

MINTING PUFFER ABUSE 2024

billythekid988@proton.me

REQUIREMENTS

- Incognition/Dolphin Browser (you can do that on either)
- VPN (any VPN would work, I tested Mullad&Proton) or socks5
- DEFI crypto wallet

4/4 MINTING ABUSE 2024

LAST PART OF COURSE

STEP BY STEP

Go to bit.ly/pufferfipromo. Click the GET GAS! Button. Wait for promo redirection.

We proceed with minting process as usual. Connect the wallet, sign out the form, Pass the captcha. You'll be redirected to the plans page. Select the defi test package (0,001 ETH ~ 3 USDT eq). Sign.

Choose a promo reward: TRX, ETH or Puffer NFT. Choose TRX (~ 42 USDT reward promo - ETH gets you less - nft reward is trash). Wait for processing circle.

PAY ATTENTION! DO NOT CLOSE THE TAB!

After receiving ~500 (~42 USDT) TRX in your Defi wallet, you'll see a "Welcome to the Puffer Fi" message. Right click on a page, Inspect. Find element ``, change true to false. DO NOT CLOSE THE WINDOW IN THE BROWSER. Shut down Incognition/DolphinAnty, not the window! Do not clean cookies. Launch VPN - (anything but China or Russia location) or socks. Do not use the same IP ADDRESS TWICE!

Launch the Profile you added in the beginning. You'll be unable to load the page. Press F5.

As your wallet's already connected, and your account registered, you'll be able to select a plan again. Choose the Defi Test Package. Choose the TRX promo reward. Get another 500 TRX. Change location. Change the element stated above. Rinse and repeat.

Remember: changing the element AND VPN server is vital. Do not use the same IP every time, and if you did, repeat the process from another profile froms step 1.

500TRX+puffeth = 45-46 usdt profit off a spin. Sell nfts or keep them noone cares. Spin takes 6min avg once account is set; running multiple profiles changing vpns/proxy - $15 \times 50 =$ if you're good at this you can earn up to 5000 USDT equivalent a day.

Thank me by sending a part of profit to my Monero wallet (ADDRESS IS ON THE LINK)

For more abuse in minting&carding message me billythekid98@proton.me
UPD: The old telegram account is dead because of you guys asking me for more. I'm working on it - and while donations are appreciated I have private life as well.

Be respectful and use mail.

Enjoy free crypto!

As many of you write letters enquiring about Telegram method updates, our team has prepared a very special carding method for a very famous platform which will include KYC workaround, bins working, on carding a very famous CEX that is out there. As the post stated, there's serious issues about the stuff ROTD mentioned, and would not be revealed in the guides and is still in the works in the Deep Web /xer category (members+ know). Prepare your Monero and stay tuned! For new members: mail billythekid988@gmail.com
