background checker like truthfinder to do that, so you will be able to verify the address, then purchase the ssn of the CC fullz you have.

Make a new email for this fullz and check background report for the emails the fullz uses.

Now open your socks v5 to the same city as that of the CC fullz you have. Goto, creditkarma and click on login.

Now try to login with any of the emails belonging to the fullz you see on public report. Enter email and any wrong password, if the email does not exist you will get a message saying so.

If the email exists, you will see something like this

## Welcome back

Log in with: **steve@creditkarma.com**

[Use a different account](#)

Password

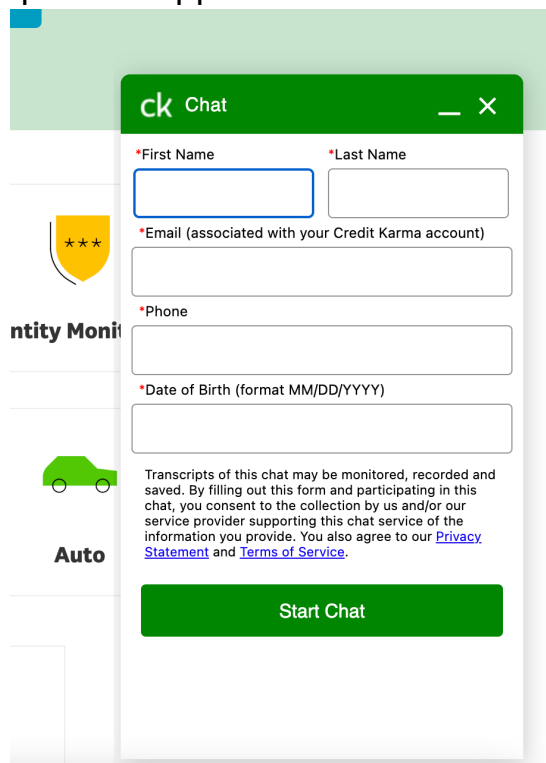

Show

 The password you entered is incorrect

Continue

Now keep this email and visit the credit karma help center

Open chat at the lower right corner of the screen and enter the basic info to speak to support

A screenshot of a mobile app interface showing a chat support form. The form is titled "ck Chat" with a close button. It contains several input fields: "First Name", "Last Name", "Email (associated with your Credit Karma account)", "Phone", and "Date of Birth (format MM/DD/YYYY)". Below these fields is a green "Start Chat" button. A disclaimer text is visible: "Transcripts of this chat may be monitored, recorded and saved. By filling out this form and participating in this chat, you consent to the collection by us and/or our service provider supporting this chat service of the information you provide. You also agree to our Privacy Statement and Terms of Service." The background shows parts of the app's home screen with icons for "Entity Monitor" and "Auto".

Enter the email that was able to login the credit karma

If you use anyother email it will not work

Now, message the agent and make it seem you want to know the status of your account and finally ask for balance.

If you have balance on the card you are good to go, if not you have to start again.

Now you have balance, goto login and choose reset your password, since you already have the username.

Can't log in to your account? [Try another way](#).

Next, enter email and request code to send to number on file, and here is where we will need the OTP bot. Tried and tested OTP bot : <https://t.me/chocobotplug> from the group find the bot.

Once you get the otp you can change the password and login directly to the Credit Karma spend account.

On there, you can easily wipe out all the funds by swiping the card info

Now you can change mail associated to account. For number you need to send the otp again to have that and change the phone number as well.

Congrats you have now taken over the credit karma spend account and can cashout anywhere.
