[+]Types Of Premium Accounts Crackers Have:

- 1) Private
- 2) Cracked

[+]Private Are Of Two Types:

- 1) Trial Made
- 1) Carded

Trial Made==> Crackers Use Fake Credit Card Details To Get Trial Of Some Sites,Like Amazon Gives 30Days Trial If We Provide Our Credit Card Details.

Carded==>We Use Real Credit Cards To Pay And Buy Any Subscription With Other Peoples Money.

2) Cracked==> We Use Some Methods To Get Email And Password Of Peoples Who Bought Any Subscription.

We Can Use Cracked Account Only Till The Owner Dosen't Changes His Password.

But Trial Accounts Can Run As Long As The Trial Period Gets Over Or Sites Detect And Ban Our Account.

This Was The Difference Between Cracked And Private Accounts

And The Most Important Thing Is That A Person Who Makes A Trial Account Is Not Called A Cracker And That Process Is Not Called Cracking.

Cracking is The Process In Which We Get Cracked Accounts As Mentioned Above.

So We Will Learn Both Private As Well As Cracked Accounts Making Method.

Firstly We Will Learn Cracking:

Requirements:

- 1)Rdp / Computer / Laptop
- 2)Internet
- 3)Combolist
- 4)Proxies (Optional)
- 5) Checker
- 6) Config

Rdp==>Remote Desktop Protocol (RDP) is a proprietary protocol developed by Microsoft which provides a user with a graphical interface to connect to another computer over a network connection.

Source: Google

Basically We Get A Computer System With High Internet Speed And Much RAM And

# We Can Control That Computer From Our Phone / Laptop.

## Why Do We Need Rdp:

- 1) Cracking Tools May Contain Virus So It's Risky To Run In Personal Computer.
- 2) If We Turn Off Our Computer Everything Will Get Closed, But Rdp Never Gets Off What All We Do Is Just Disconnect Our Phone/Laptop And The Process Goes On And The Computer Cpu Is Always On.
- 3) High Internet Speed

You Will Have To Find Some Working Trick In Order To Get Rdp Or You May Ask Your Friends To Share It With You If They Have.

## Disadvantages Of Rdp:

- 1) It Has A Validity ,It Doesn't Run For Lifetime.
- 2) If Your Internet Is Very Slow Then You May Face Issues In Using Rdp As It Will Be Unable To Load The Computer Screen On Your Phone.
- 3) It Doesn't Have To Do Anything With Your Phone Or Computer, It's Totally A Different Computer With It's Own Hard Drive And Everything.
- 4) Files Downloaded In Rdp Is Not Stored In Your Computer/Phone And You Will Have To Download Them In Your Device

From Rdp.

5)Only One Person Can Connect To Rdp At Same Time,As We Can Normally Think That More Than 2 People Can't Use A System At The Same Time.

Rdp Has :  
Hostname/IP Address  
Username  
Password

To Connect Rdp In Your Computer/Laptop:

<https://www.snel.com/support/learn-how-to-connect-to-your-server-via-rdp-on-windows-10/>

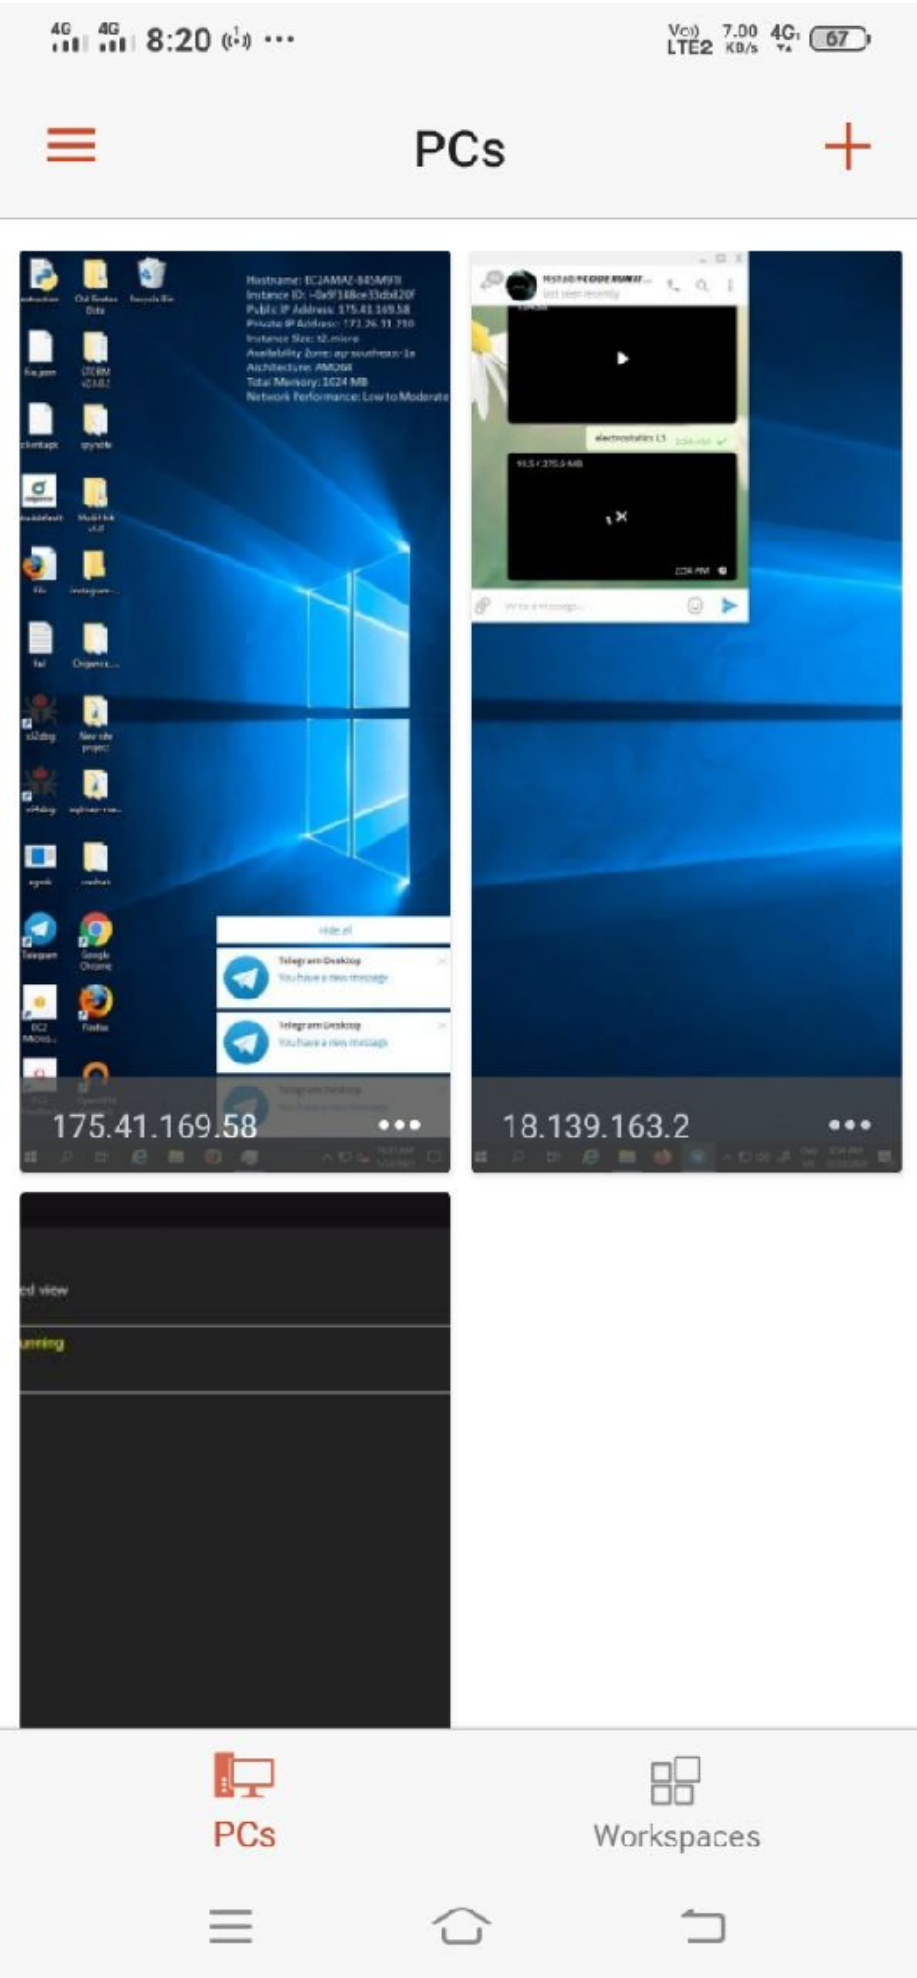

To Connect Rdp In Your Phone:

Download:  
<https://play.google.com/store/apps/details?id=com.microsoft.rdc.androidx>

And Follow:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-desktop-services/clients/remote-desktop-android>

# Screenshot Of Rdp Accounts Saved,Screenshot While Connecting To Rdp

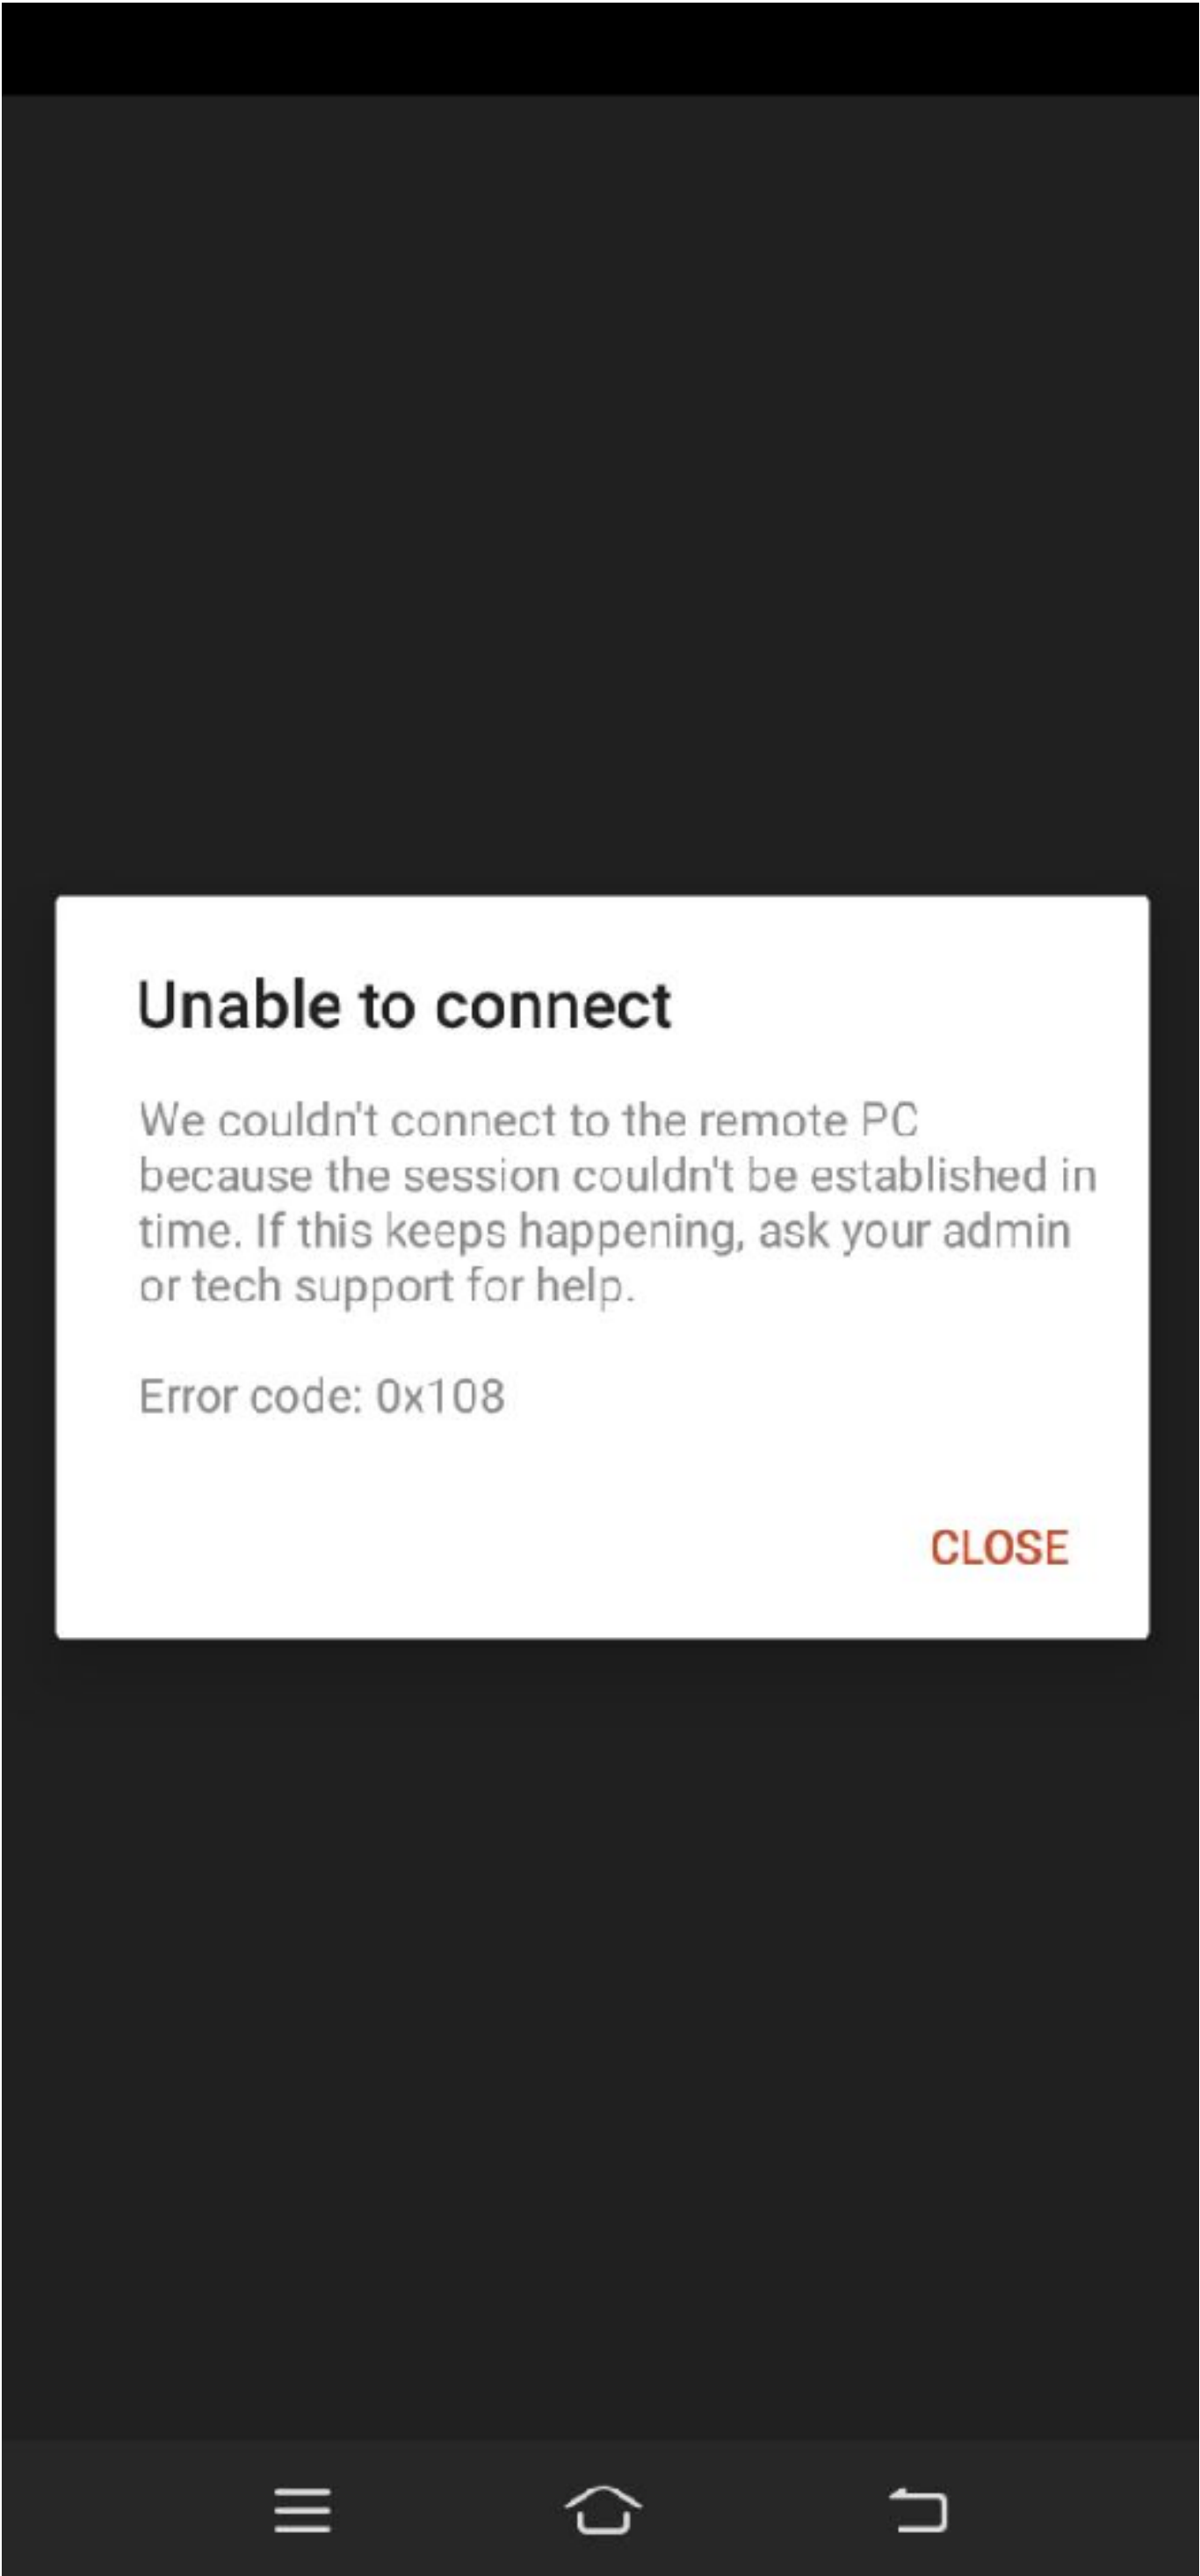

Connecting to  
3.139.100.112

Configuring remote session...

# This Error Comes When Internet Speed Is Slow

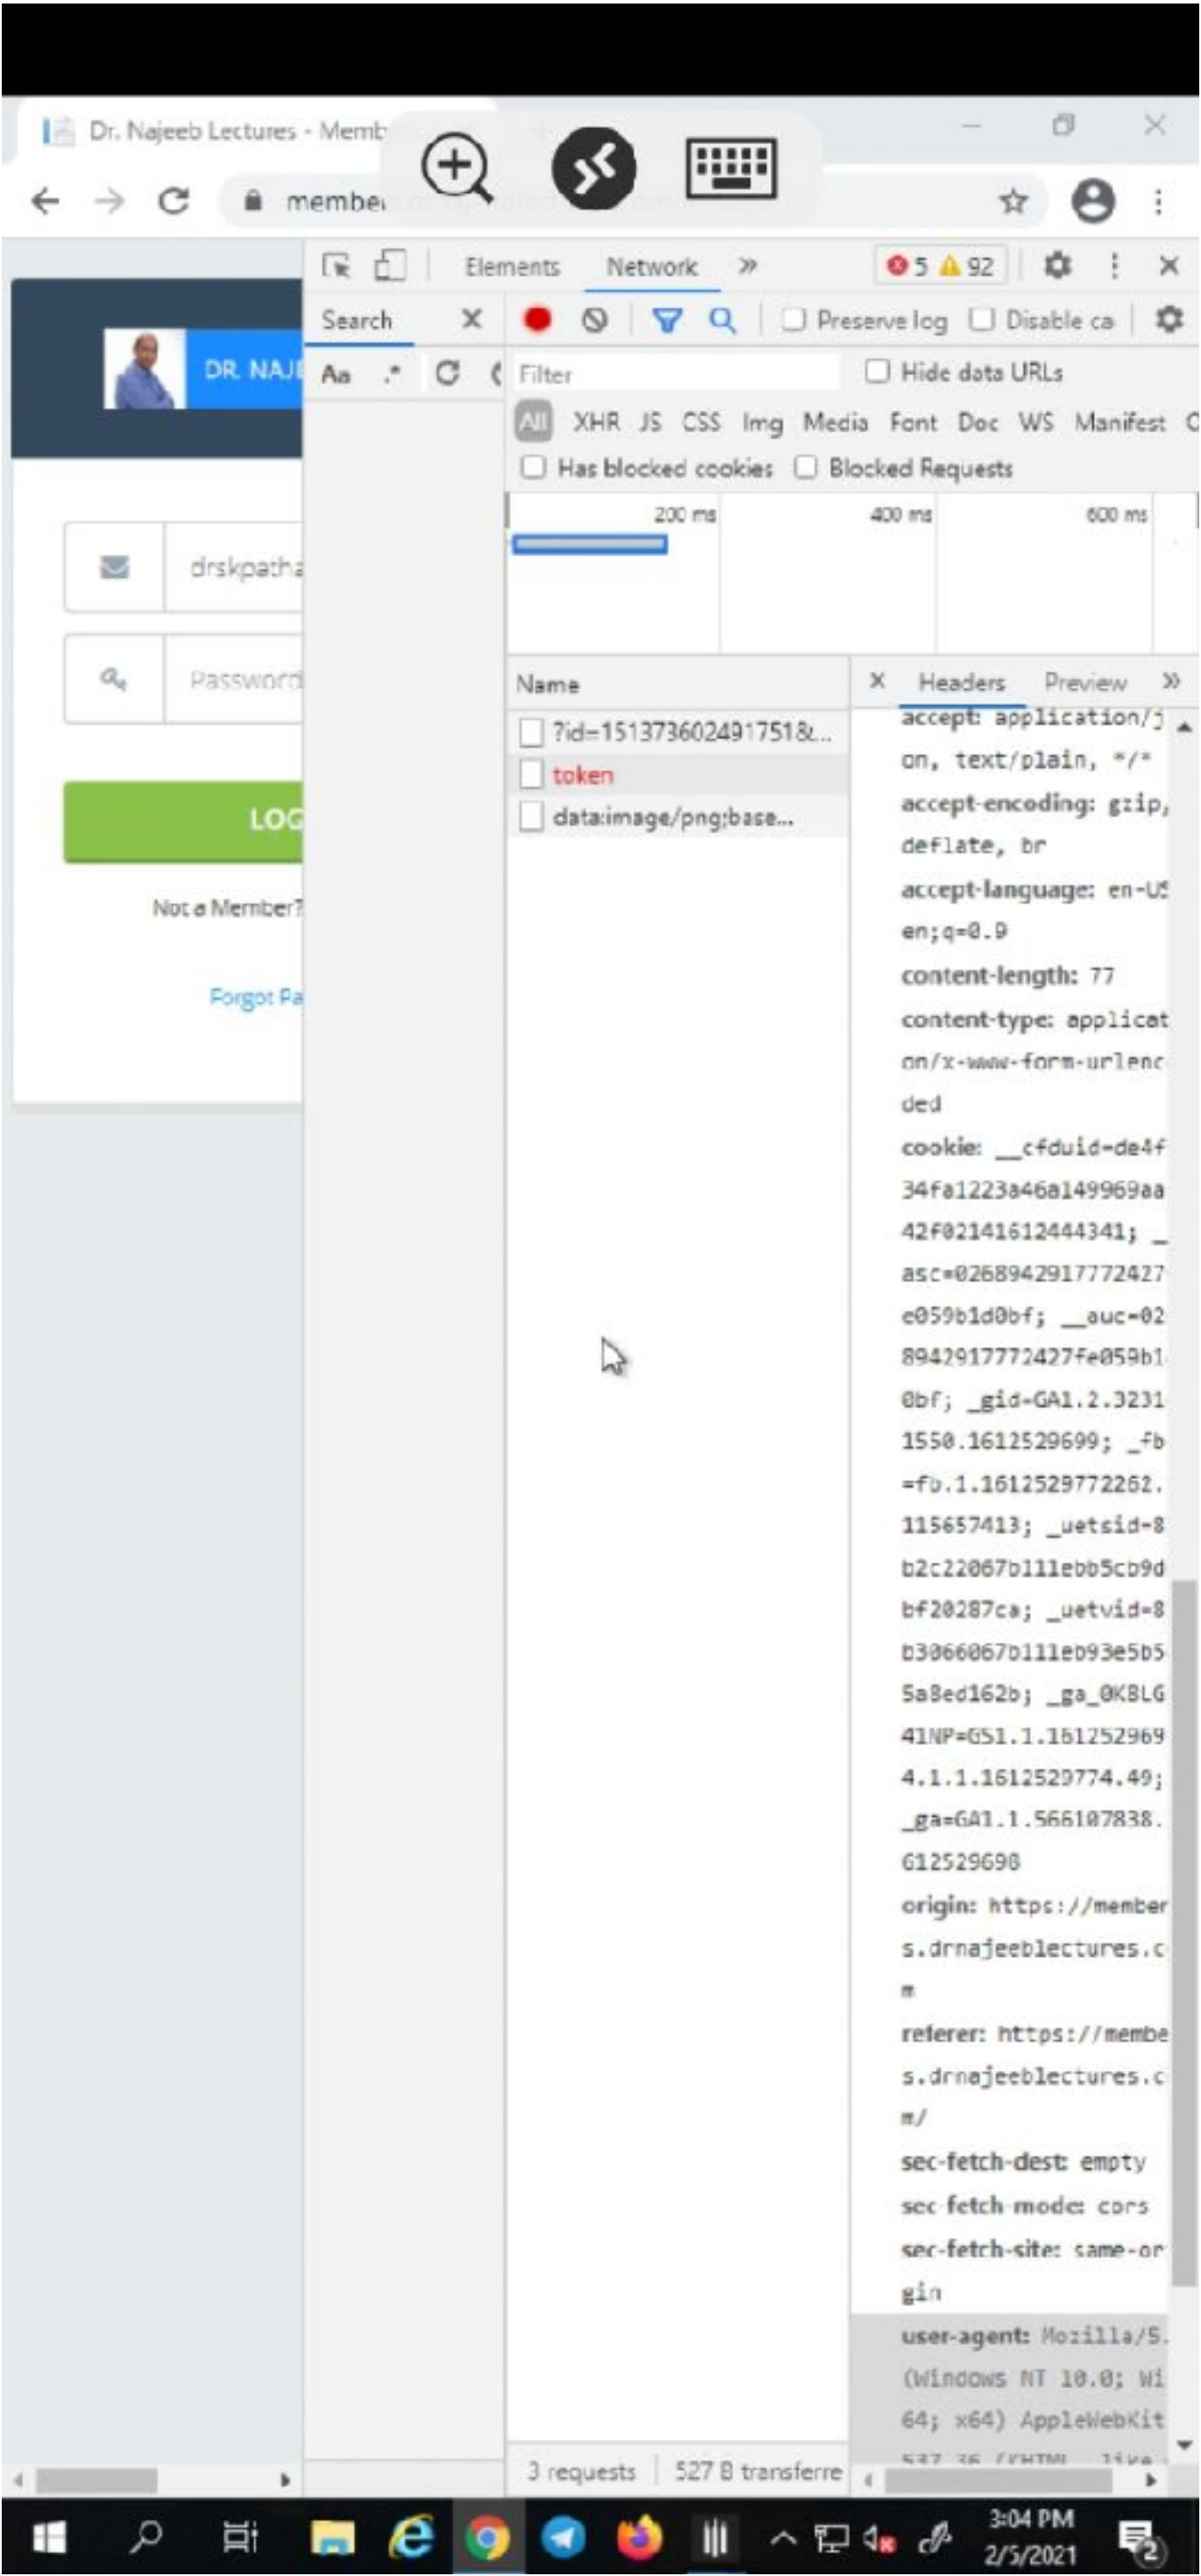

And When Someone Else Connects To The Same Rdp Which You Were Using, Another Error Comes "Your Session Was Disconnected"

It will get disconnected from your System, and will be connected in his system.

And if you do the same he will face the same issue.

And If Rdp Details Are Wrong Then It Will Show An Error Like "Could Not Find The Computer"

Screenshot After Connecting Rdp,As You Can See Chrome Is Already Opened Because I Left It Open Last Time.

So This Was All About Rdp

Now We Will See How Cracking Actually Works

Imagine You Created An Account On A Local Site aaa.com

And Afterwards You Created One Account On A Site Like zee5.com

And You Used The Same Email And Password On Both Sites,  
Now We Know Zee5 is A Very Famous And Highly Secured Website So We Can't Hack It Easily.

But We Can Hack Database Of aaaa.com And Dump All The Emails And Password Of Different Different Users Who Have Created Accounts There.

We Can't Hack Databases Of All Local Sites, We Can Hack Databases Of Sites Only Which Are Vulnerable To A Famous Bug SQL injection.

So The Hacker Dumps All The Emails And Password Of The Users And Storage Them In A Text File In The Following

Syntax:

Email: password

Like:

aaaa@gmail.com:test123

In This Syntax, We Get A Huge List And We Call It Combolist.

This Step Is Very Very Hard Nowadays, But Don't Worry The Amazing Fact Here Is That We Won't Do This Much , We Will Directly Skip All This Step And Use Combolist Provided On Different Different Telegram Channels.

Now The Question Arrises What Is The Use Of That Combo,

So After Getting The Combos We Load That Combos In A Checker (Like Open Bullet)

And Then We Load Config Of The Site We Want to Crack Accounts Of,

Like Zee5 Config.

So We Will Now Start The Checker And What The Checker Will Do Is It Will Start

Taking All The Email And Password One By One And The Config Will Tell The Checker In Which Website It Has To Try To Login With That Email And Password And It Will Also Make The Checker Understand How To Identify That The Credentials Are Correct Or Not And The Account Has Any Premium Subscription Or Not.

In This Way Our Checker Will Check All The Emails And Passwords And Will Filter Out All The Accounts Which Are Premium .

There Are Some Typing Errors In Text 🙄  
🙄 Kindly Ignore Them 🙄 🙄 😂 😂 😂 😂 😂

So This Was The Working Of Cracking,

Now You Know What A Combolist, Config And Checker Is.

Now Let's Talk About Proxies Little Bit.

Types Of Proxies:

Http  
Socks4  
Socks5

Proxies Are Also Of Two Categories Public (Free) And Private (Paid)

Use Of Proxies In Cracking:

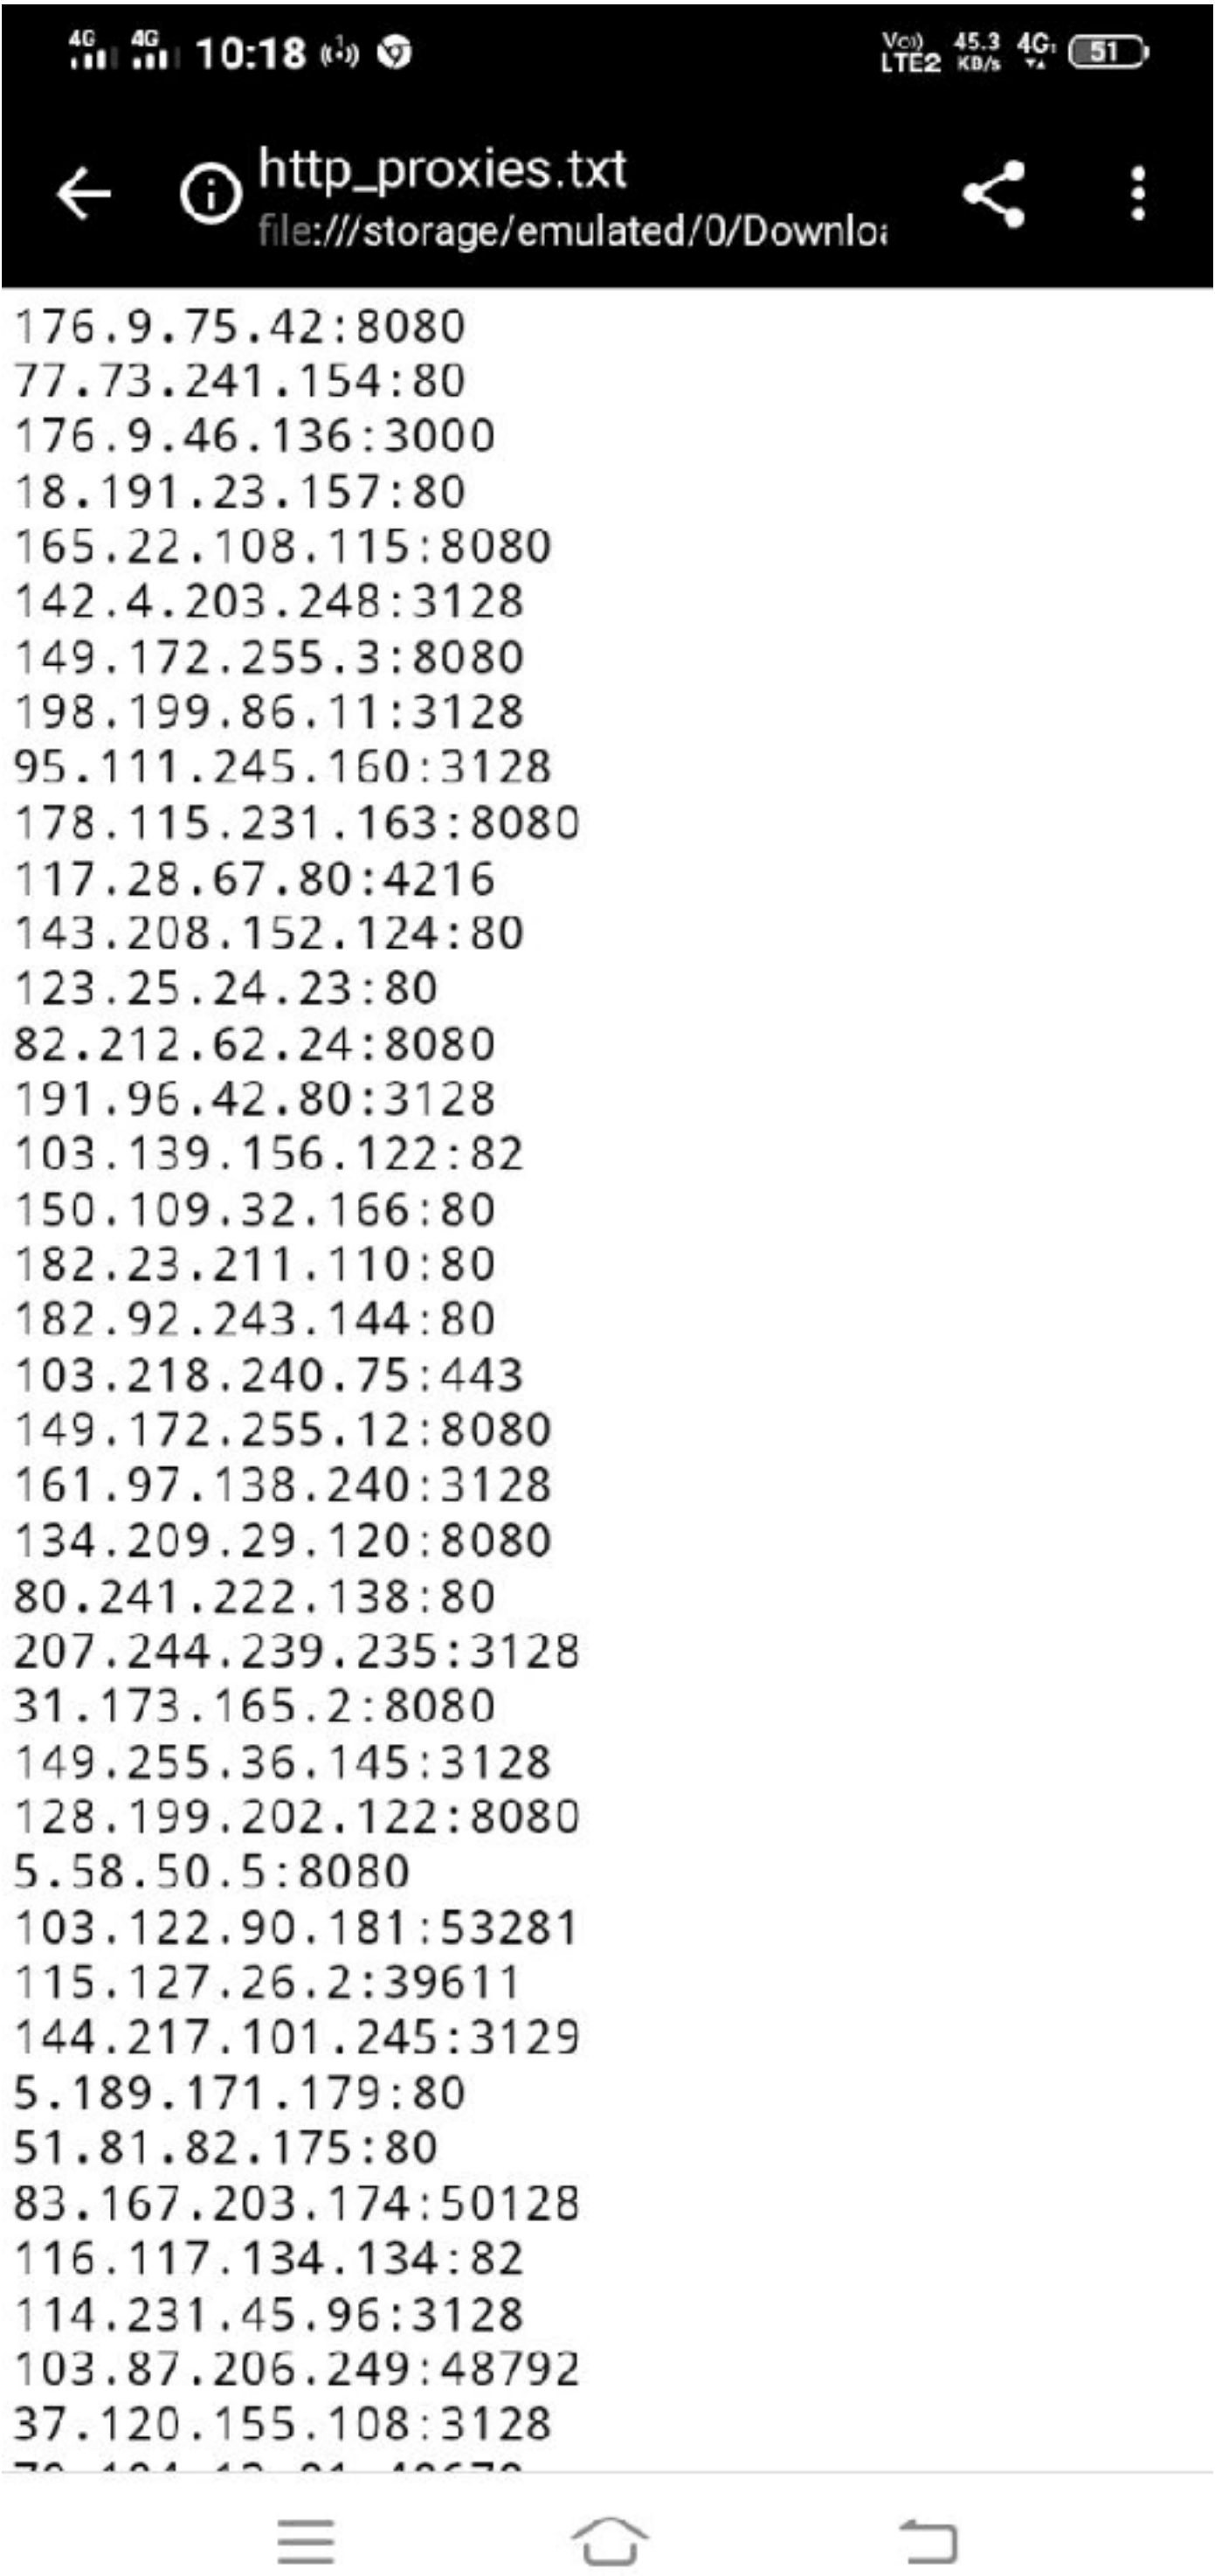

When Our Checker Will Check All The Emails And Passwords With The Same IP Address ,The Website Will Block That IP ,Only Some Websites Like Zee5, Altbalaji Will Not Block You.

So We Load Our Proxies In Checker So That It Will Login Each Account With A Different IP And Will Prevent It From Getting Blocked By The Server

You Can Get Free Proxies From Here:  
<https://proxyscrape.com/free-proxy-list>

Or Directly Use My Tool To Get Proxies.

# Screenshot Of HTTP Proxies

Note: We Need To Get Fresh Proxies Everytime We Crack New Accounts As They Become Dead Very Soon.

Also Free Proxies Have Low Speed And Are Blocked In Some Sites Like Netflix , So We Can't Crack Sites Like Netflix With Free Proxies.

Now How To Get Paid Proxies?

For That ,You Will Have To Learn The Biggest Fraud Known As Carding Which I Don't Do Because I Do Only Those Things In Which No One Has Any Loss,And In Carding We Use Money From Random Person's Credit Card.

And You Don't Need To Learn Much About Proxies Type As That Information Is Just For Loading The Proxies In Checker,I Mean When We will Load Socks5 Proxies We Will Have To Select That It Is Socks5 .

Also Combos Didn't Last Forever,We Have To Use Fresh Combos For More Accounts

I Have Already Shared One Tools And Website To Get Proxies ,Now I Will Share Telegram Channels Link From Where You Can Get Fresh Combos Day By Day

@DaredevilCombos  
@sed\_lyf\_combos  
@combo23  
@WITCHER\_COMBOS  
@D3v1LZone  
@shaivitescombos

Combos Are Also Of Many Types Like  
Email:Pass Combo Or User:Pass Combo,

I Mean If A Site Takes Username For Login  
Instead Of Email Then We Will Use User:  
Password Type Combo

And Also Combos Are Country Targetted /  
World Mix

I Mean If You Want To Crack Accounts Of  
An Indian Site Like Paytm,  
Then We Already Know Only Indian  
Peoples Use That So If We Use  
Email:Password Of Any Other Country  
Then We Will Simple Waste Out Time

So In This Case We Will Use Indian  
Combos

Which Will Contain Email And Password  
Of Indian Peoples Only

Now Let's Talk About Config

As I Already Told What Config Does ,So I Will Directly Jump To The Validity Of Config And From Where Will We Get That,

So Configs Will Work Till The Site Changes There Methodology Of Logging In,And You Will Take Configs From Some Telegram Channels So They Will Notify You When Any Config Will Stop Working.

Config Channels:

@YashvirGamingConfigs

@OBGuptaajiii

@ConfigsByBroS

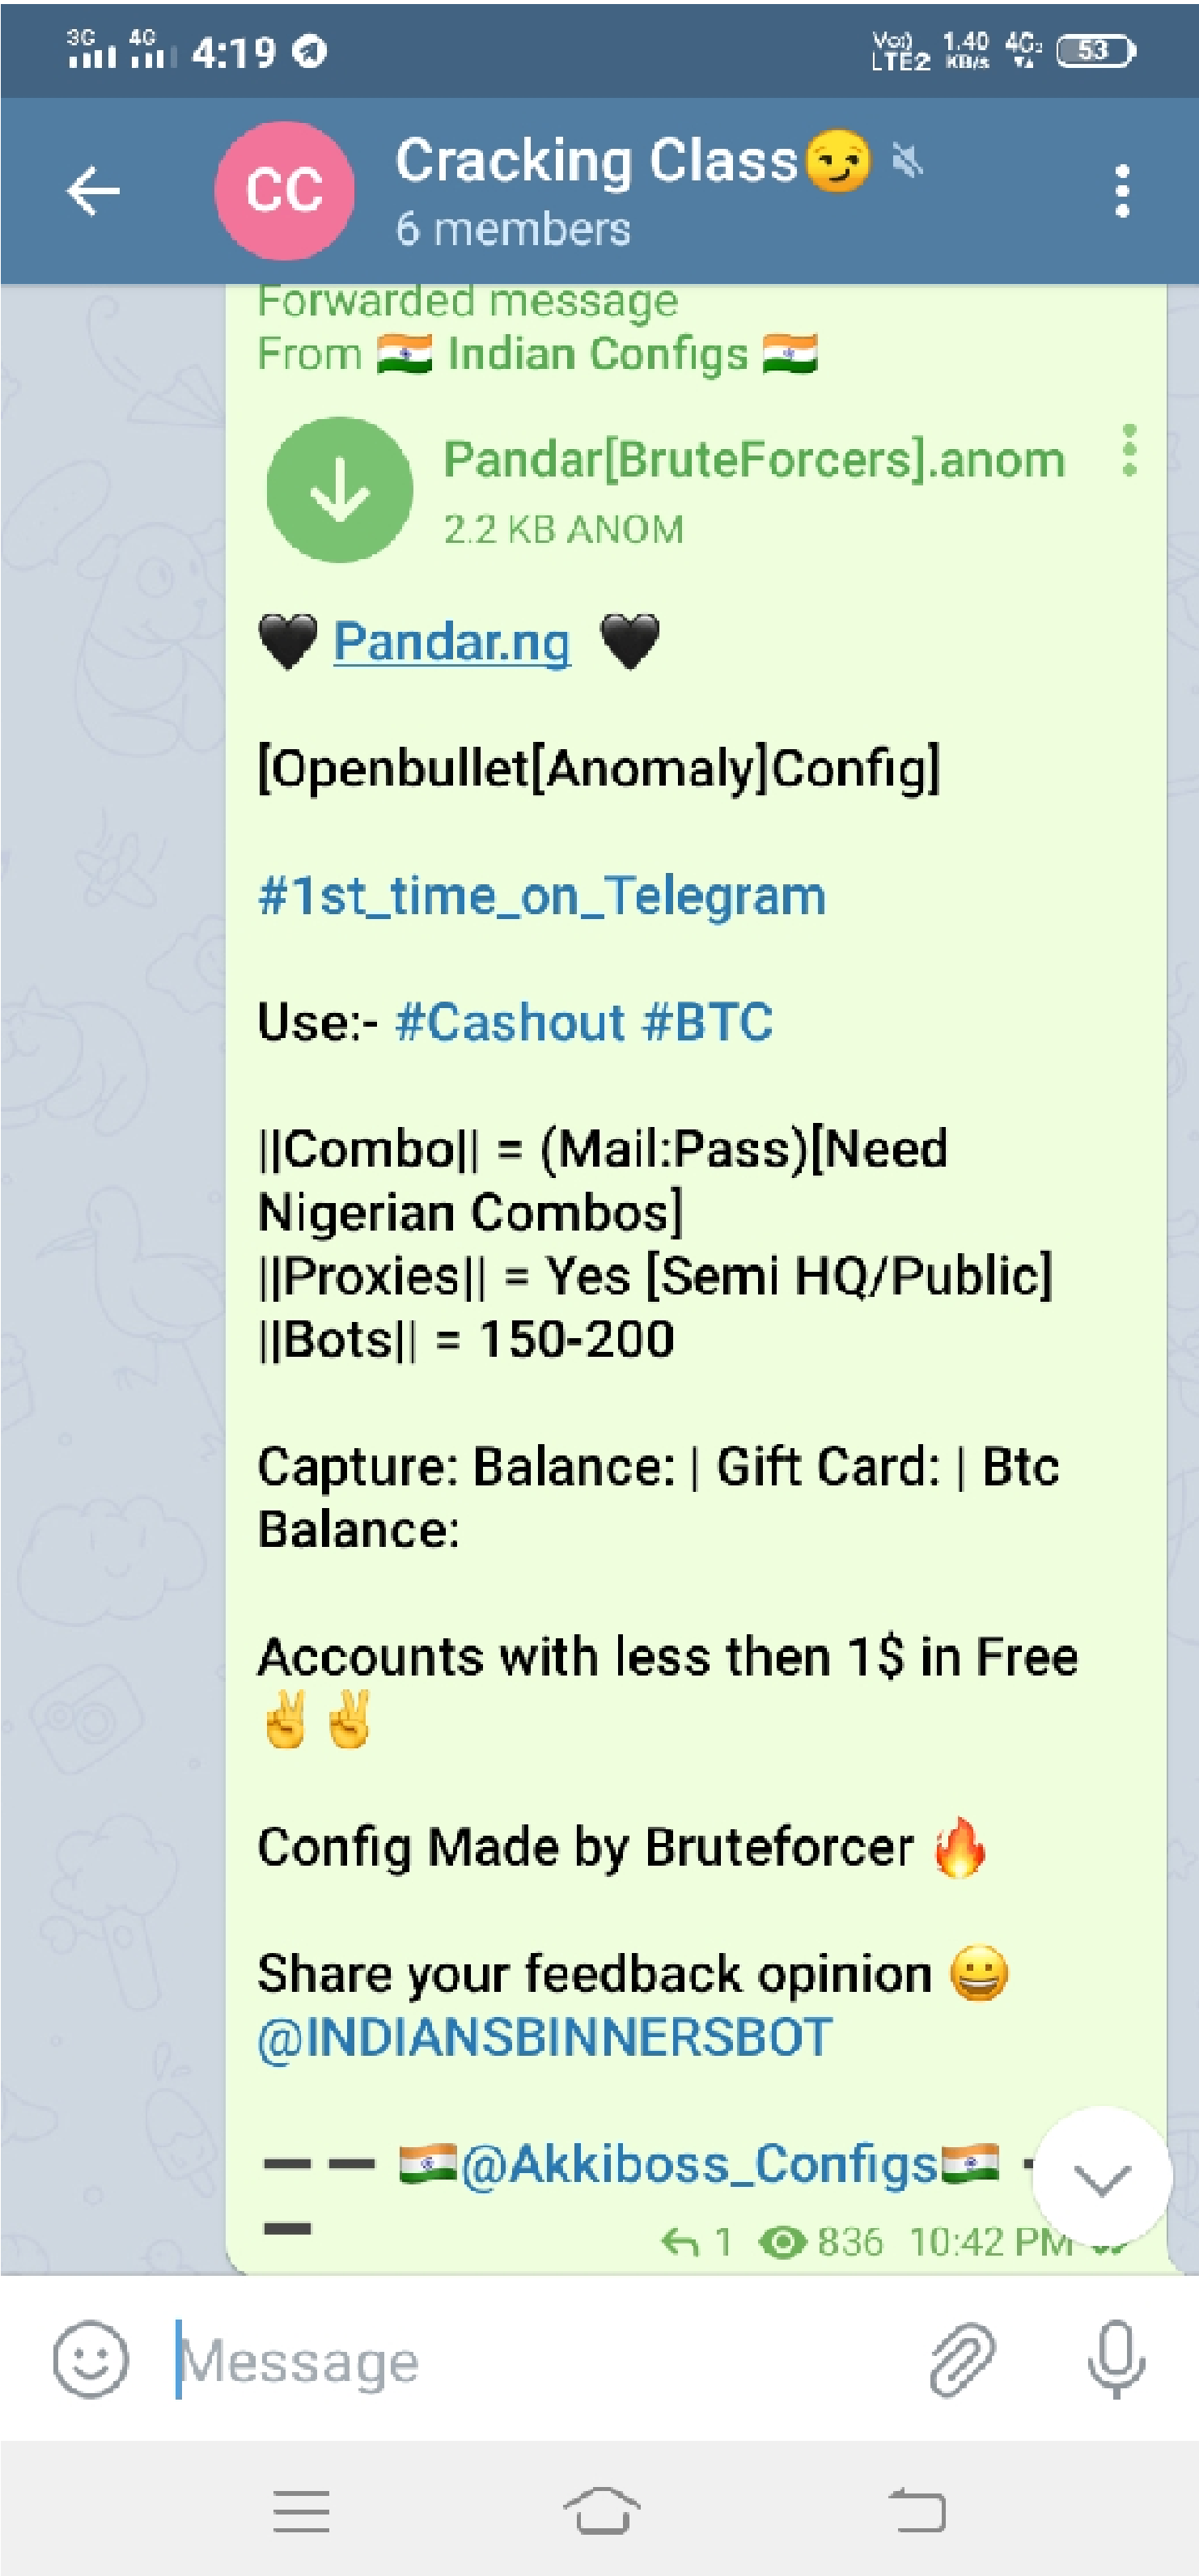

@CONFIGS\_B\_EVIL\_BANE

@P1R47E\_Config

Note: You Will Not Get Config Of Every Site For Free (Like Netflix)

Because It Takes Hard Work And Much Time To Create Complex Configs Of Highly Secured Websites.

This is sample of one posted config

Lets Talk About Common Info Written Along With The Configs Where They Posted,

Proxies: It Tells Whether You Need To Load Proxies In Checker For This Config Or It Will Work Proxyless

Cpm: ( Capture Per Minute)

It Tells The Average Rate Of How Many Email:Password Will Be Checked In 1 Minute

Bots/Threads: It Is The Speed We Will Set While Using The Checker

Capture: It Is The Extra Data That Config Will Capture,Like If We Crack Zee5 Account Then It Will Capture The Expiry Date And Package Type.

So Now We Have Completed All The Basics Of Cracking

Starting The Practical Now🙄,  
Firstly Connect You Rdp ..

Send This File To Rdp Via Telegram Or Gdrive

Now Extract This Zip File With Any Zip Extractor Like Winrar.

# Firstly disable windows defender!

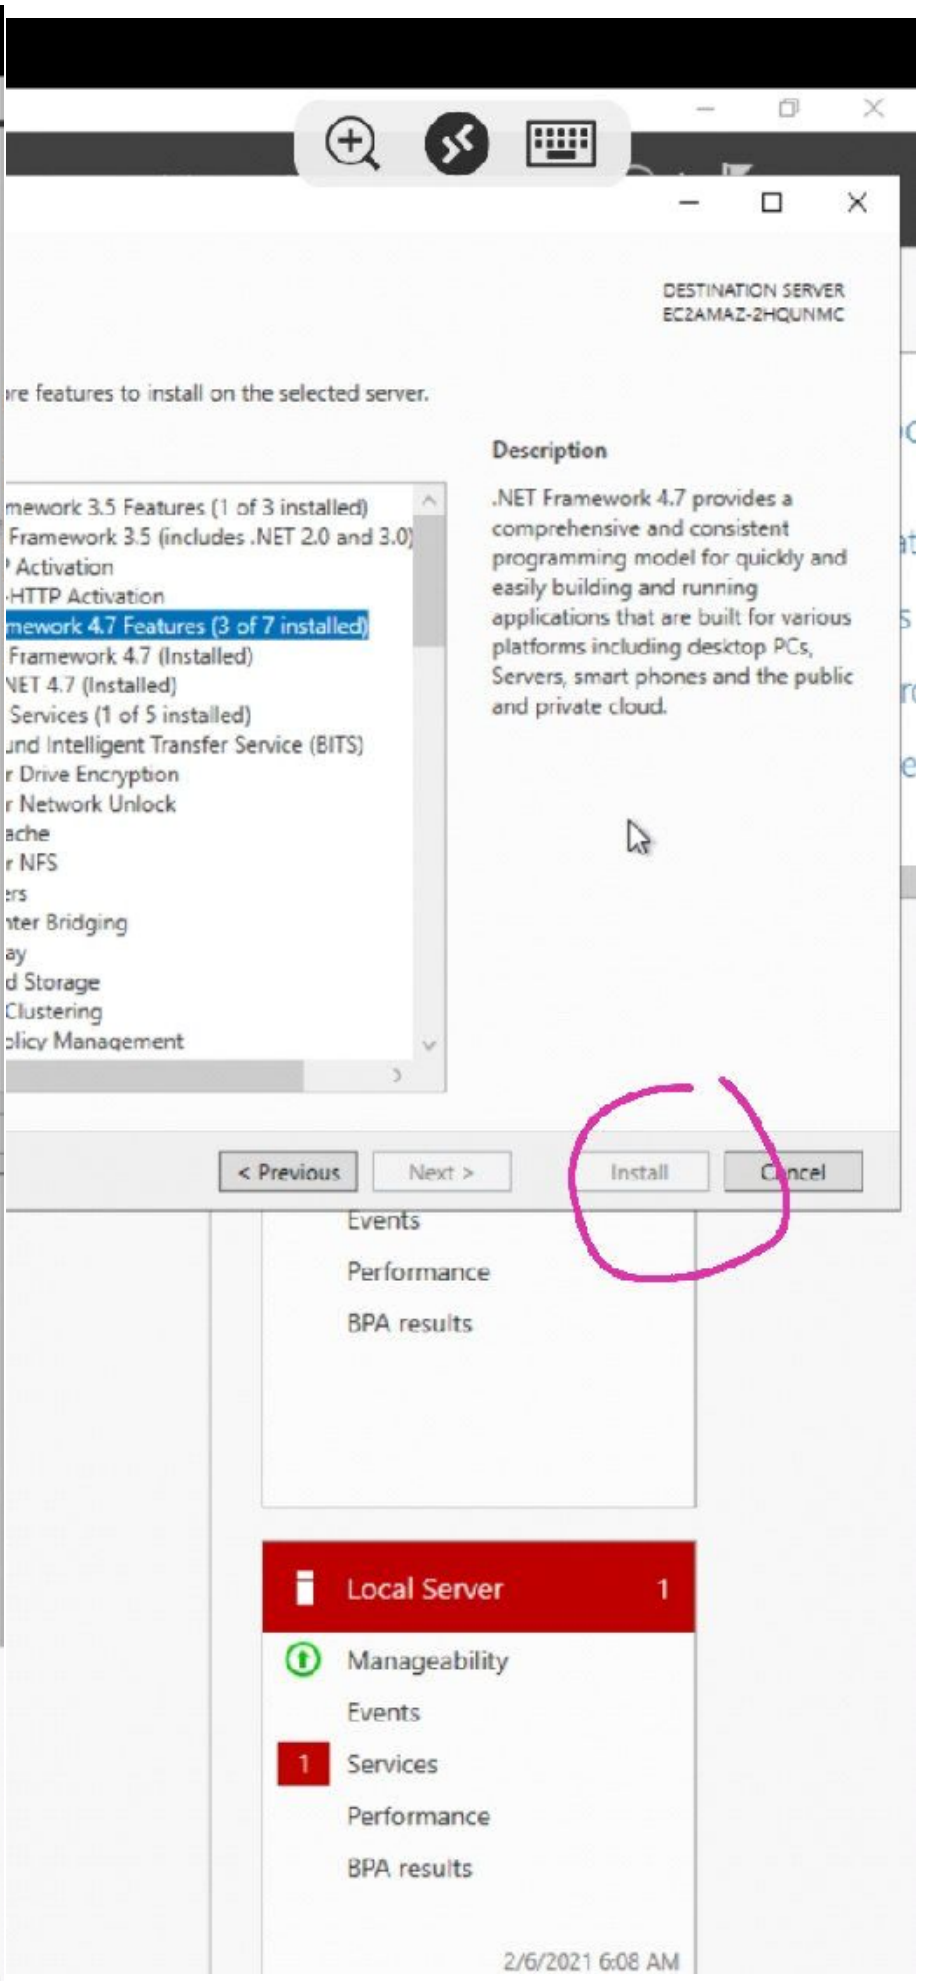

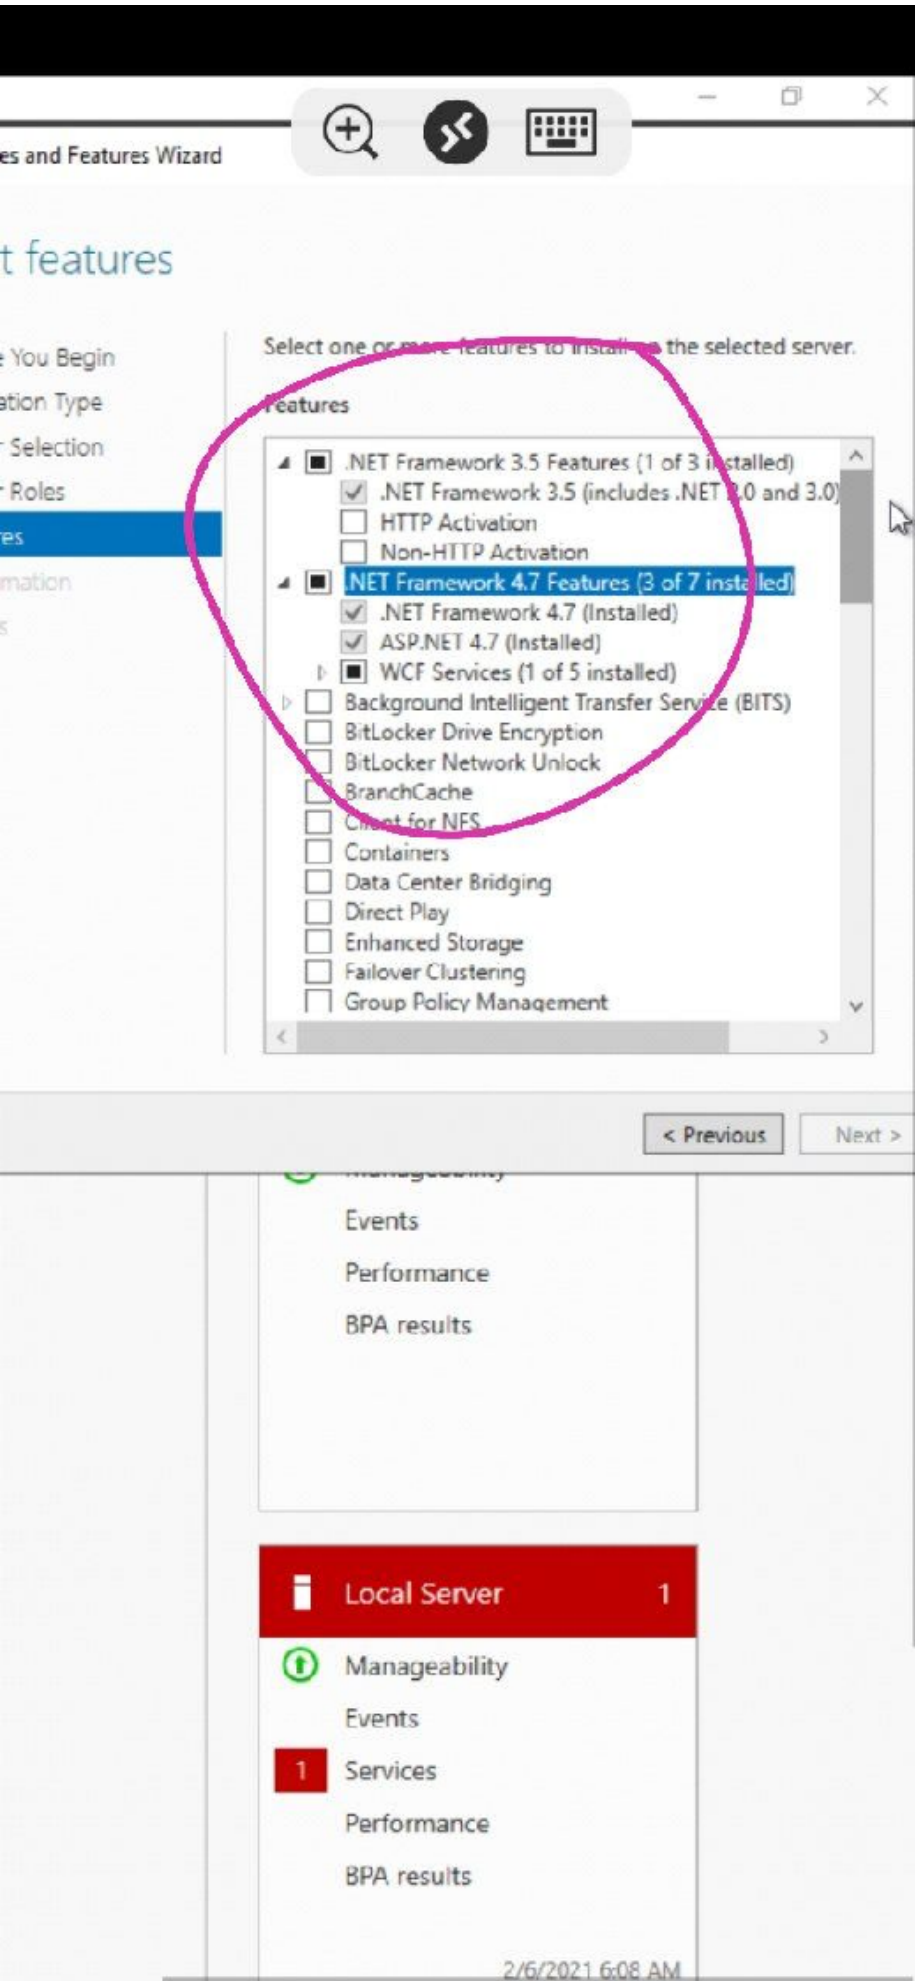

# Now You Will Have To Install Net Framework For Running Open Bullet.

# Select Install,it's Already Installed In My Rdp So I Can't Install Again

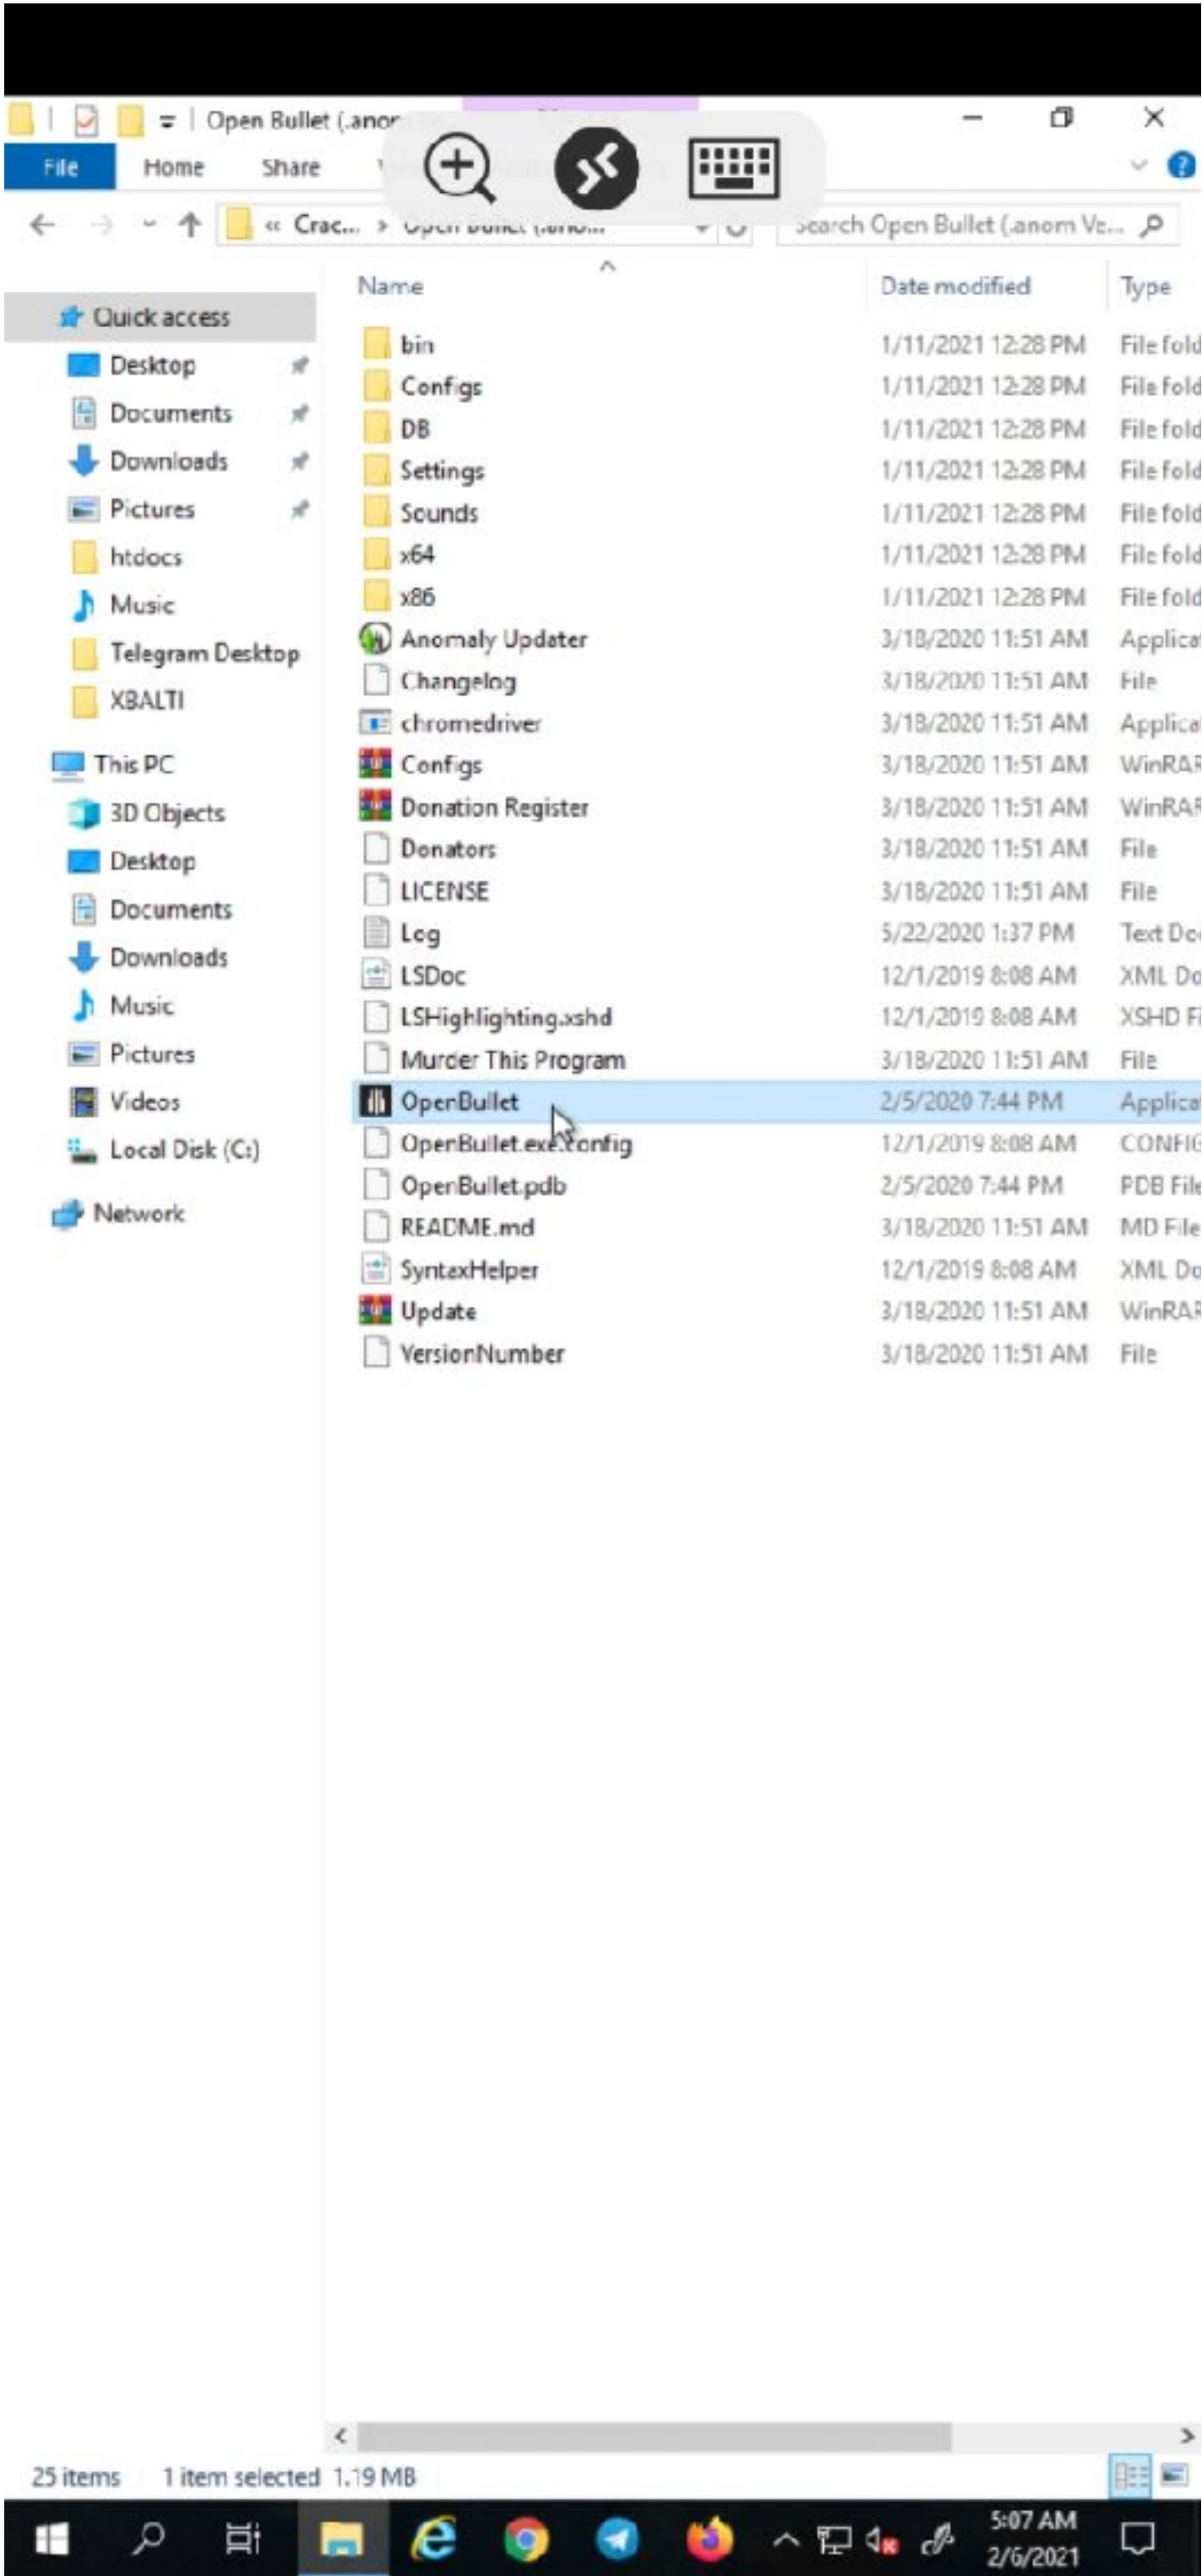

Note: After Installation It Will Ask To Restart,If You Are Doing This In Computer Then Restart

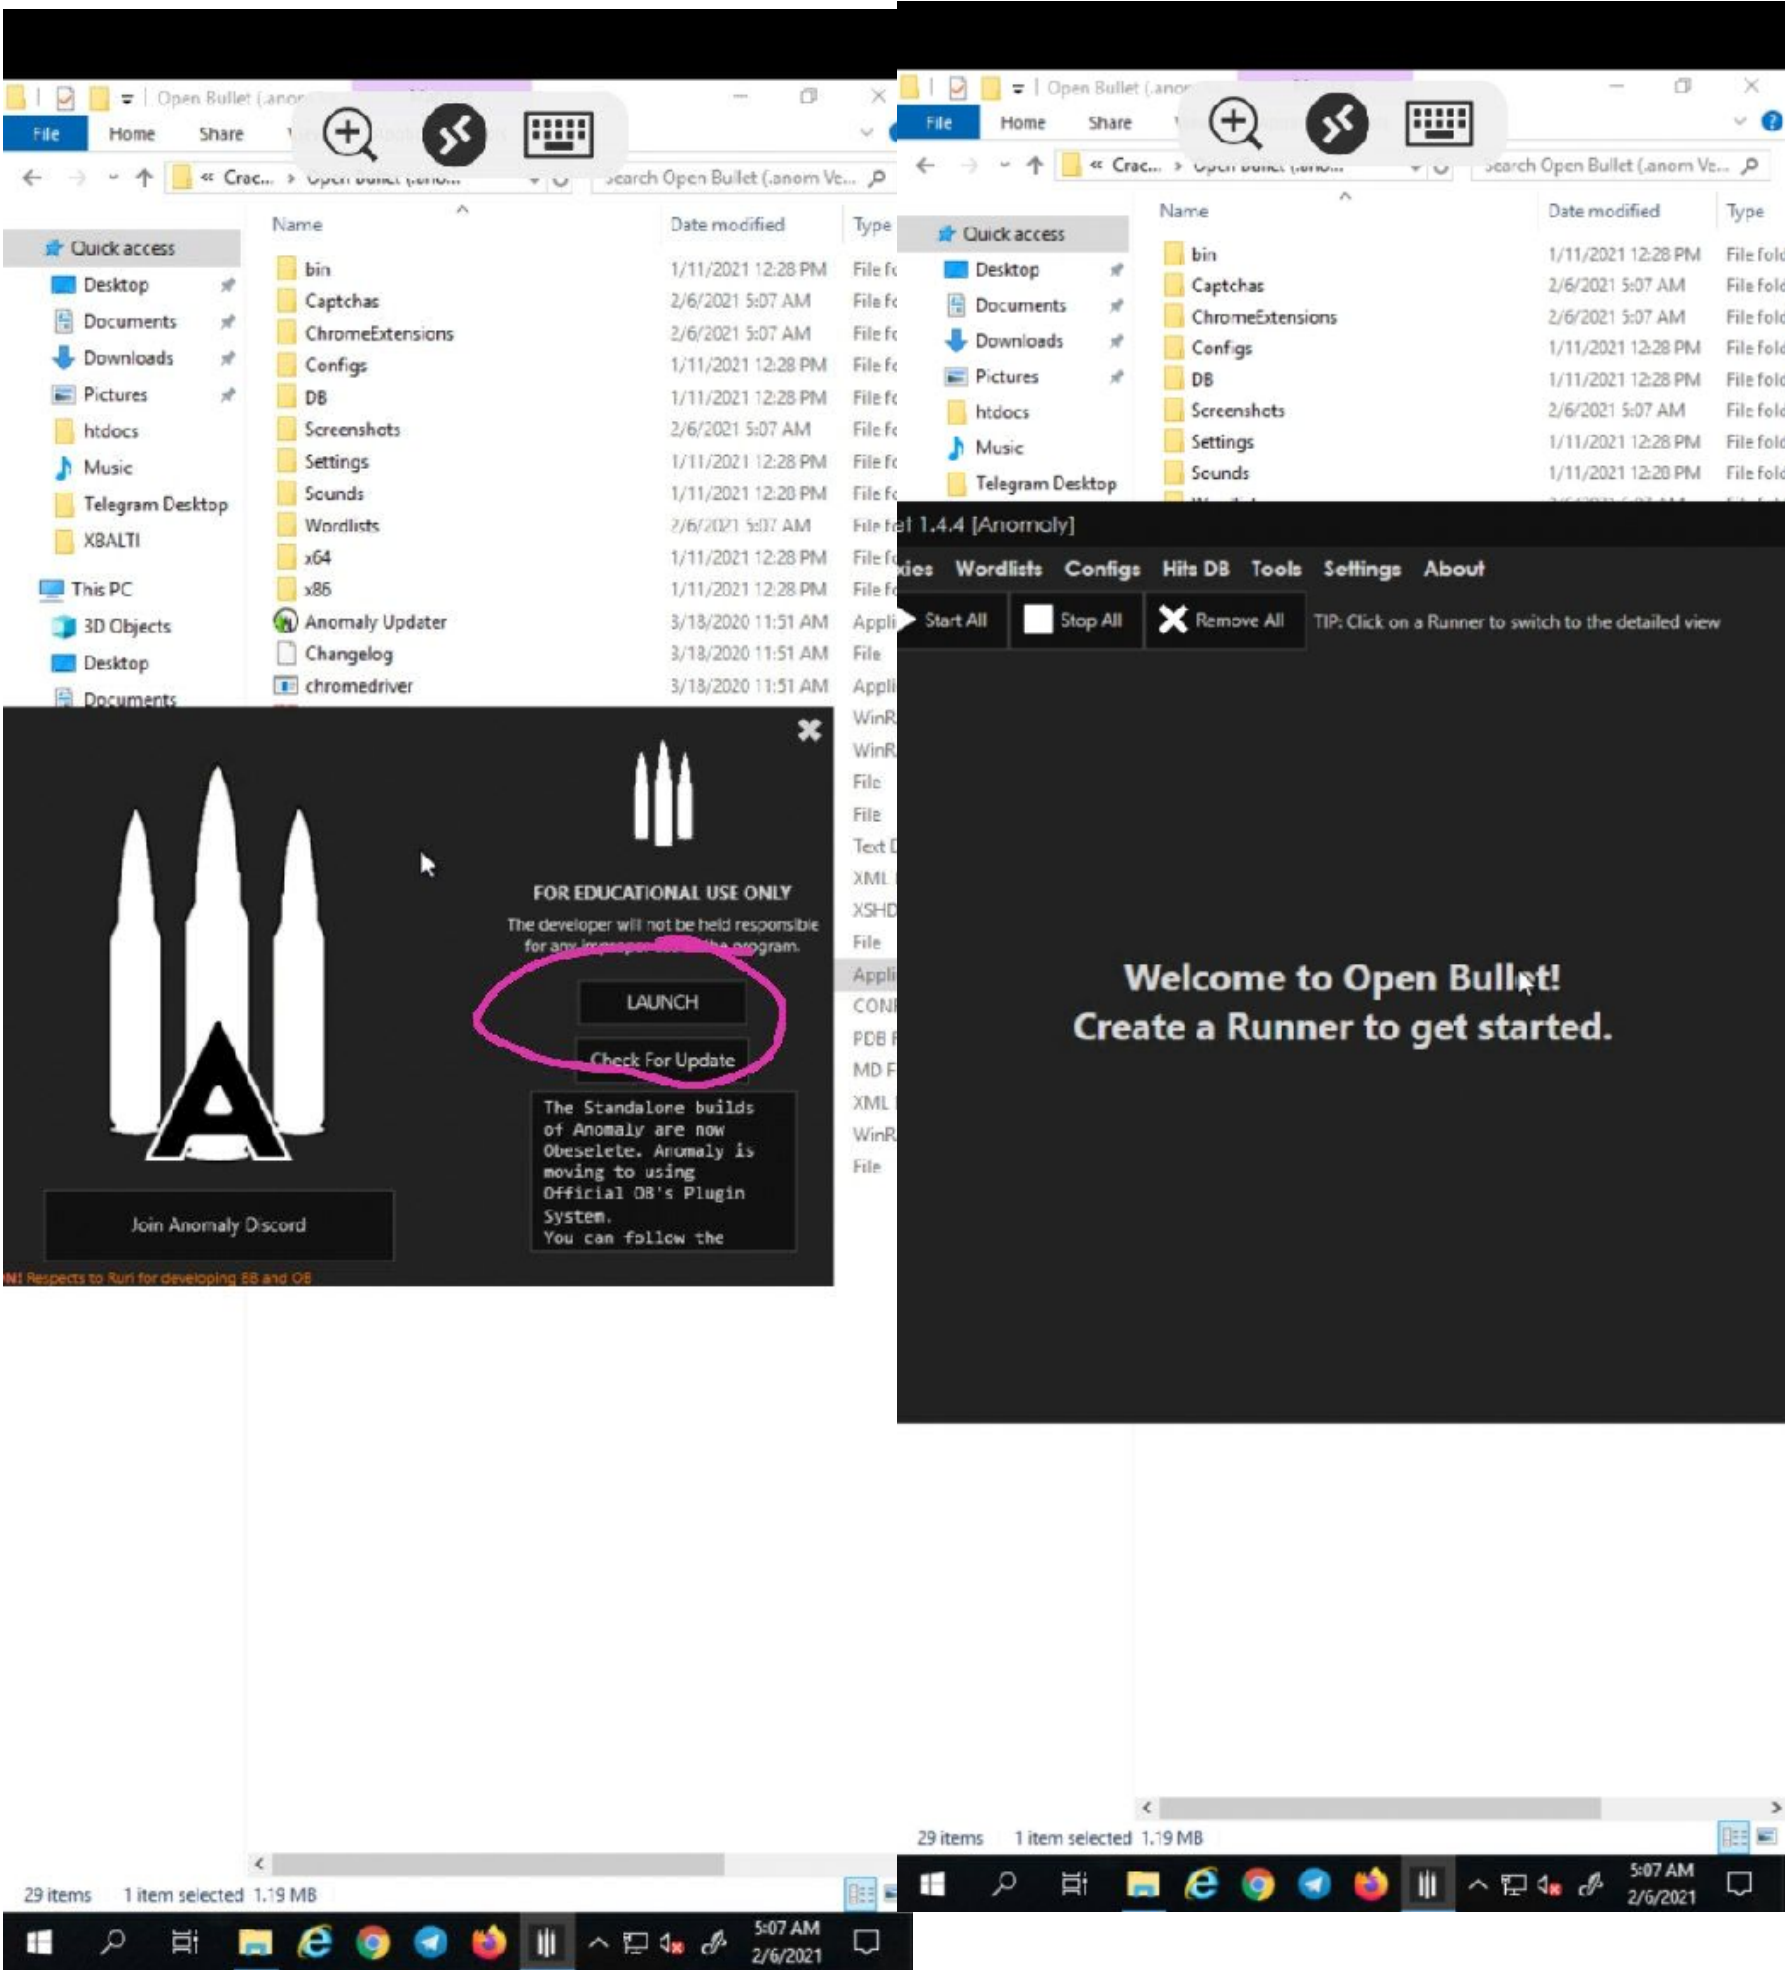

But If You Are Doing This In Rdp Then After Selecting Restart, Your Rdp Will Be Disconnected Automatically,So Wait For Atleast 5min Then Only Again Connect Your Rdp.

After Successful Installation,Close Everything And Now You Are Ready To Run Open Bullet.

# Now Run Openbullet!

Tool home page,  
It's quite large so you will have to rotate  
your Screen if you want to see the full tool  
screen .

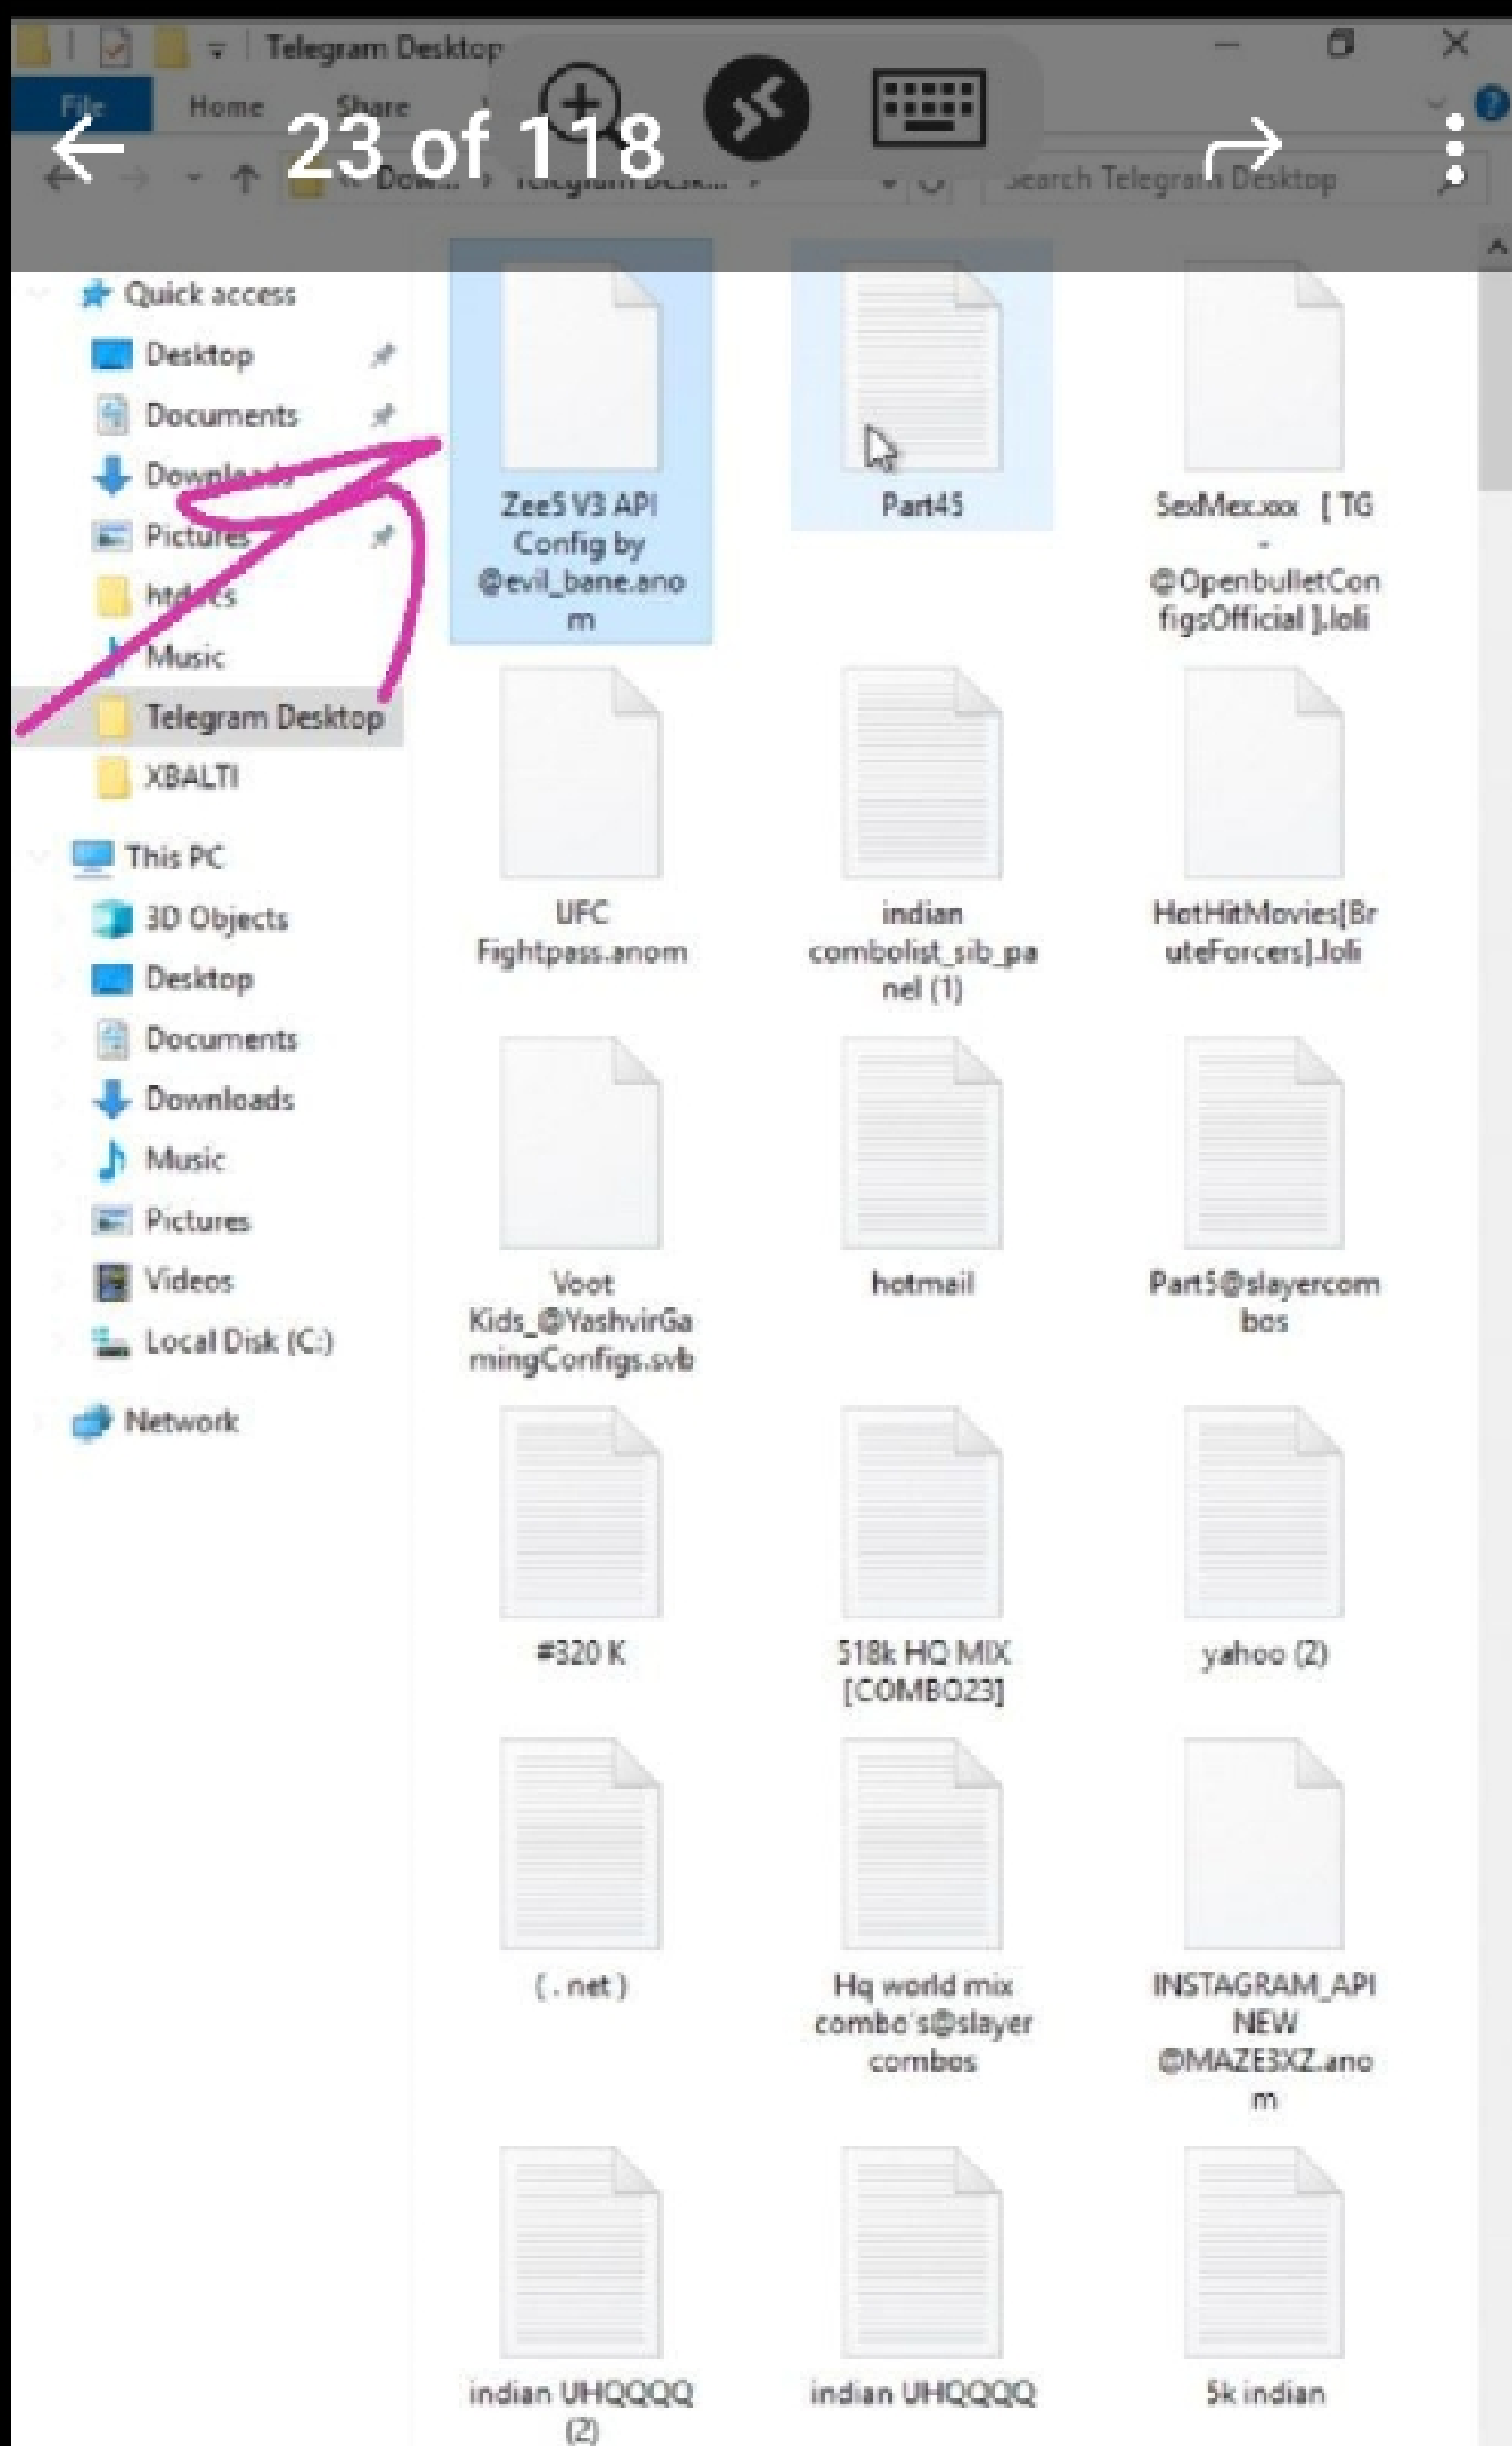

Now firstly we will Crack accounts which do not require proxies.

So we will target zee5

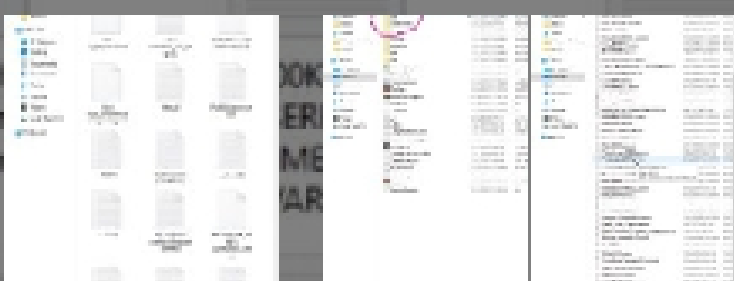

Forward Zee5 Config To Telegram In Your Rdp And Download it

Now All The Files That You Have Downloaded From Telegram In Rdp Will Be Saved In /Downloads/Telegram Desktop/

Select this file and cut it

{Rarely Active} 『तेरी मौत』 Rishab 【...

06.02.21 at 11:11 AM 5:35 AM 2/6/2021

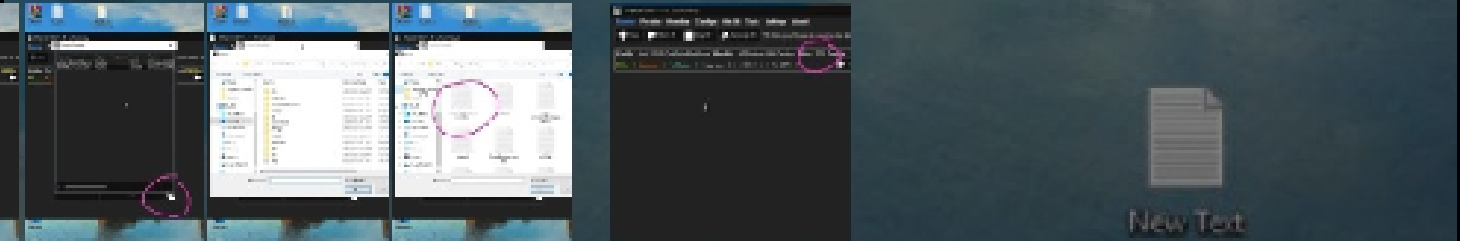

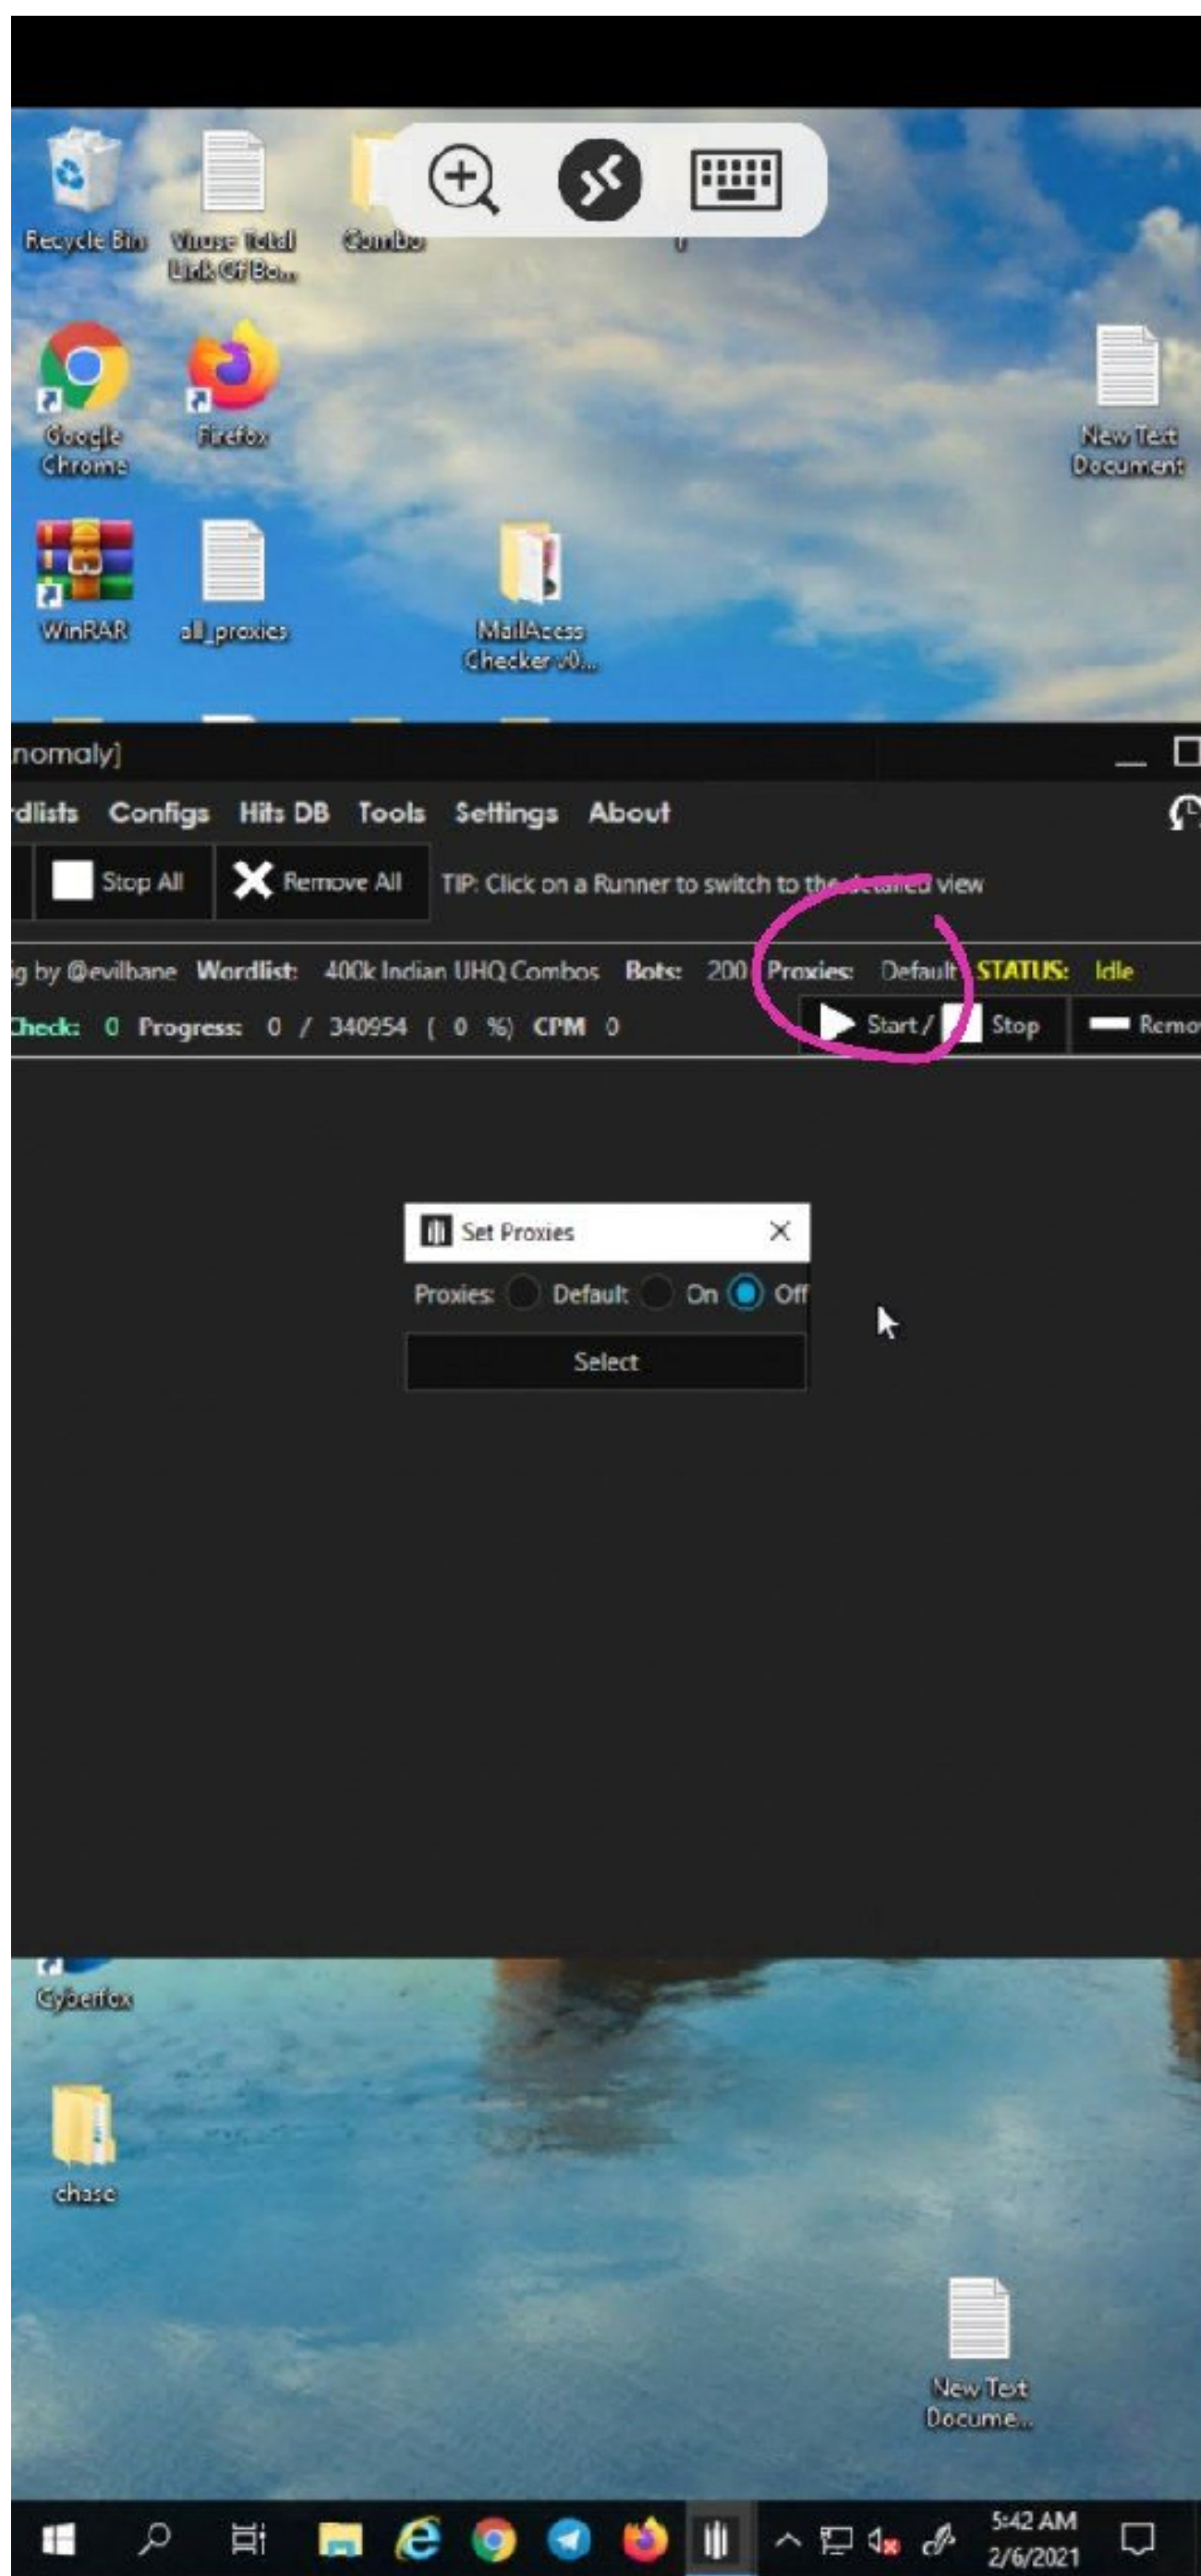

Select bots and set as per given in the config

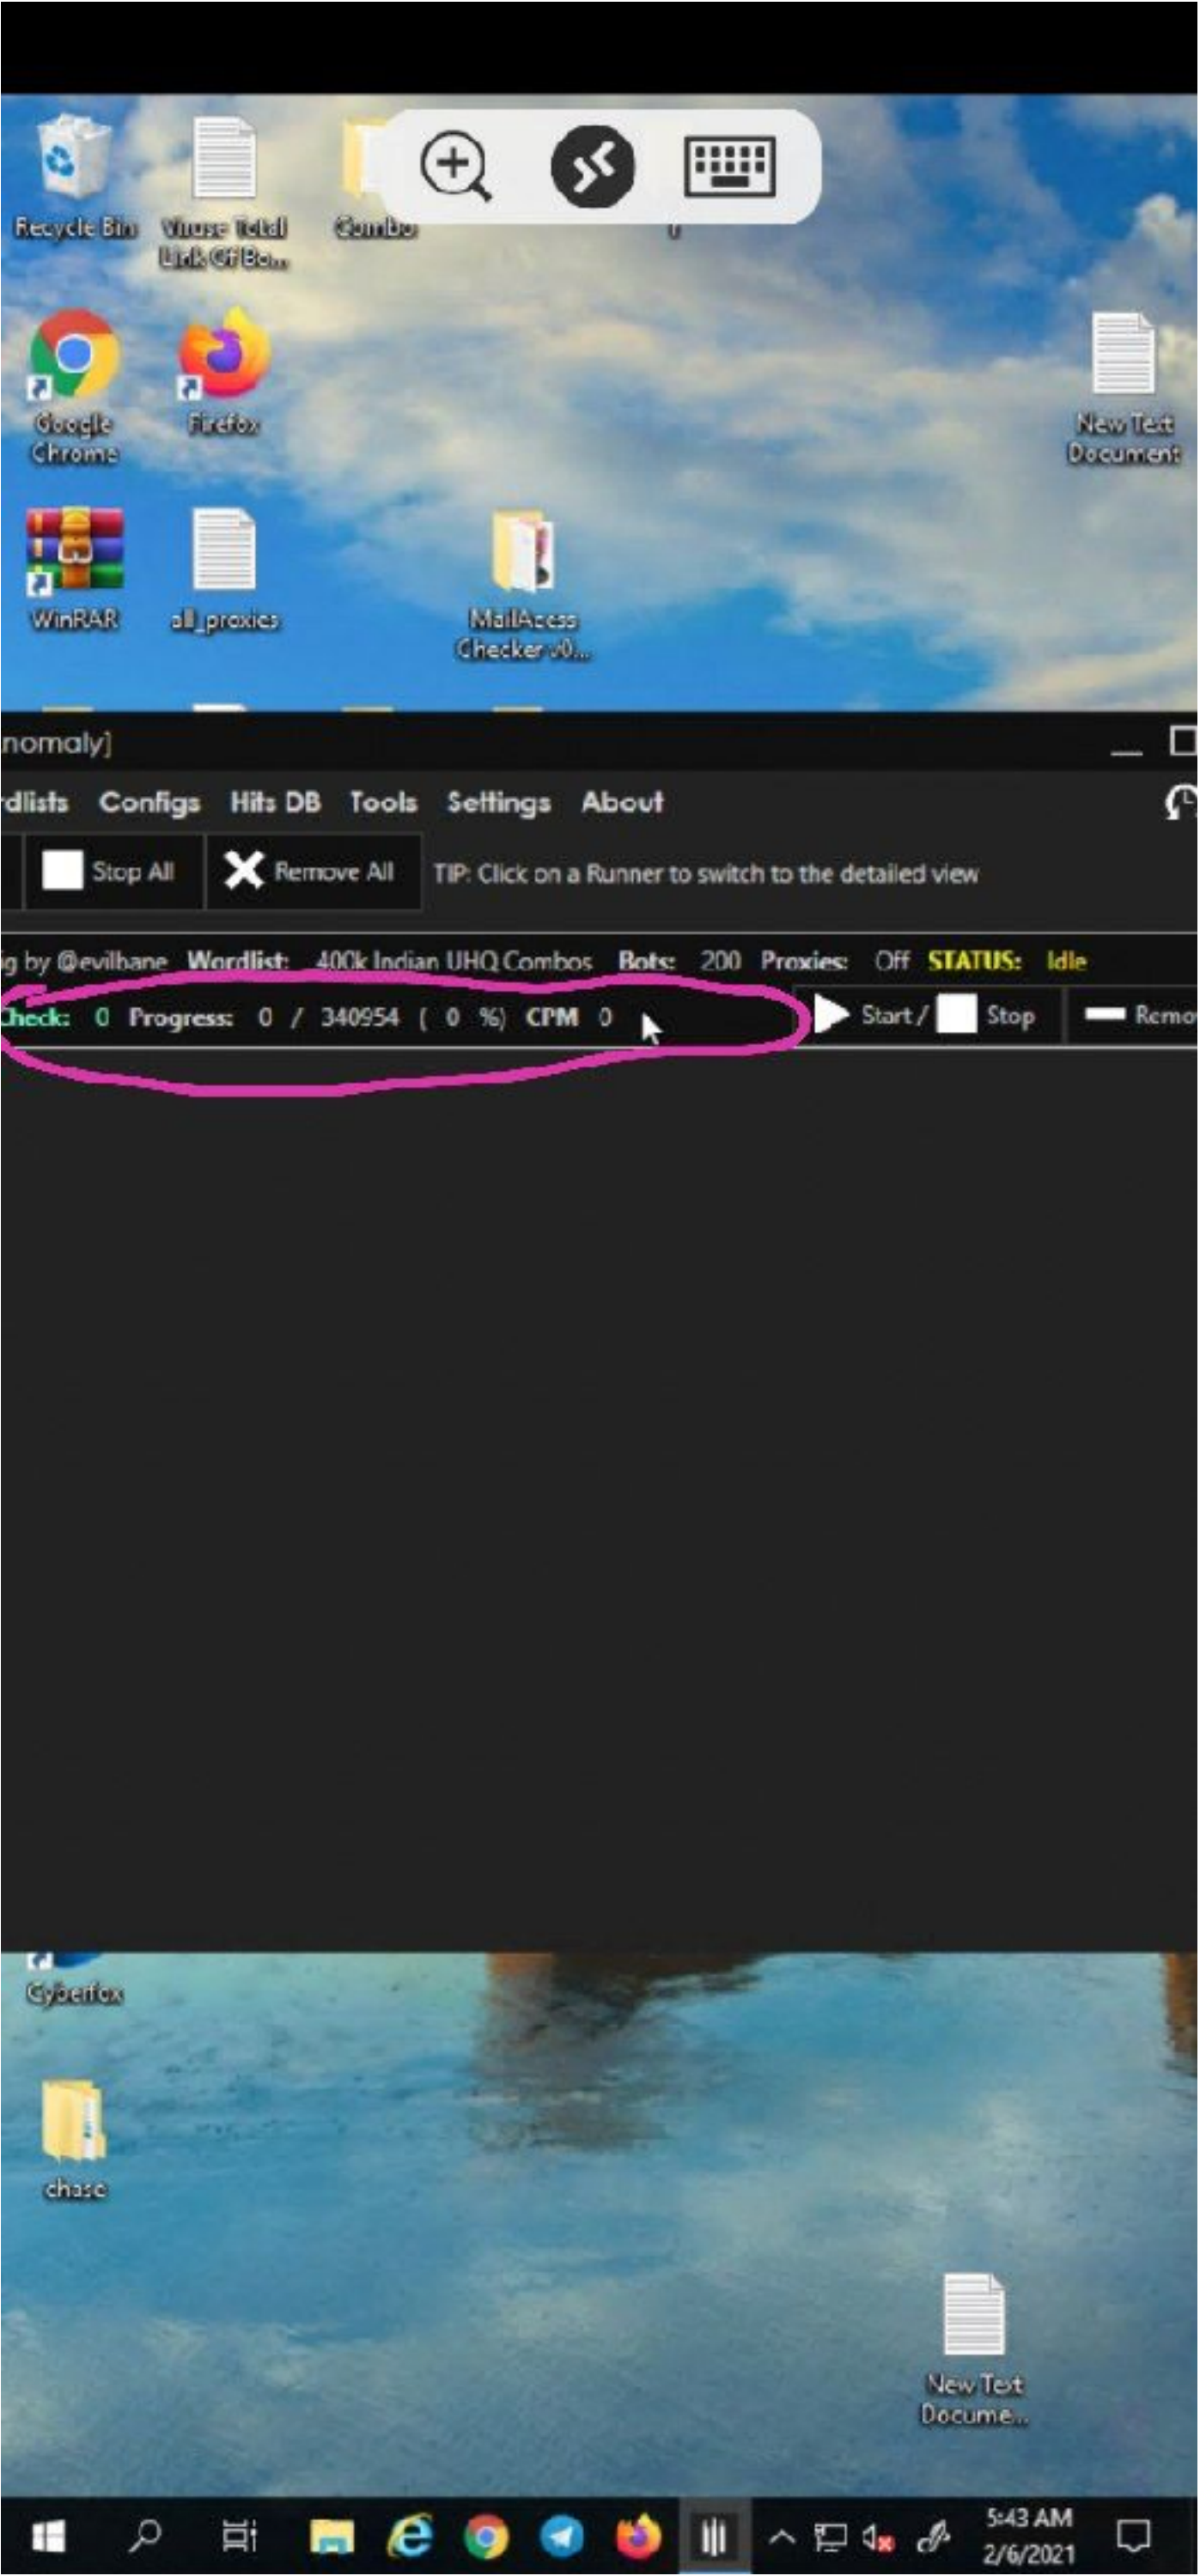

Set Proxies to on/off as per your config needs,here we are using Zee5 Config which is proxyless so we will select off

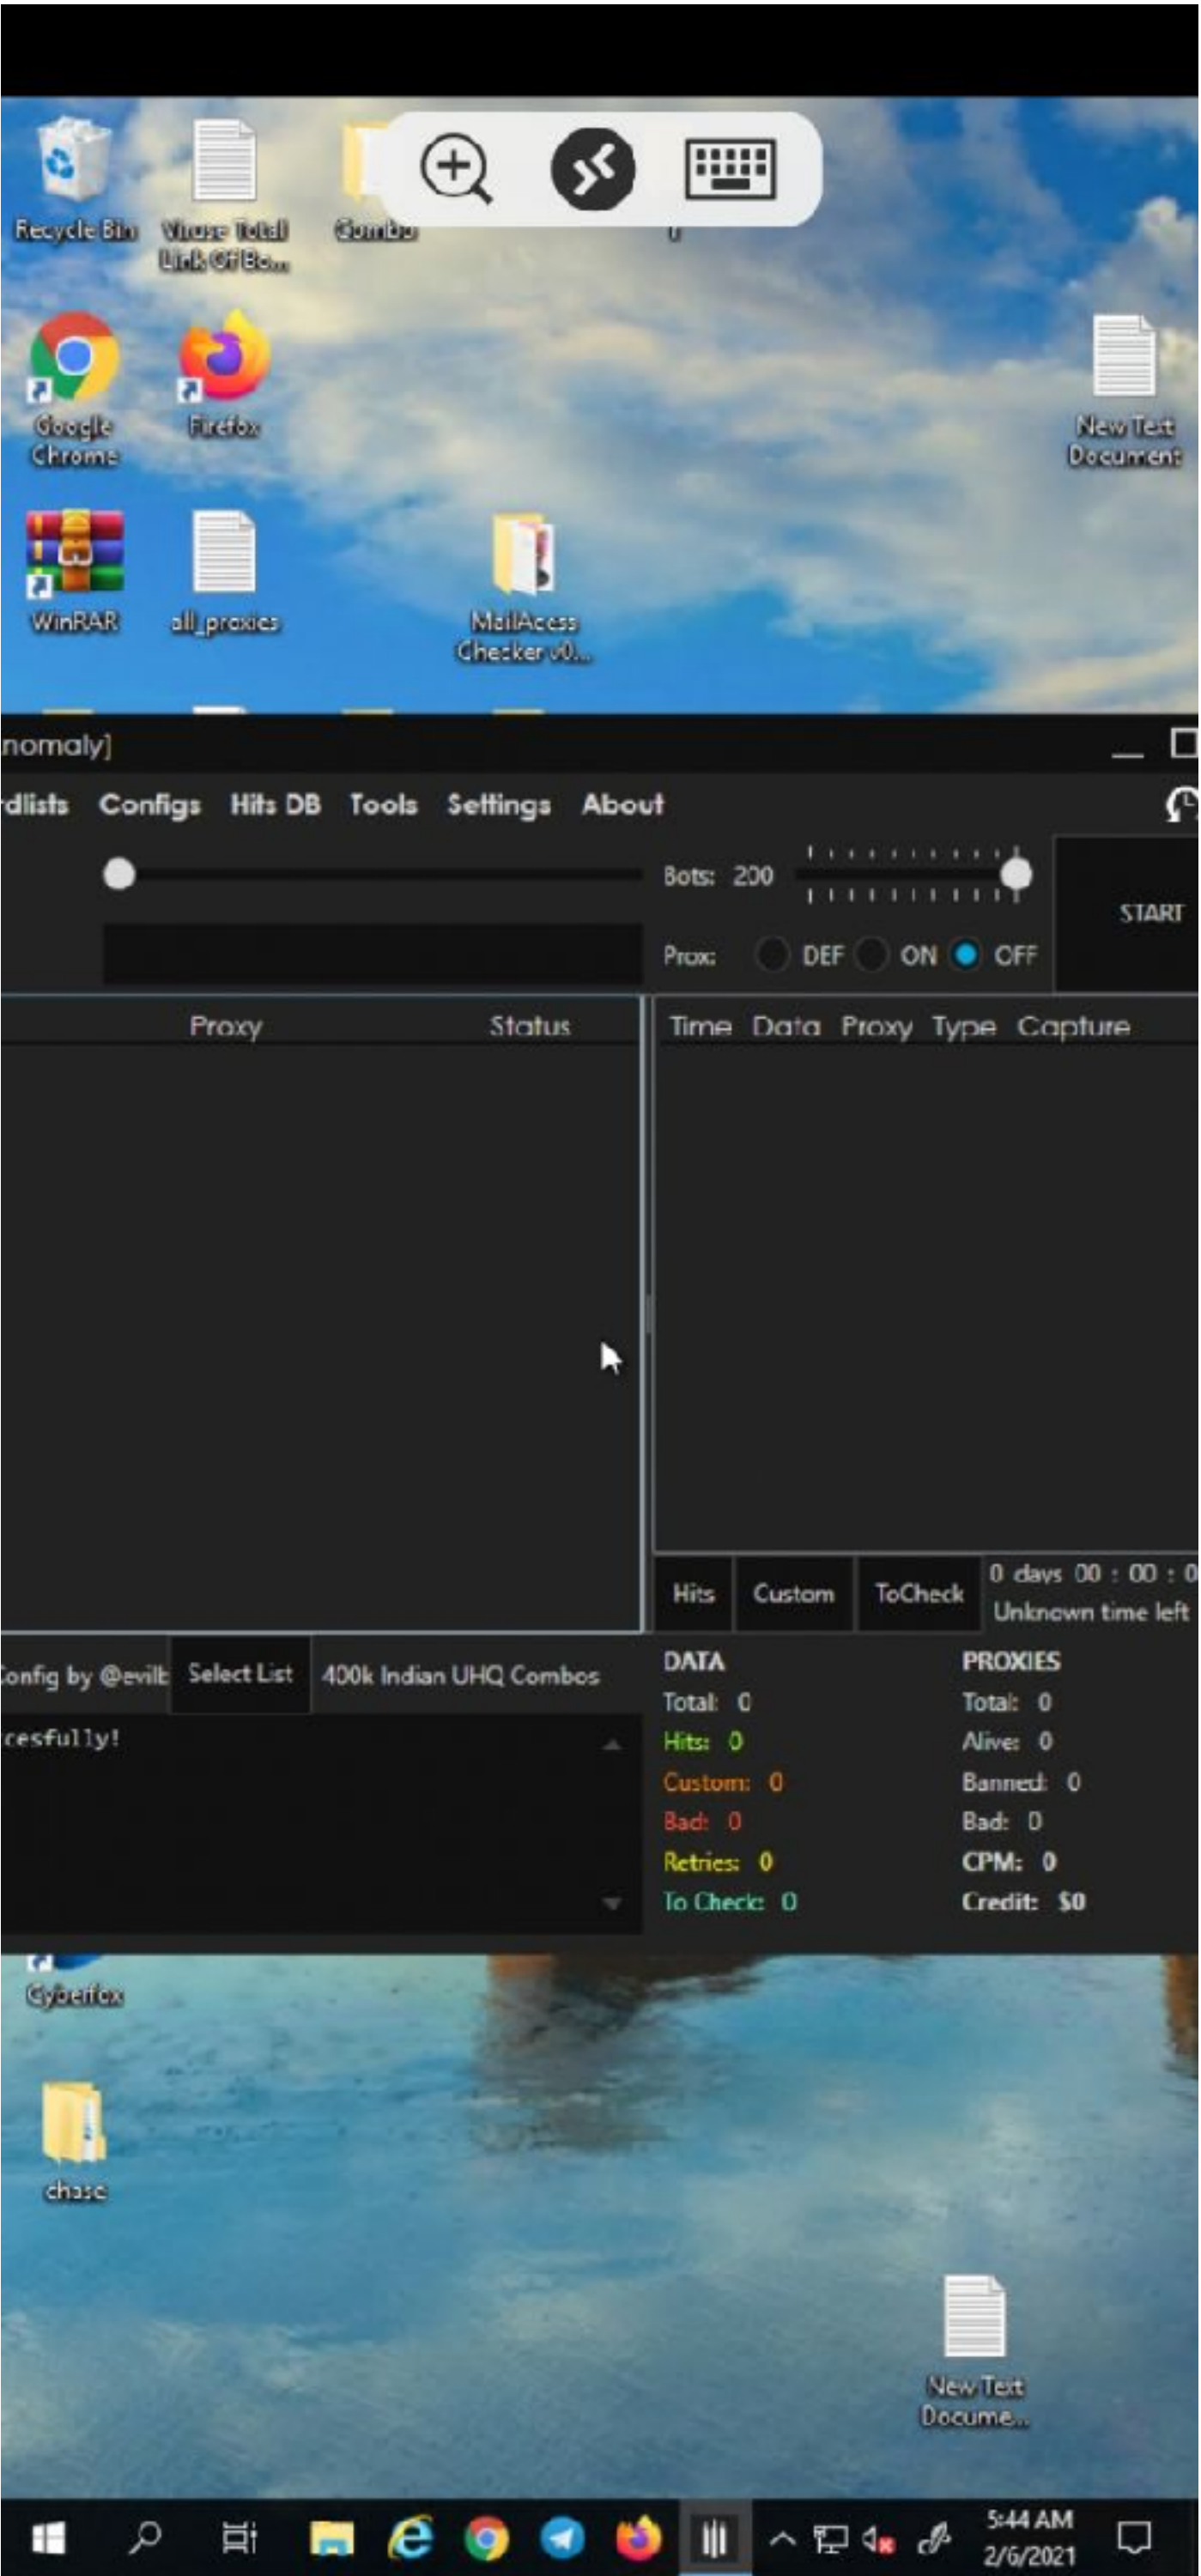

Now click anywhere in this area

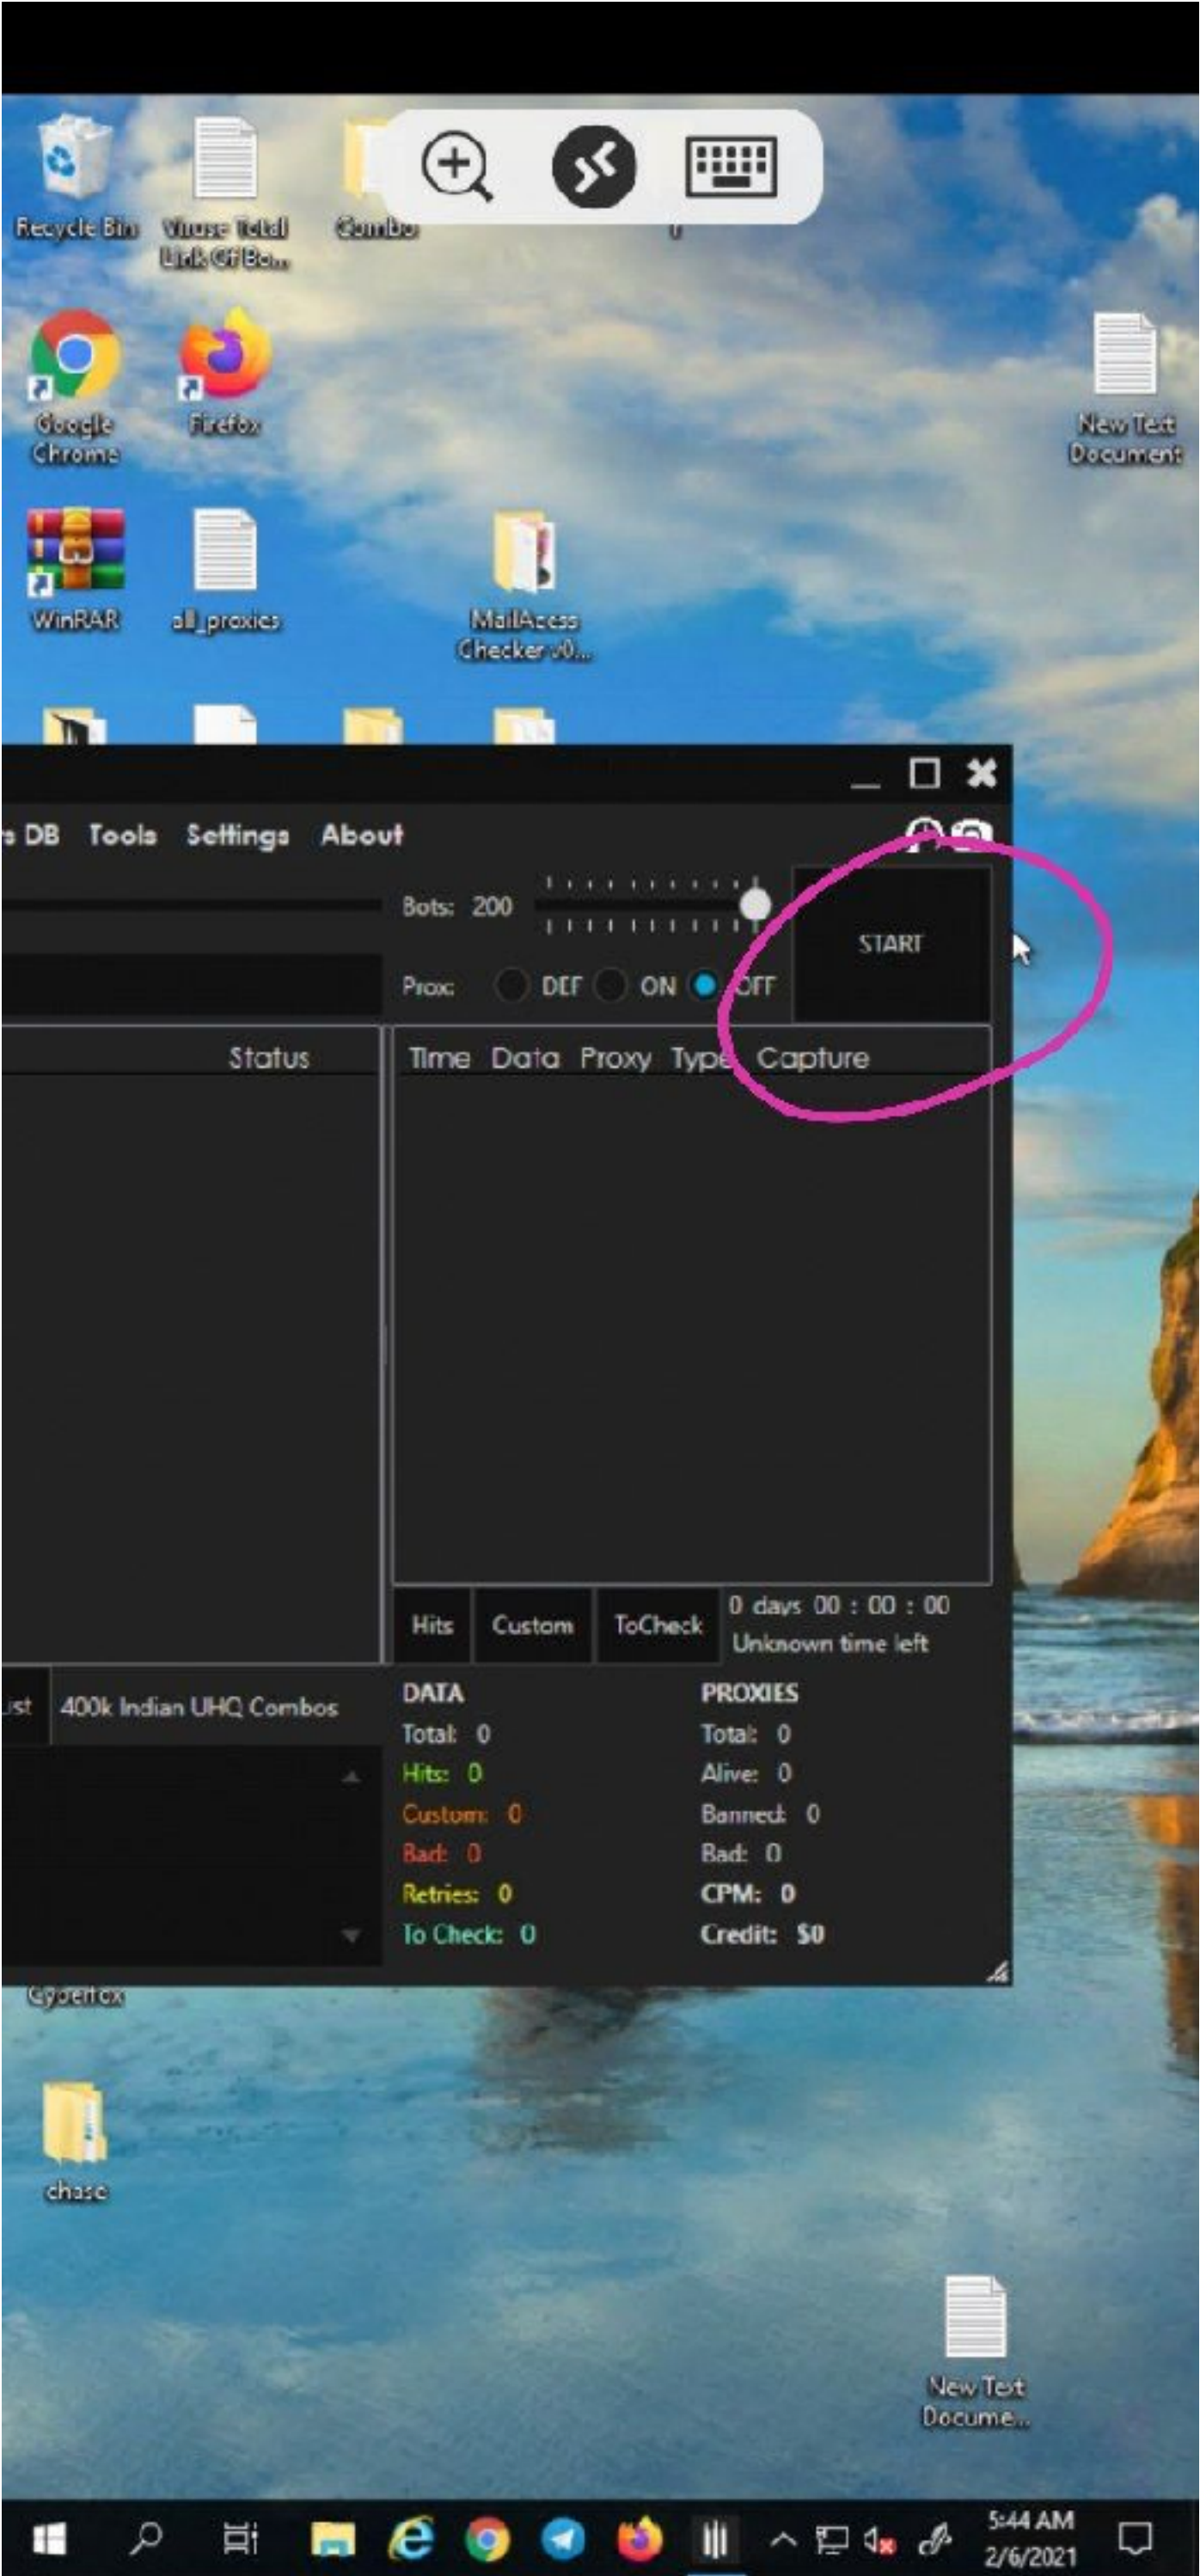

This screen will open

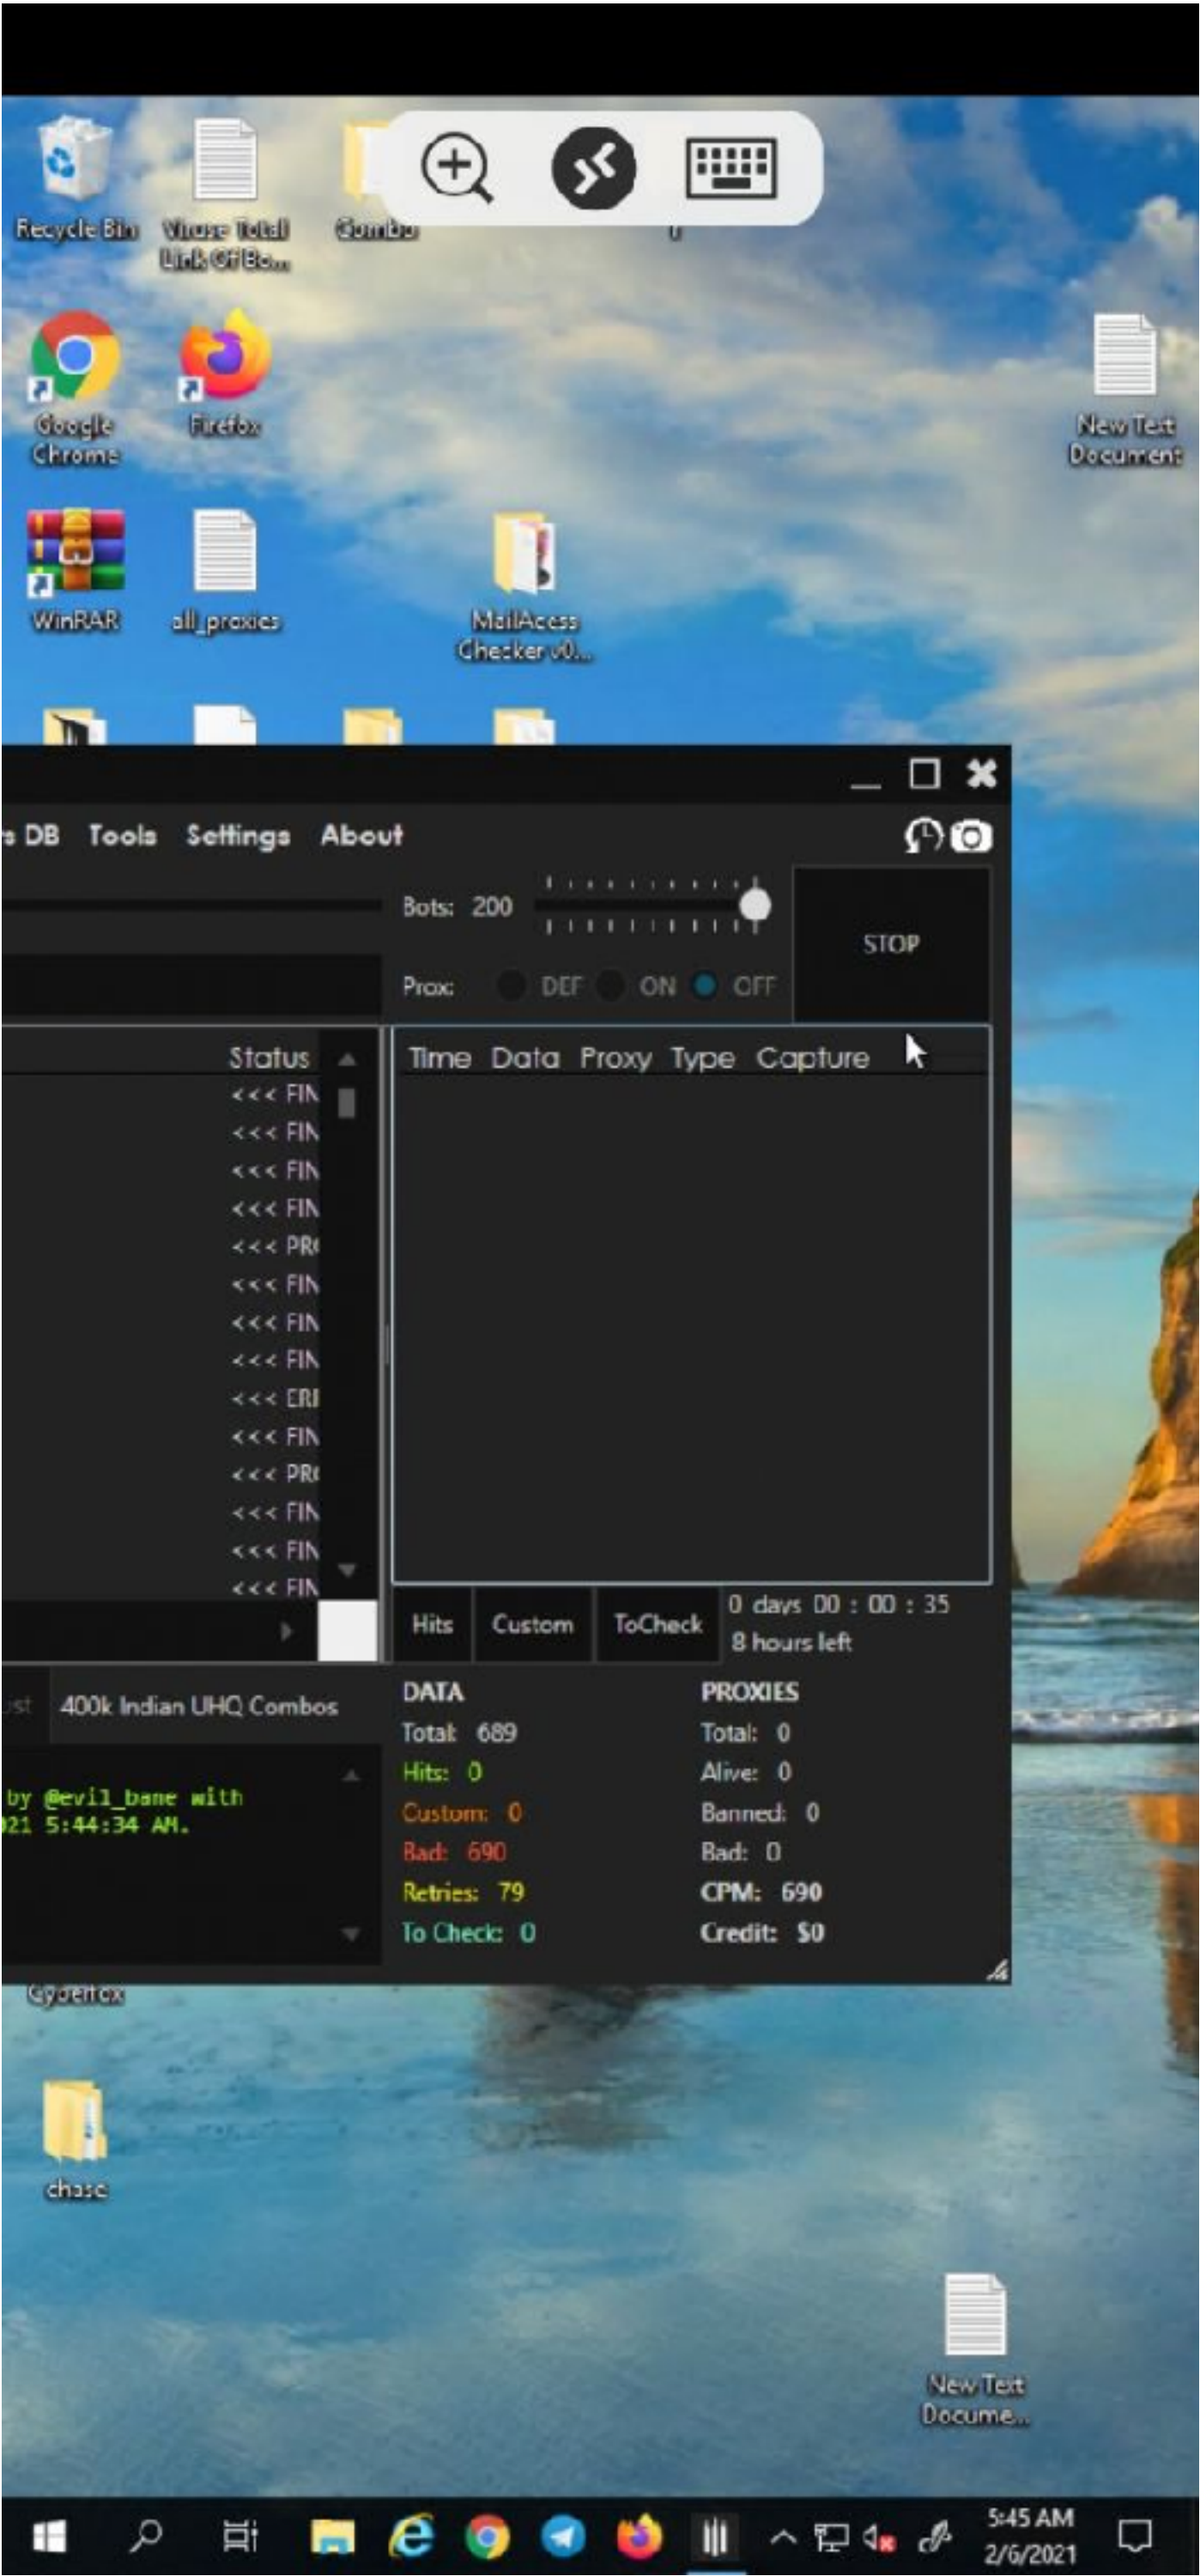

Now select start

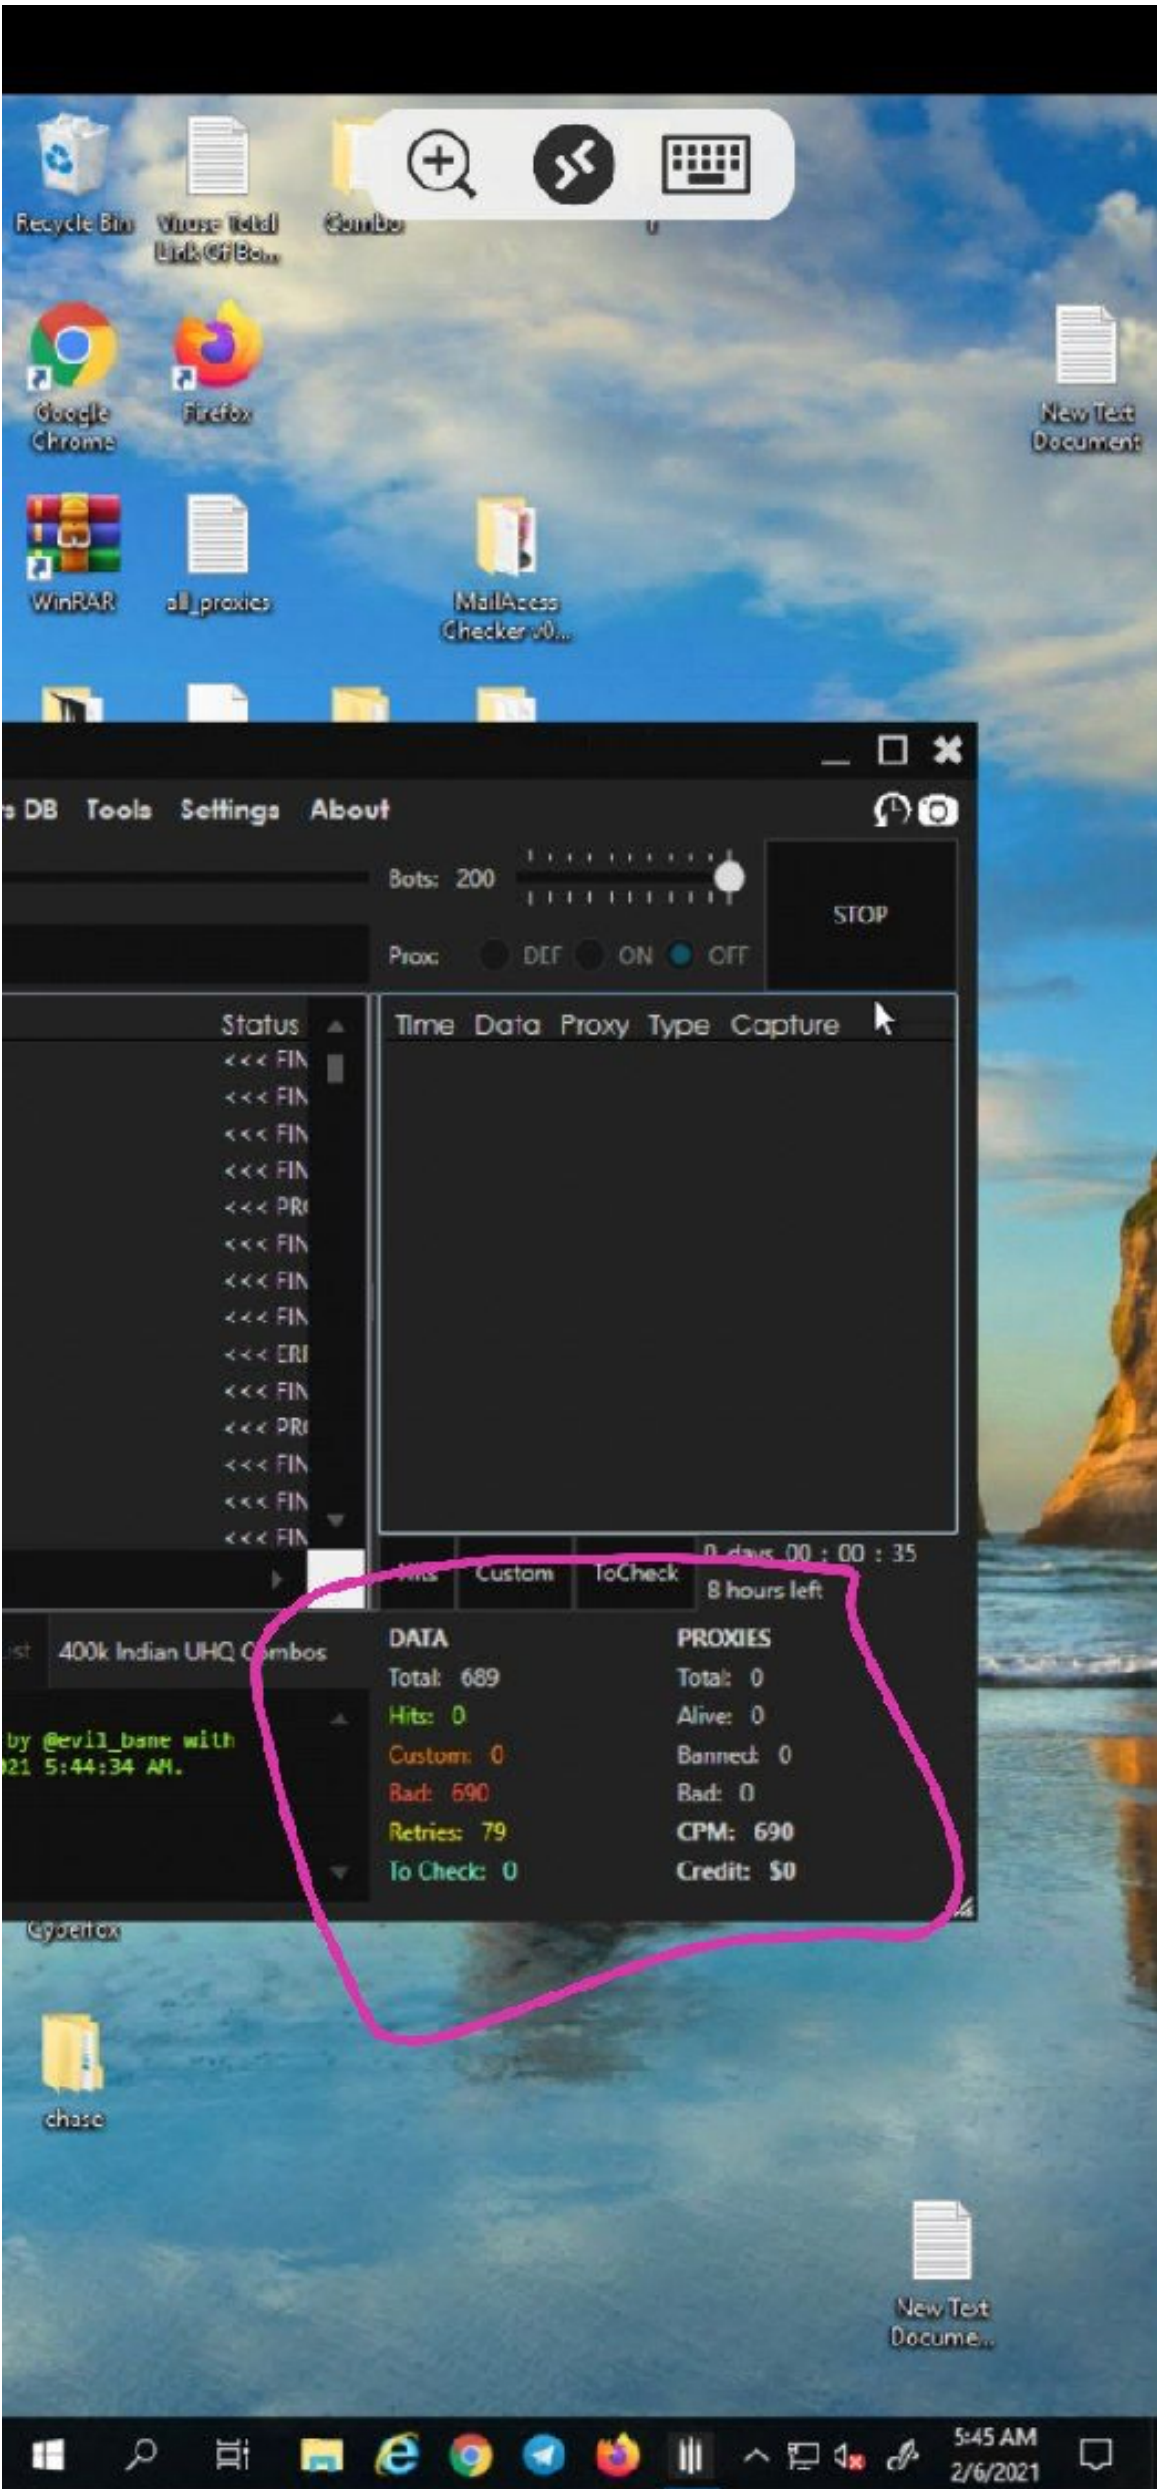

And here our Cracking started

Here every Field under Proxies section is 0 because we are not using proxies,

And let me explain all other fields

Total: How Many Email: Passwords Are Checked

Hits: How Many Email: Password Was Successfully logged In And Contains Some Premium Membership ,Coins Etc

Custom: Accounts Which Are Successfully Logged In But They Have No Premium Plan Or Their Plan Is Expired.

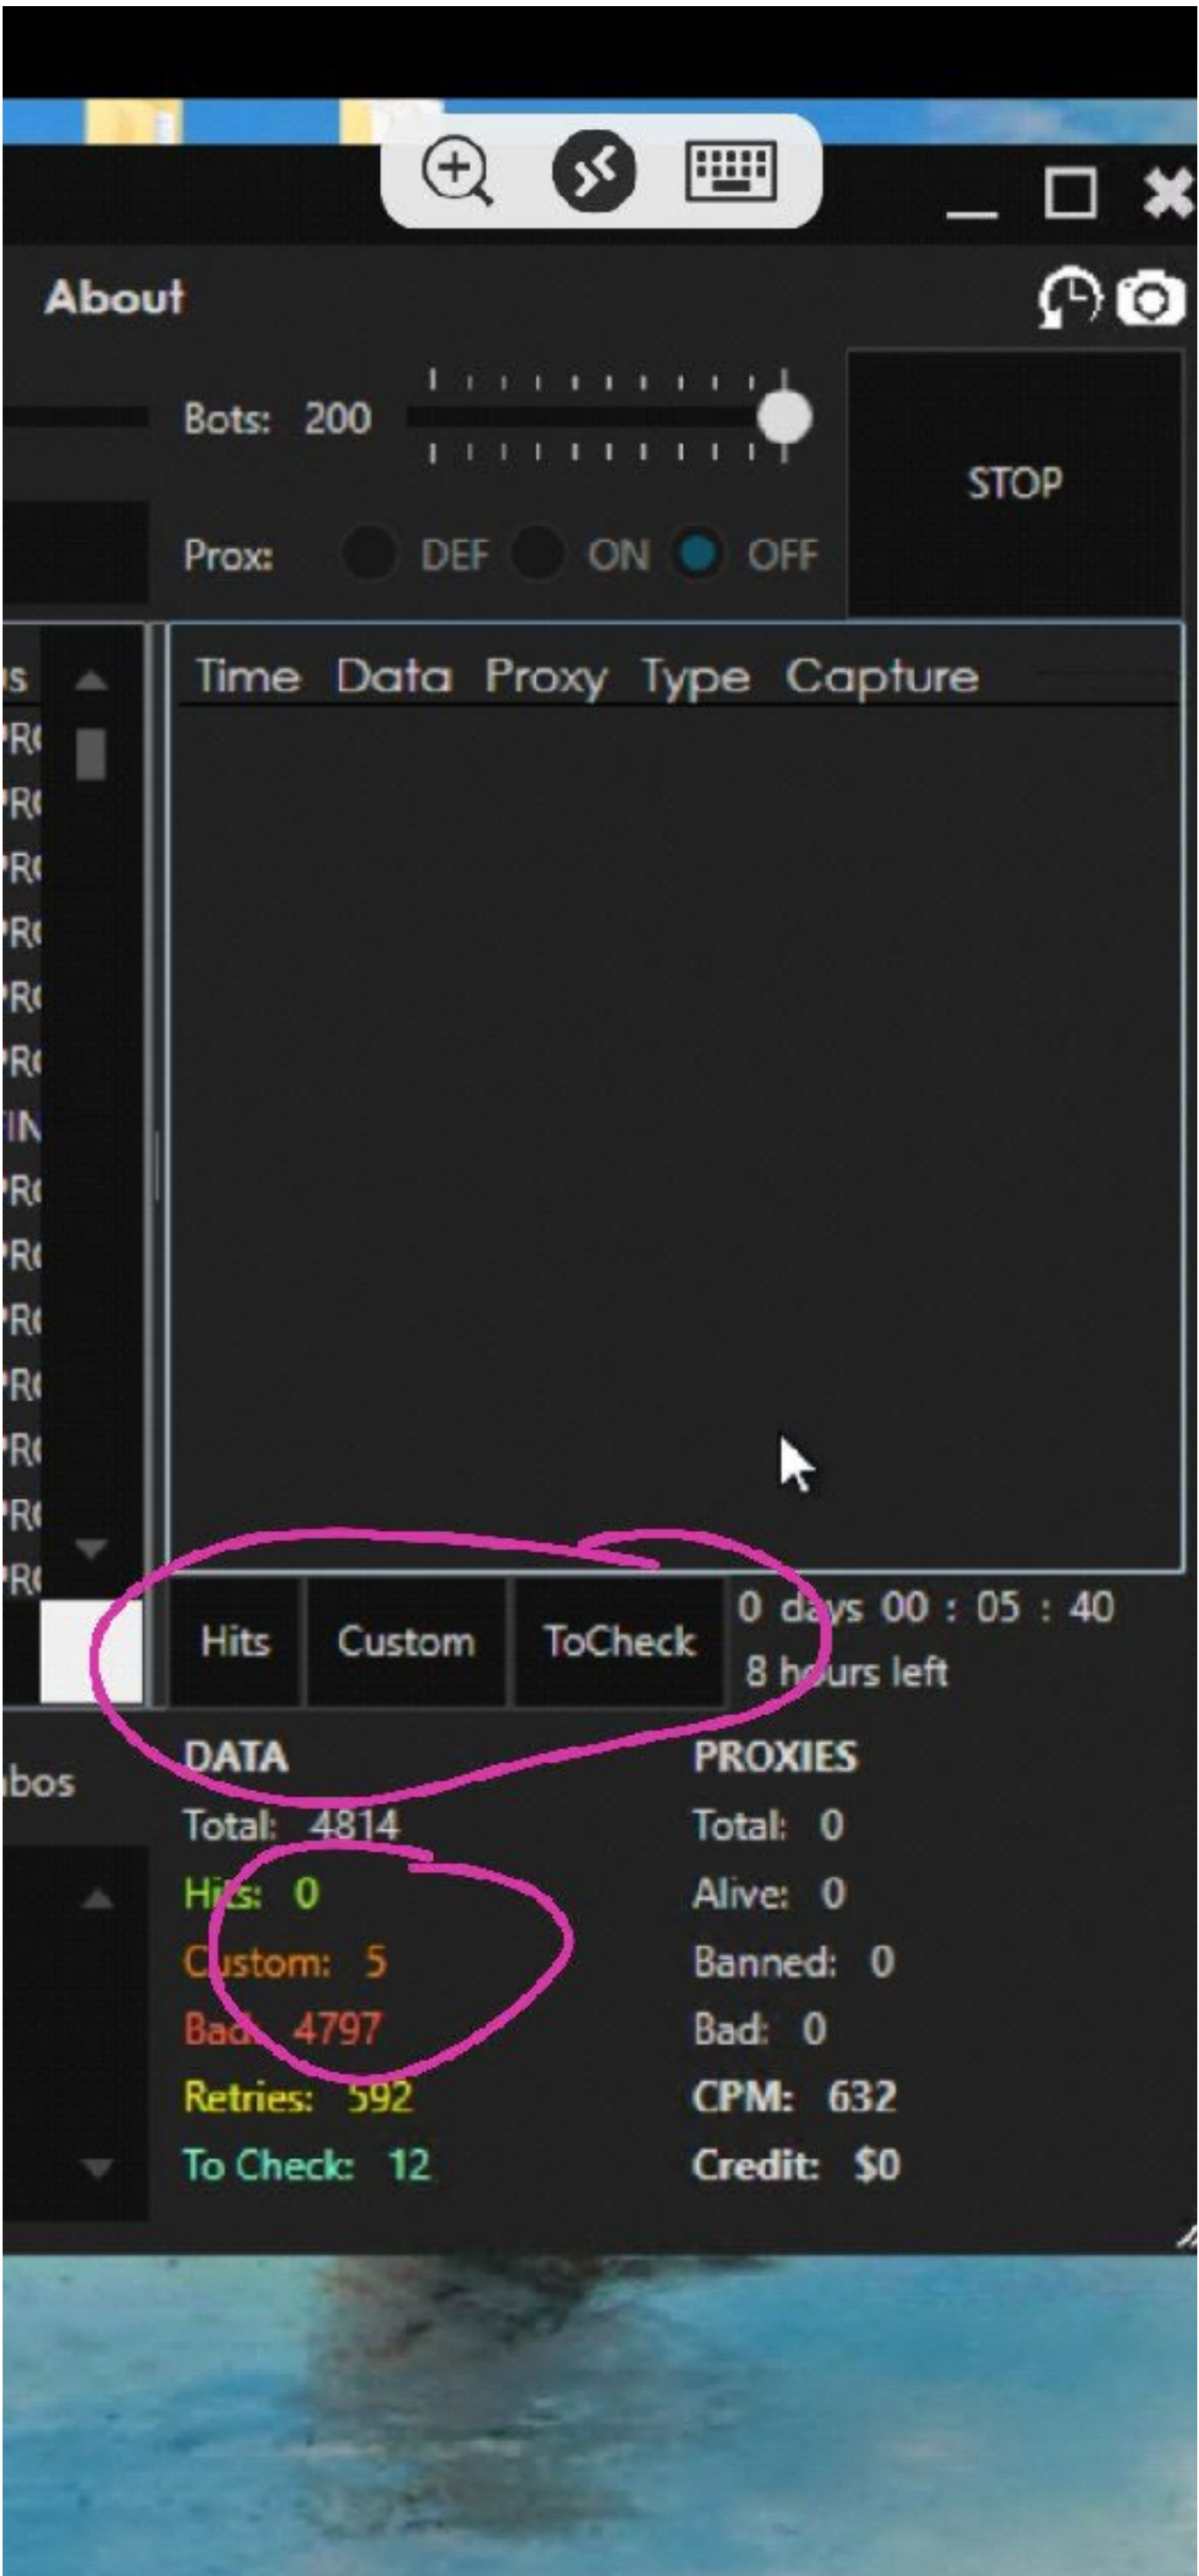

Bad:  
Email: Password Was Wrong so There Is No Zee5 Account With That Email And Password

Retries: Due To Fast Bot And Low Speed Some Accounts Are Again Tried To Log In

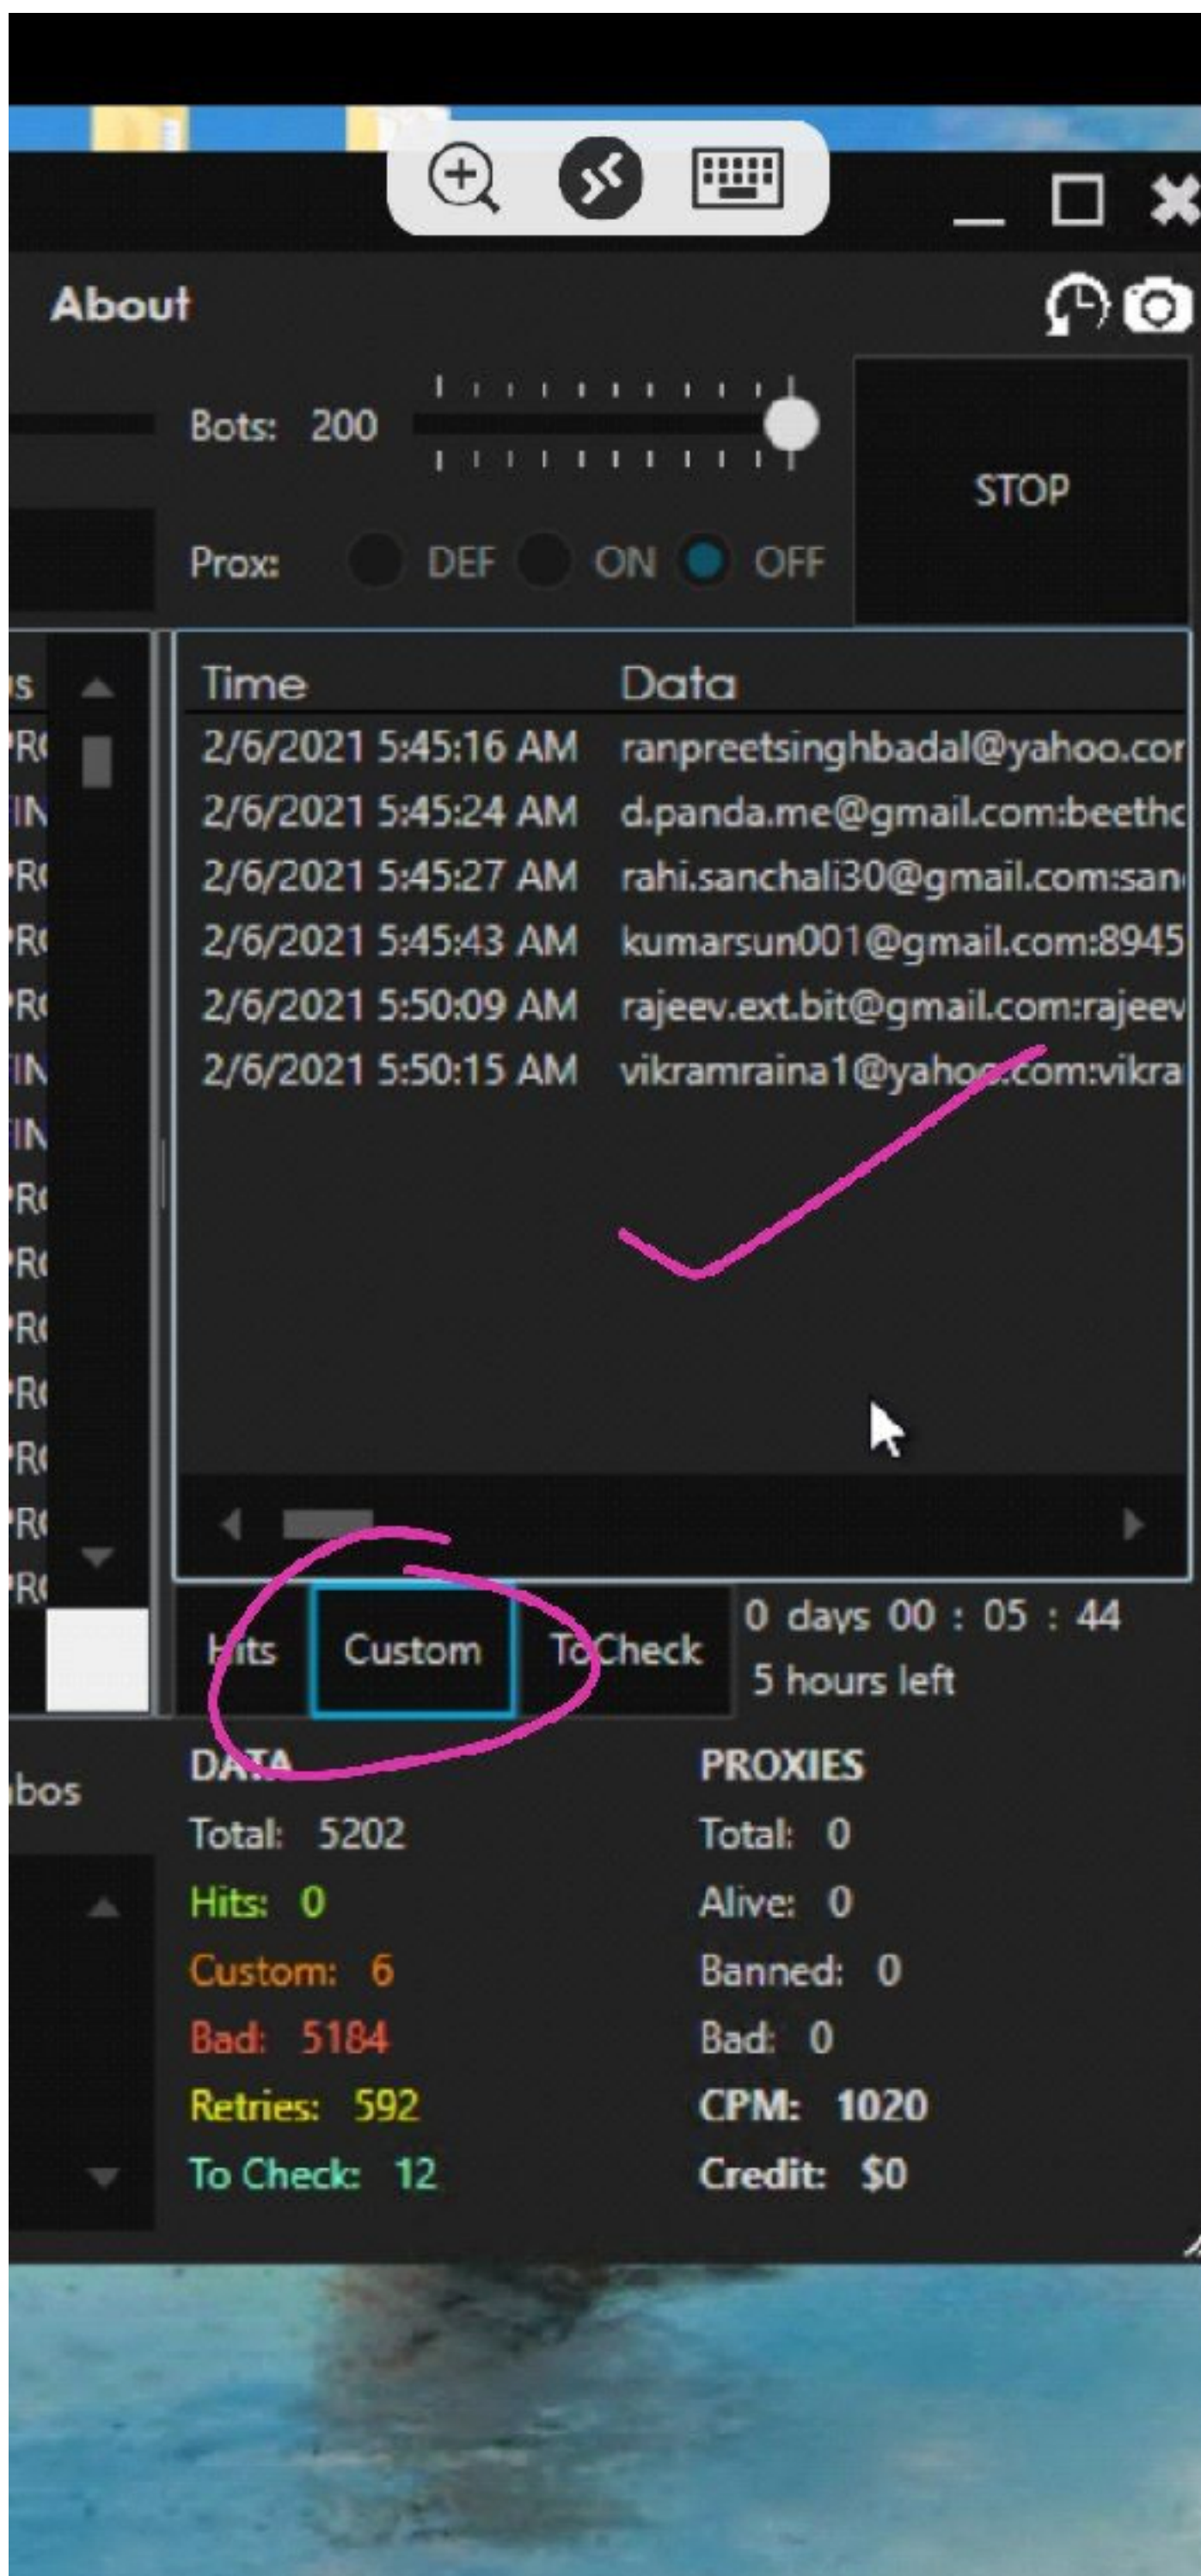

Cpm: How Many Email: Password Is Checked In One Minute

Rest Fields Are Useless

Got 5 Custom,  
You Can Select Custom Option To See  
Those Accounts.

Some Points To Note:

Once You Have Copied Your Config To That Folder,It Will Always Remain There,So You Don't Have To Repeat That Step Again And Again.

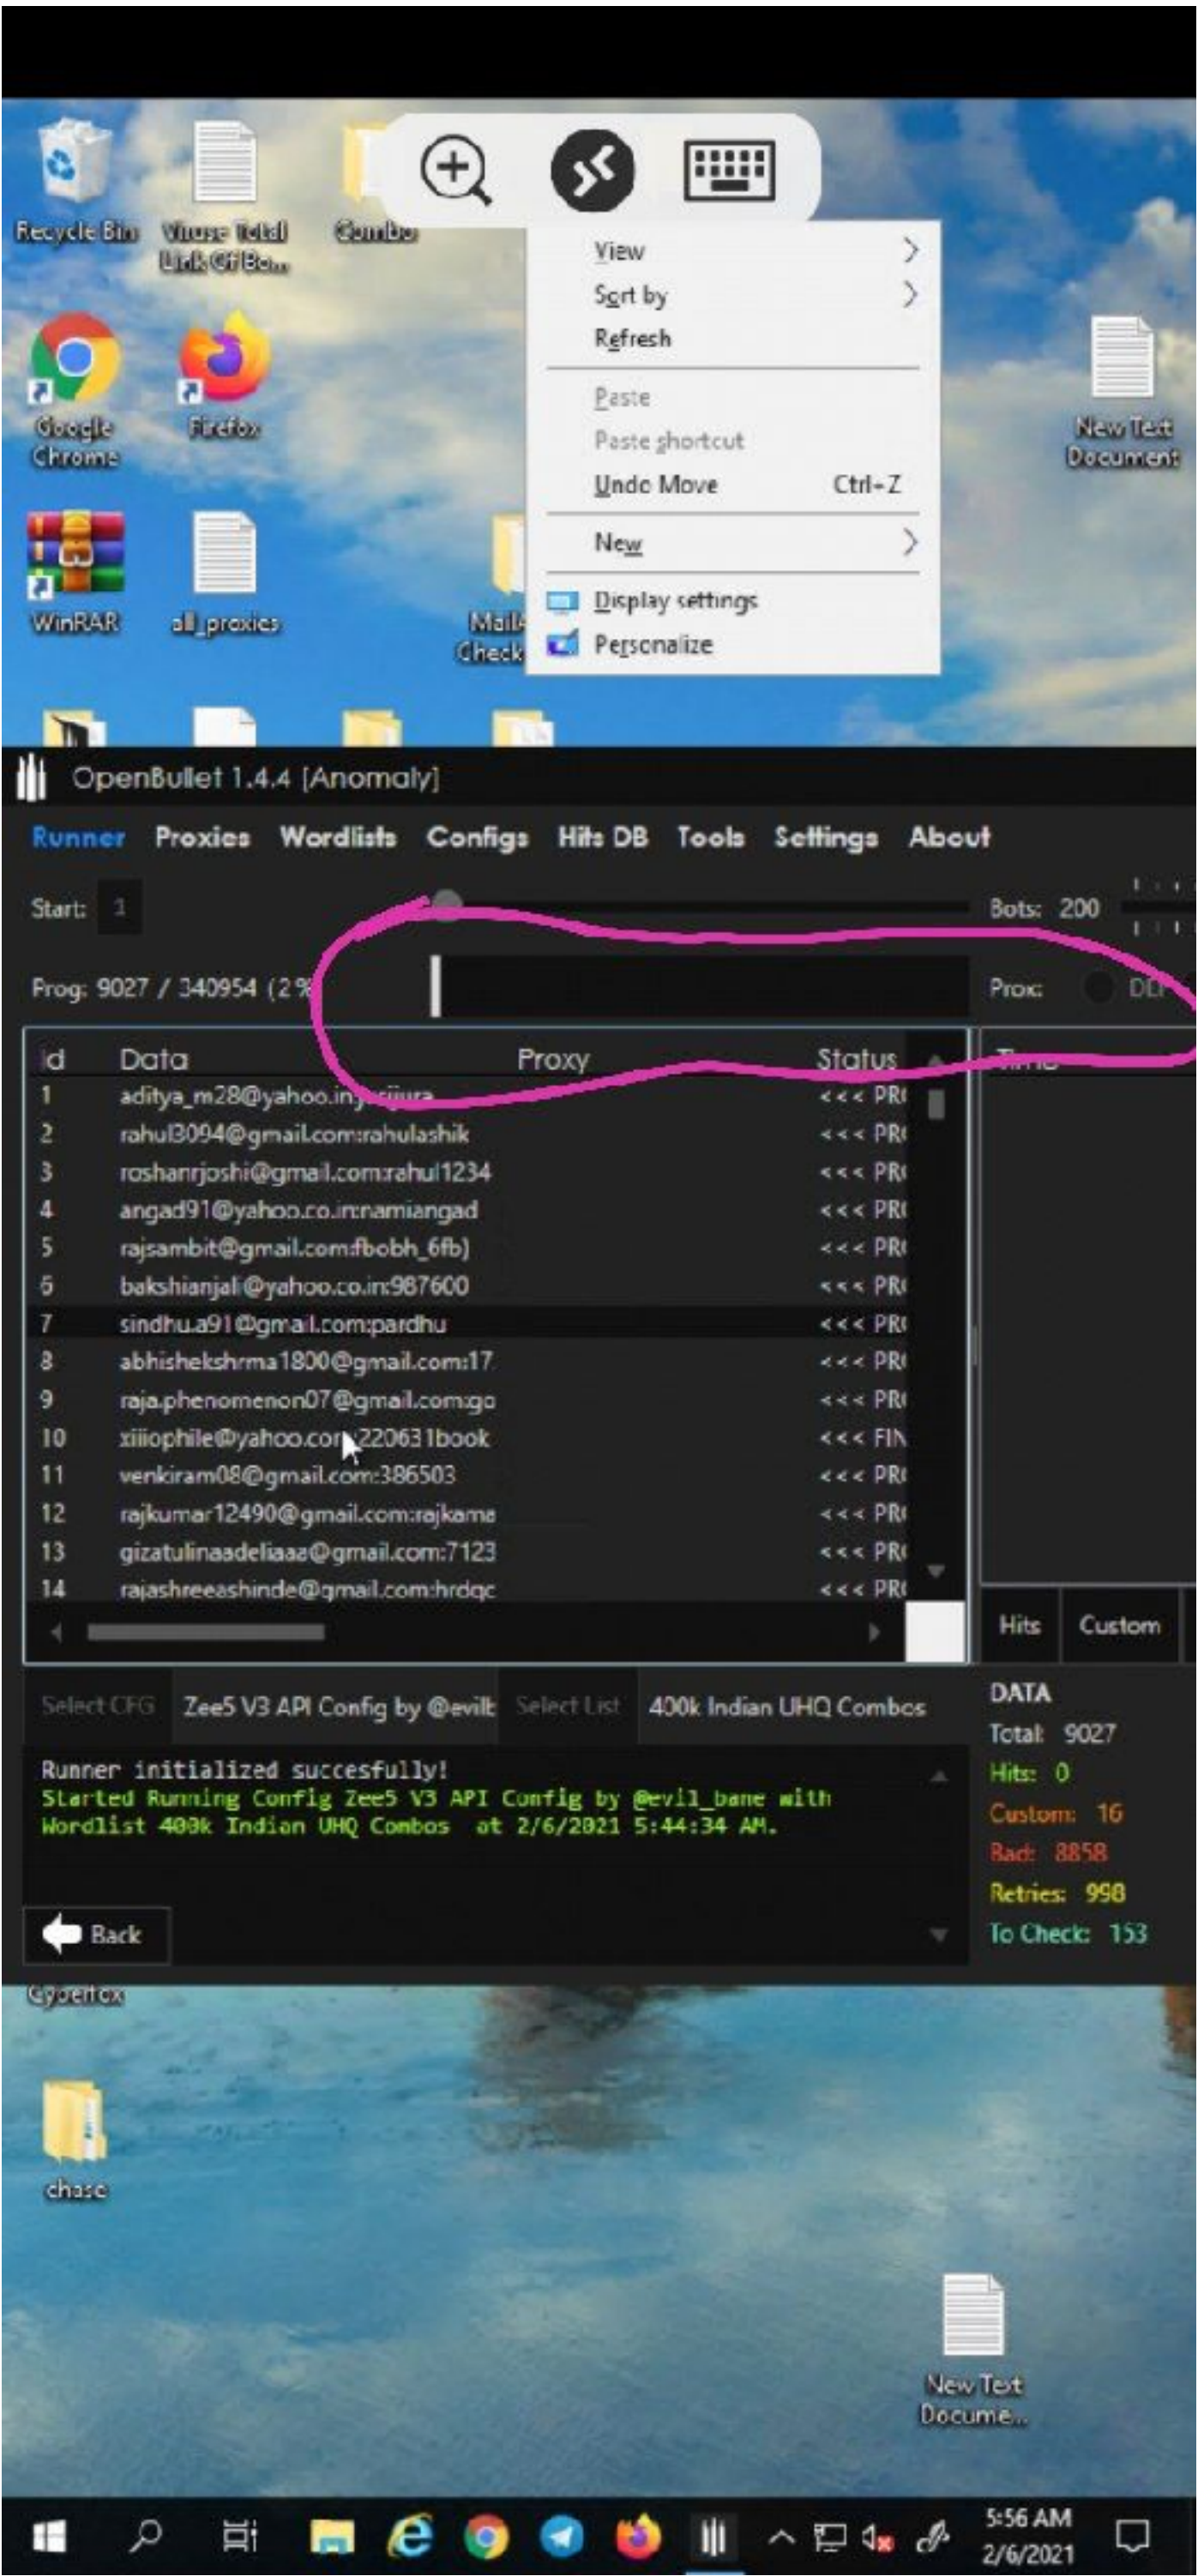

Now You Can Disconnect Your Rdp And Wait For The Hits To Come

And If You Are Doing This In Your Computer/Laptop Then Sit Back And Don't Turn Off Your Computer Until The Process Is Finished

This Is The Biggest Reason Of Using Rdp

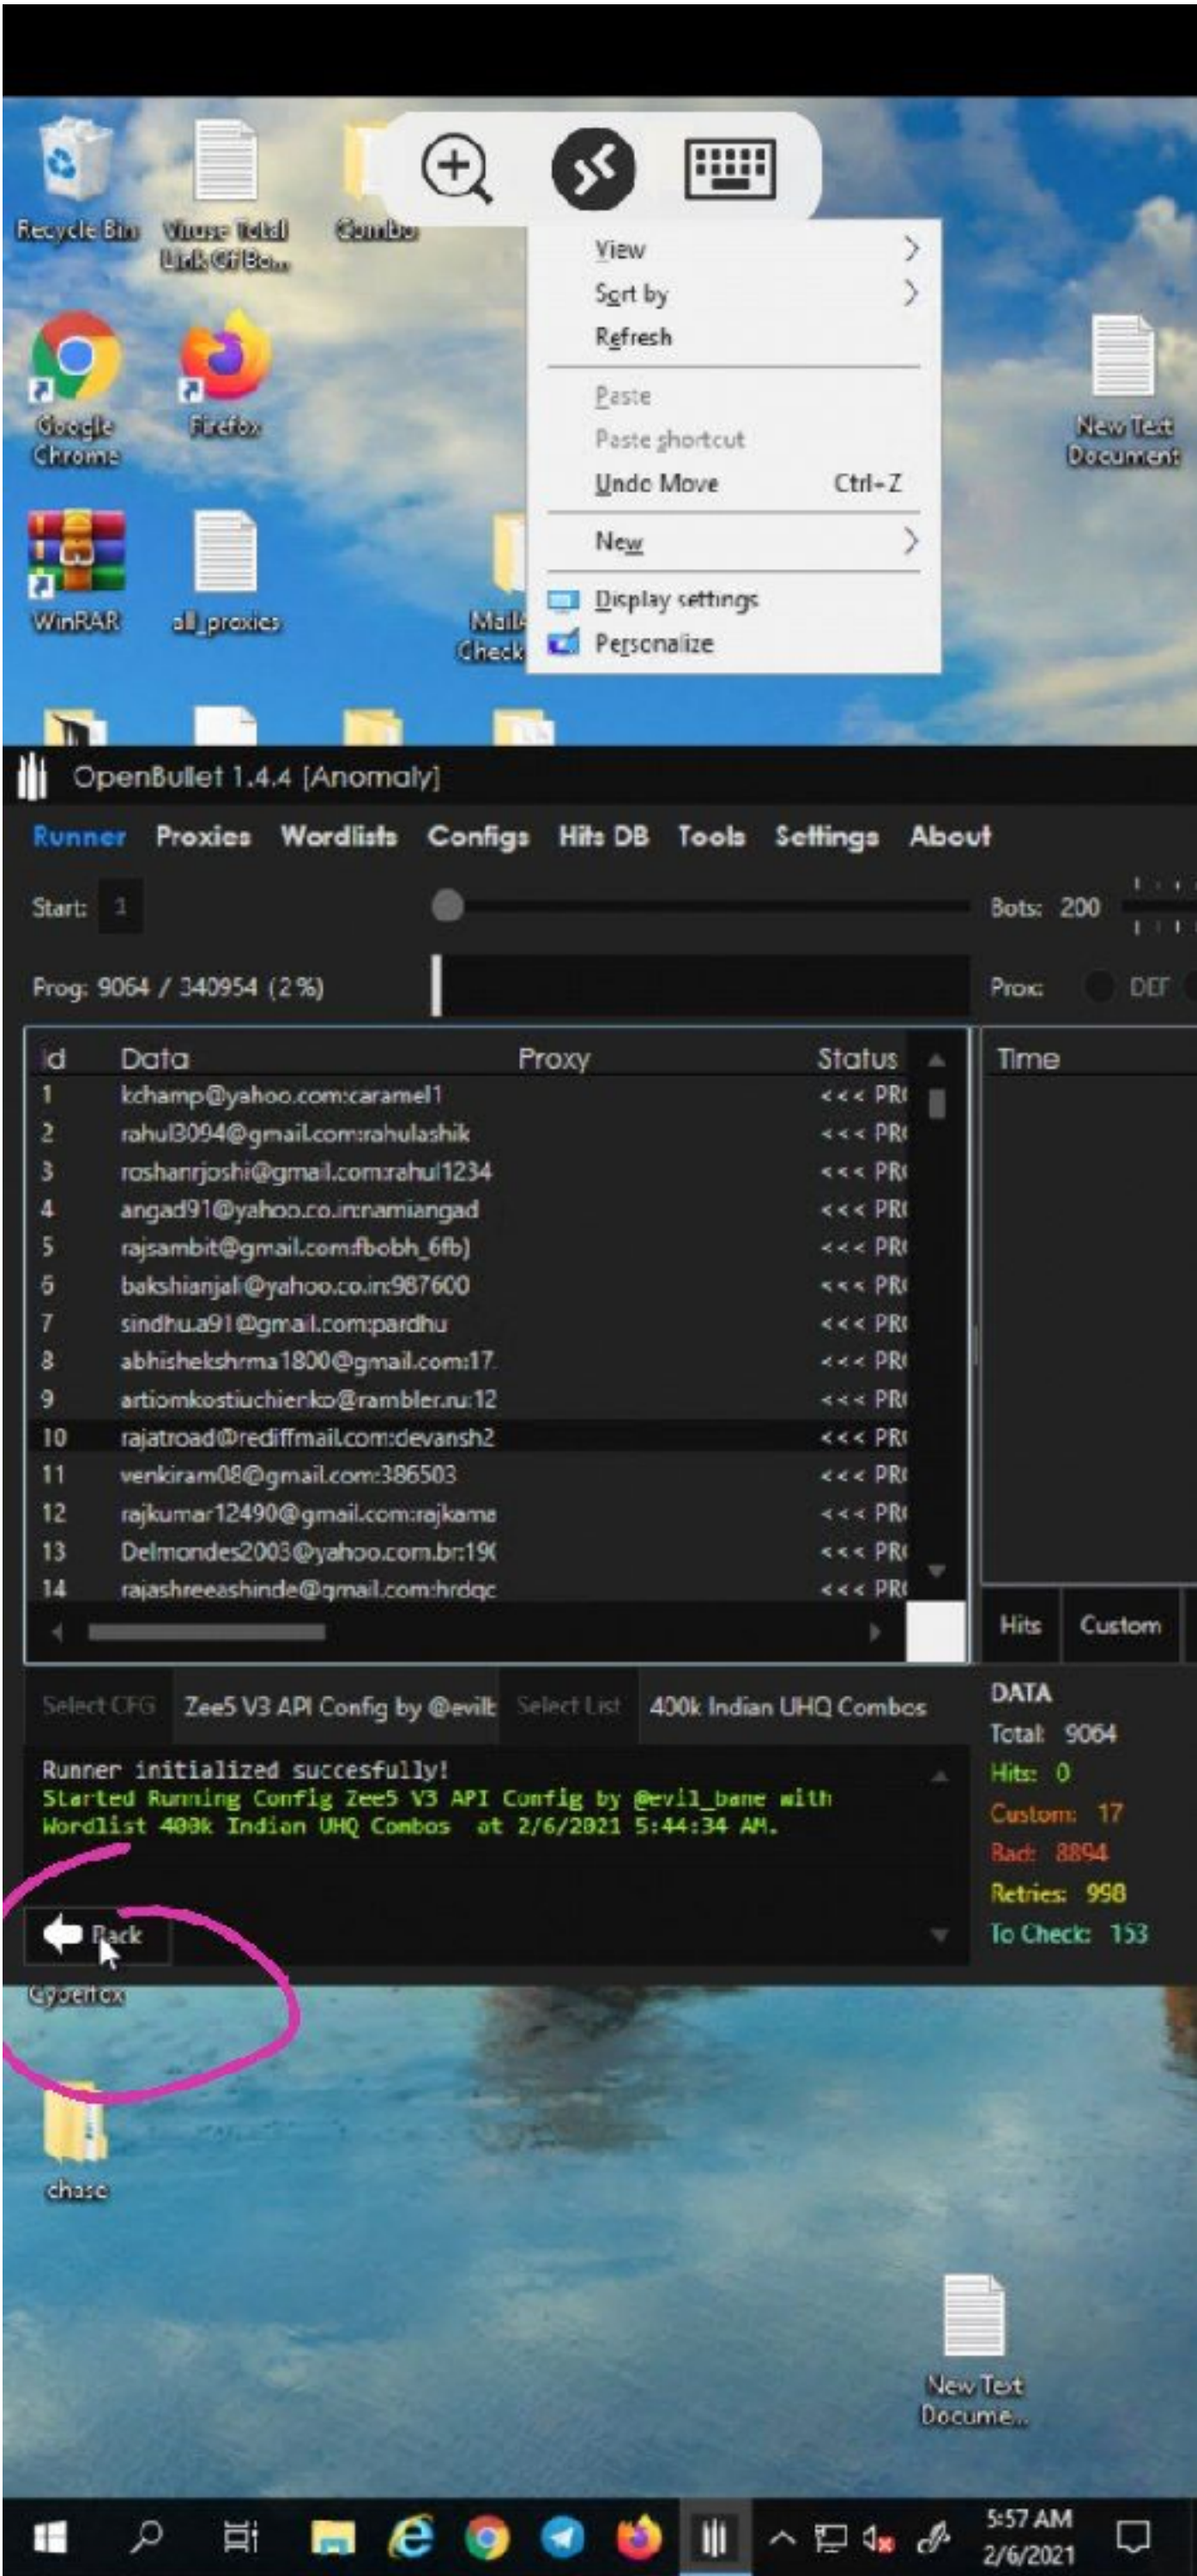

When This Will Get Full Then It Means Your Combo Is Checked Completely.

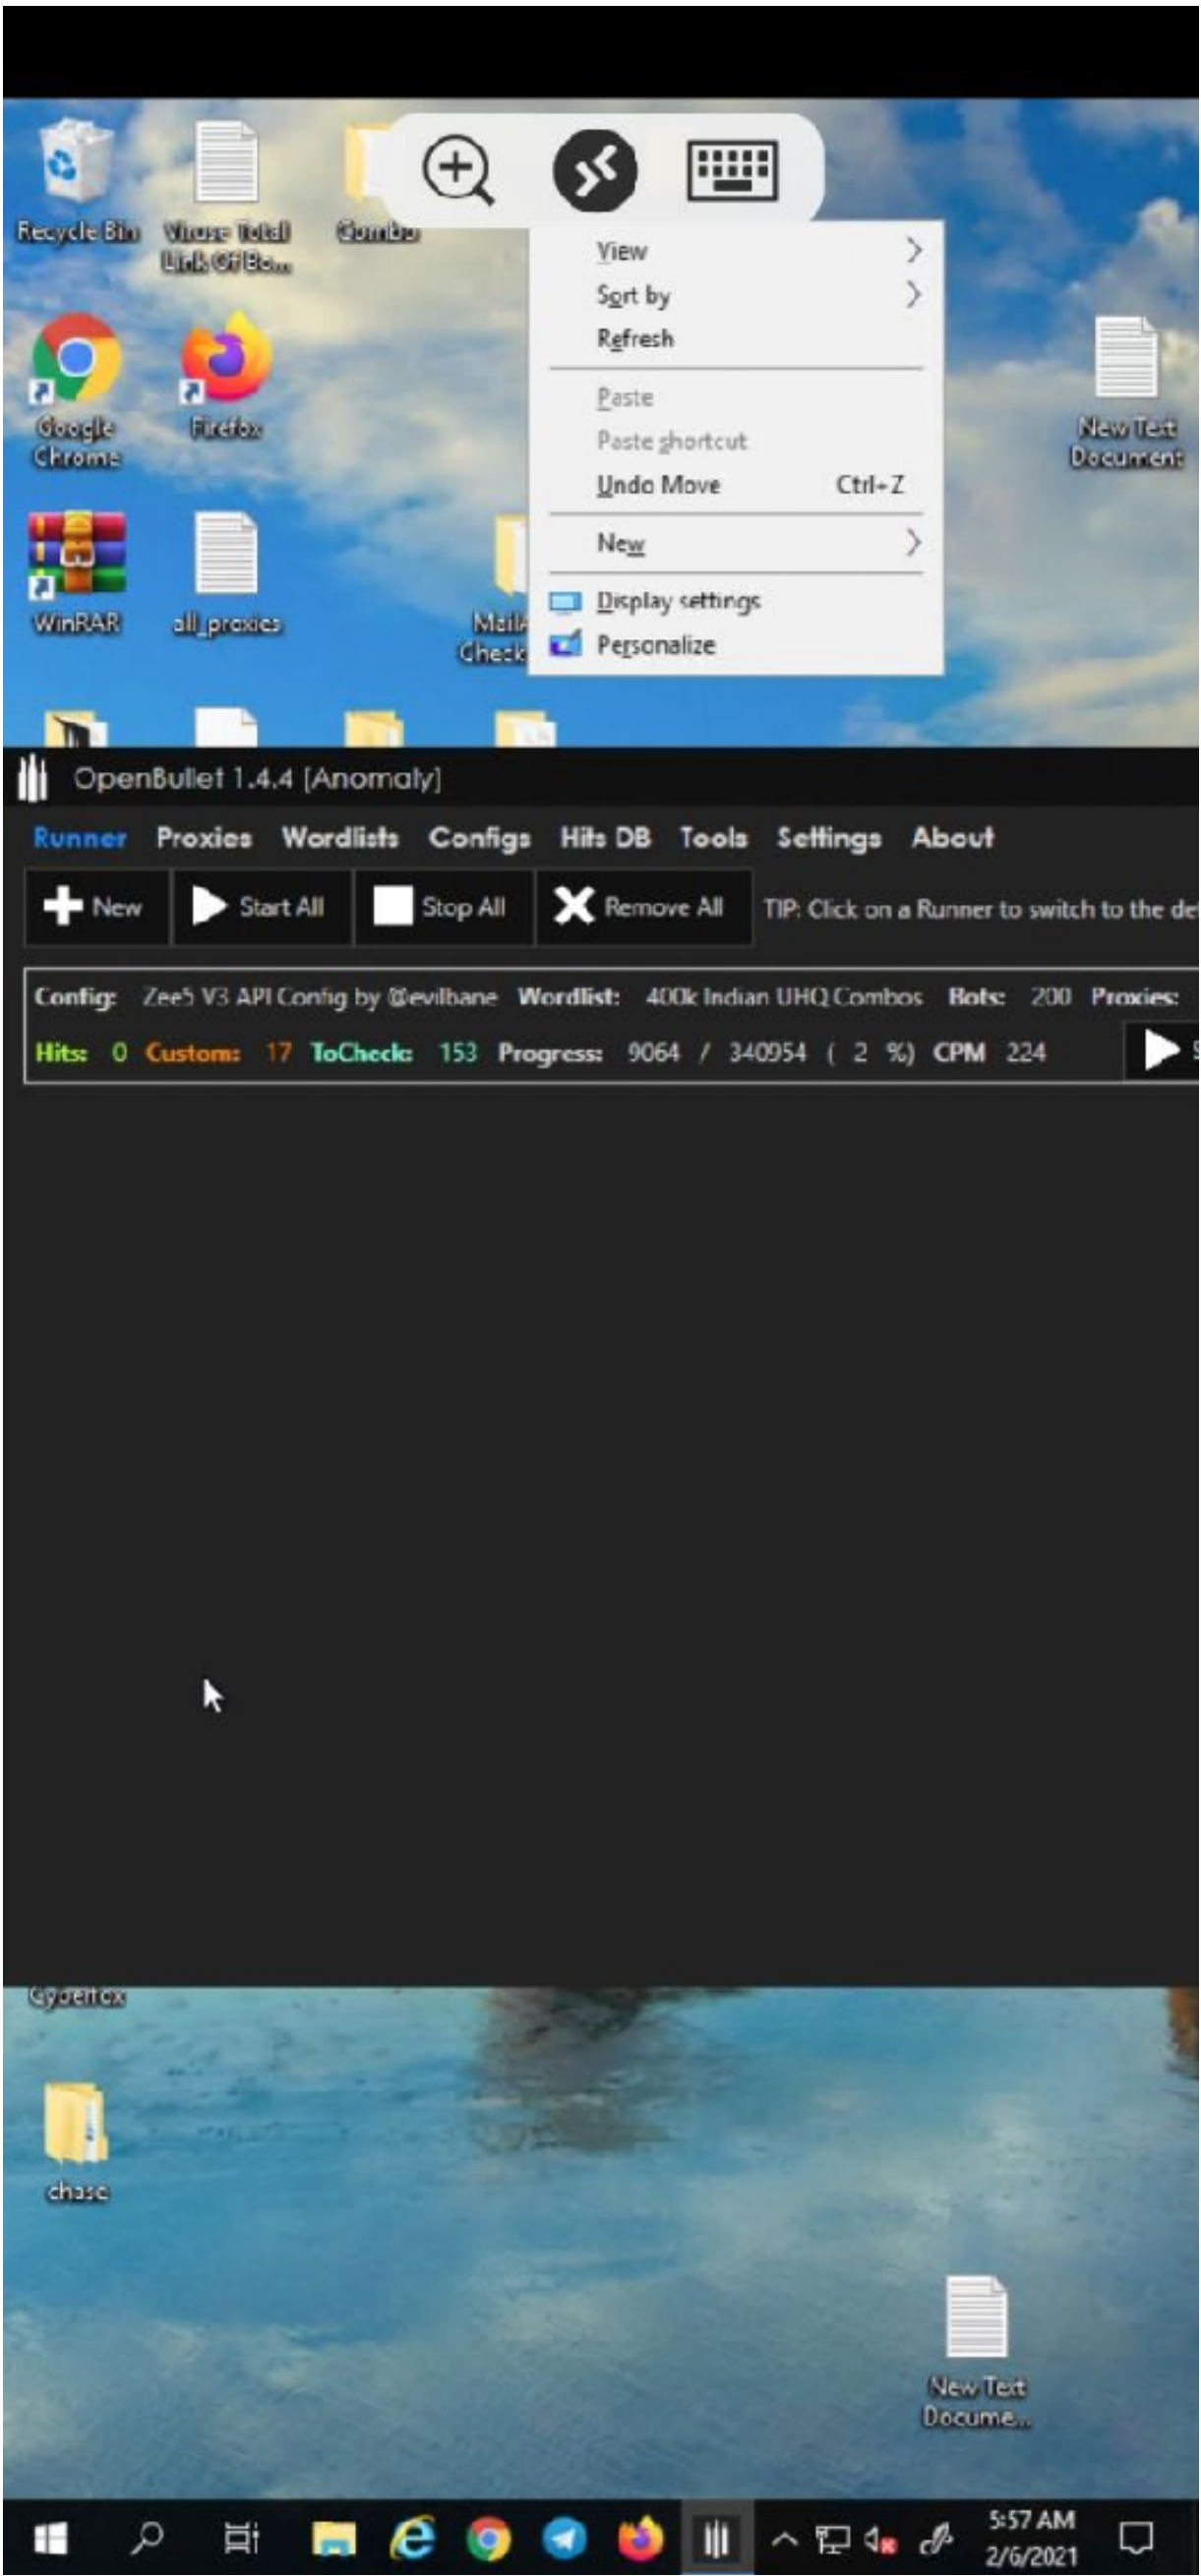

# You Can Select This Back Option To Go Back

And Now Here You Can Again Select New To Crack Multiple Accounts At The Same Time As Per The Capacity Of Your Rdp/ Computer.

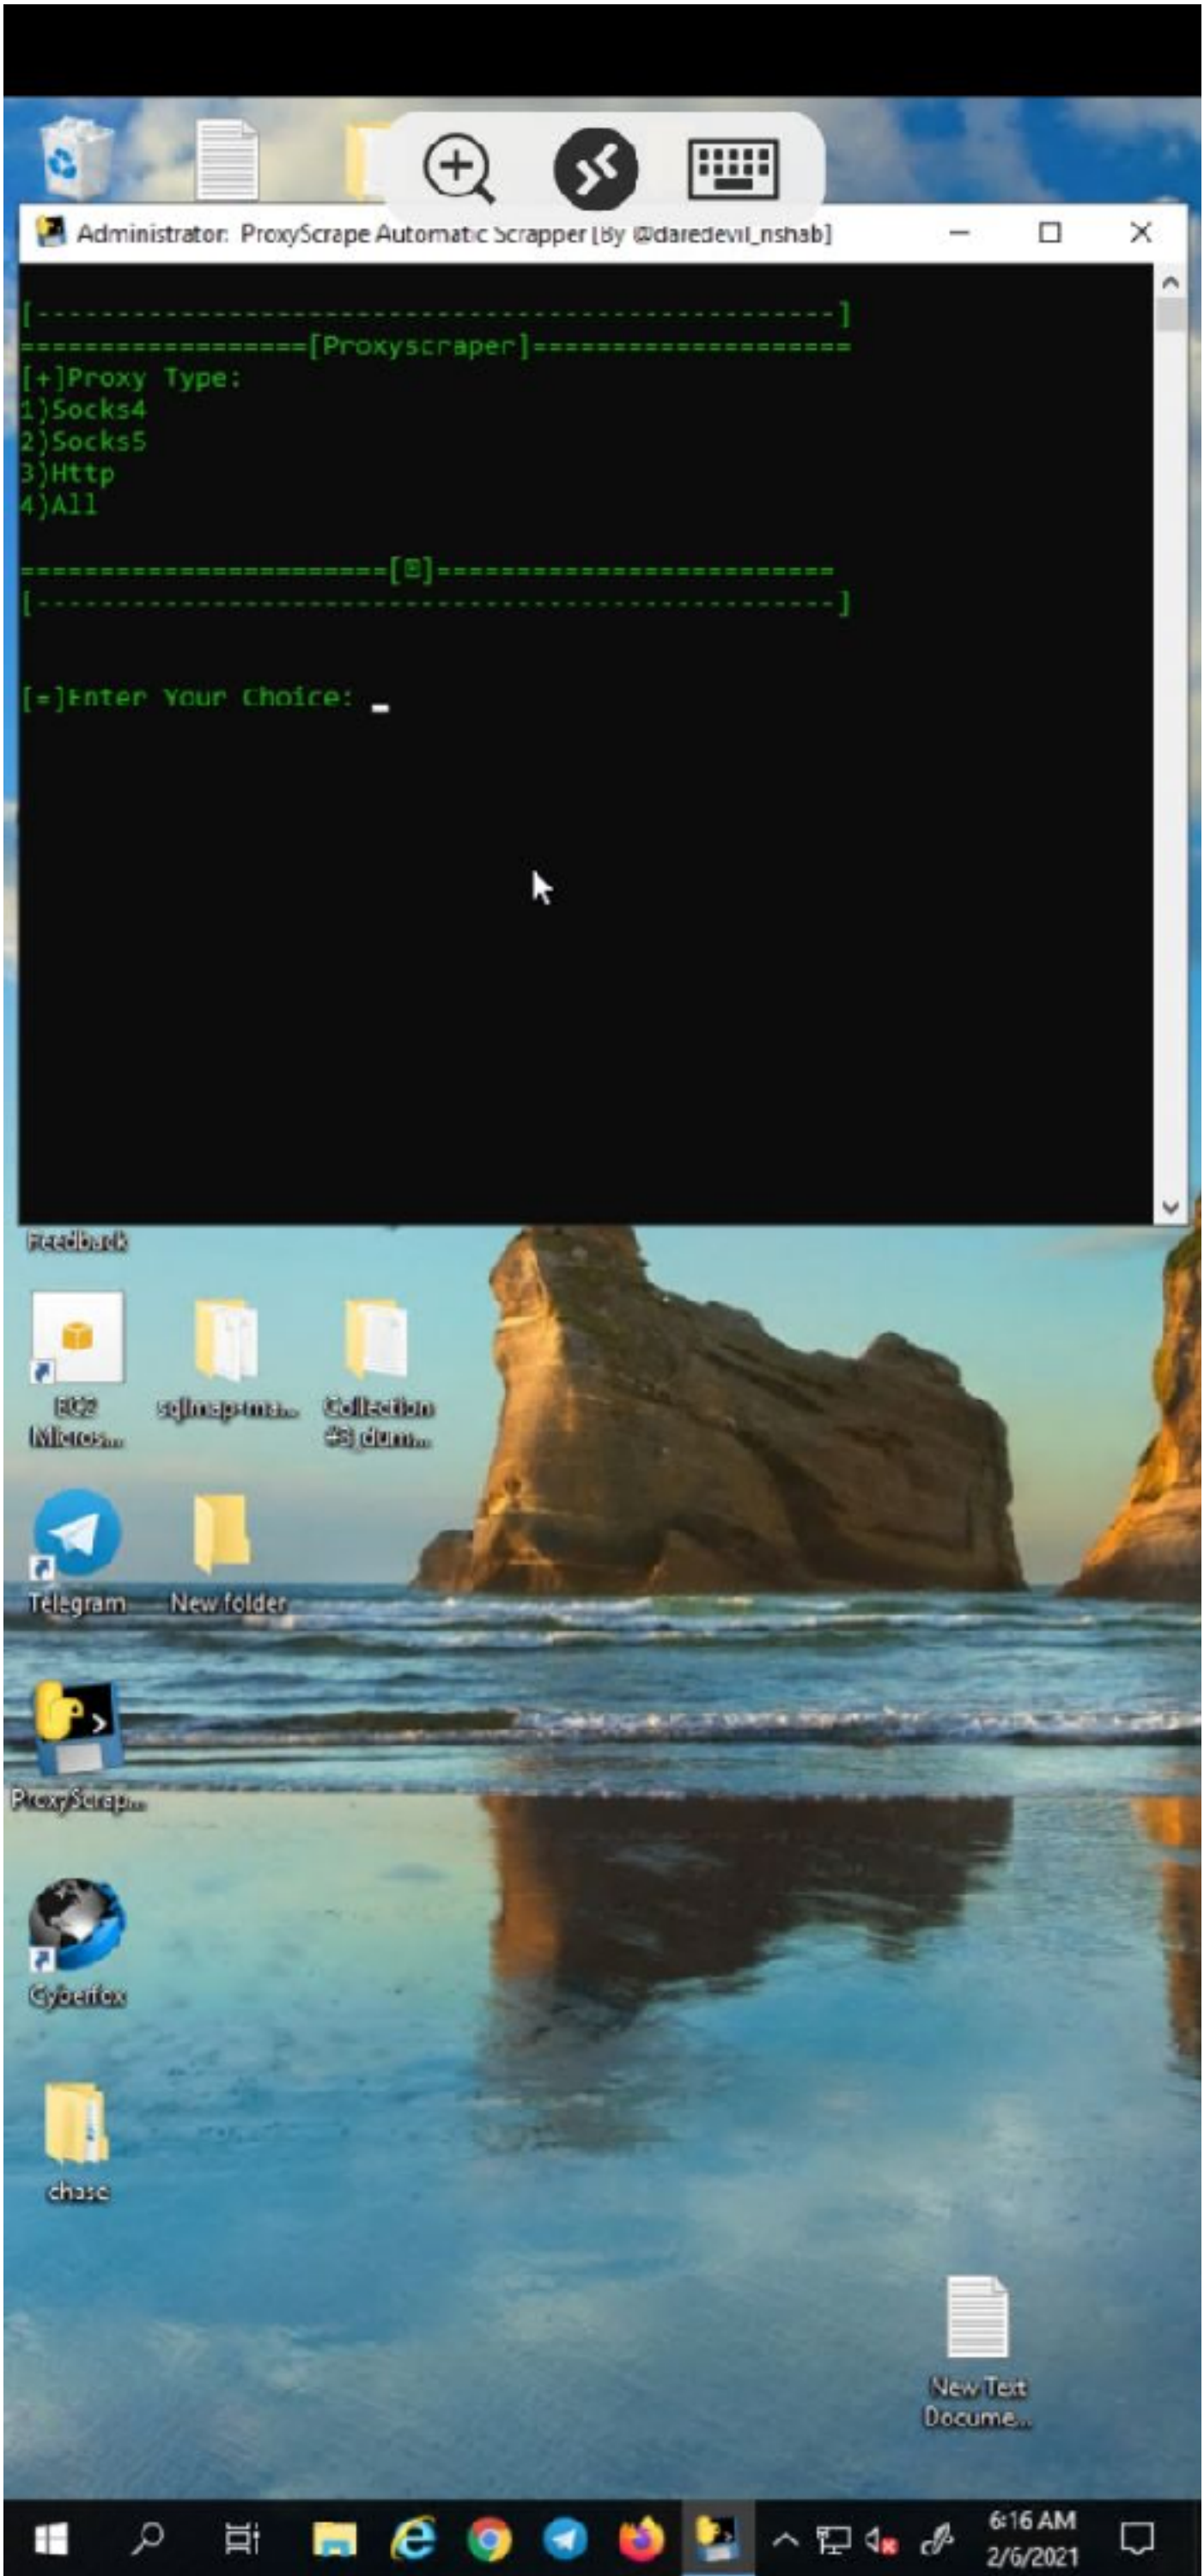

So Till Now We Have Covered How To Crack Proxyless Accounts.

Now I Will Show You How To Use Proxies

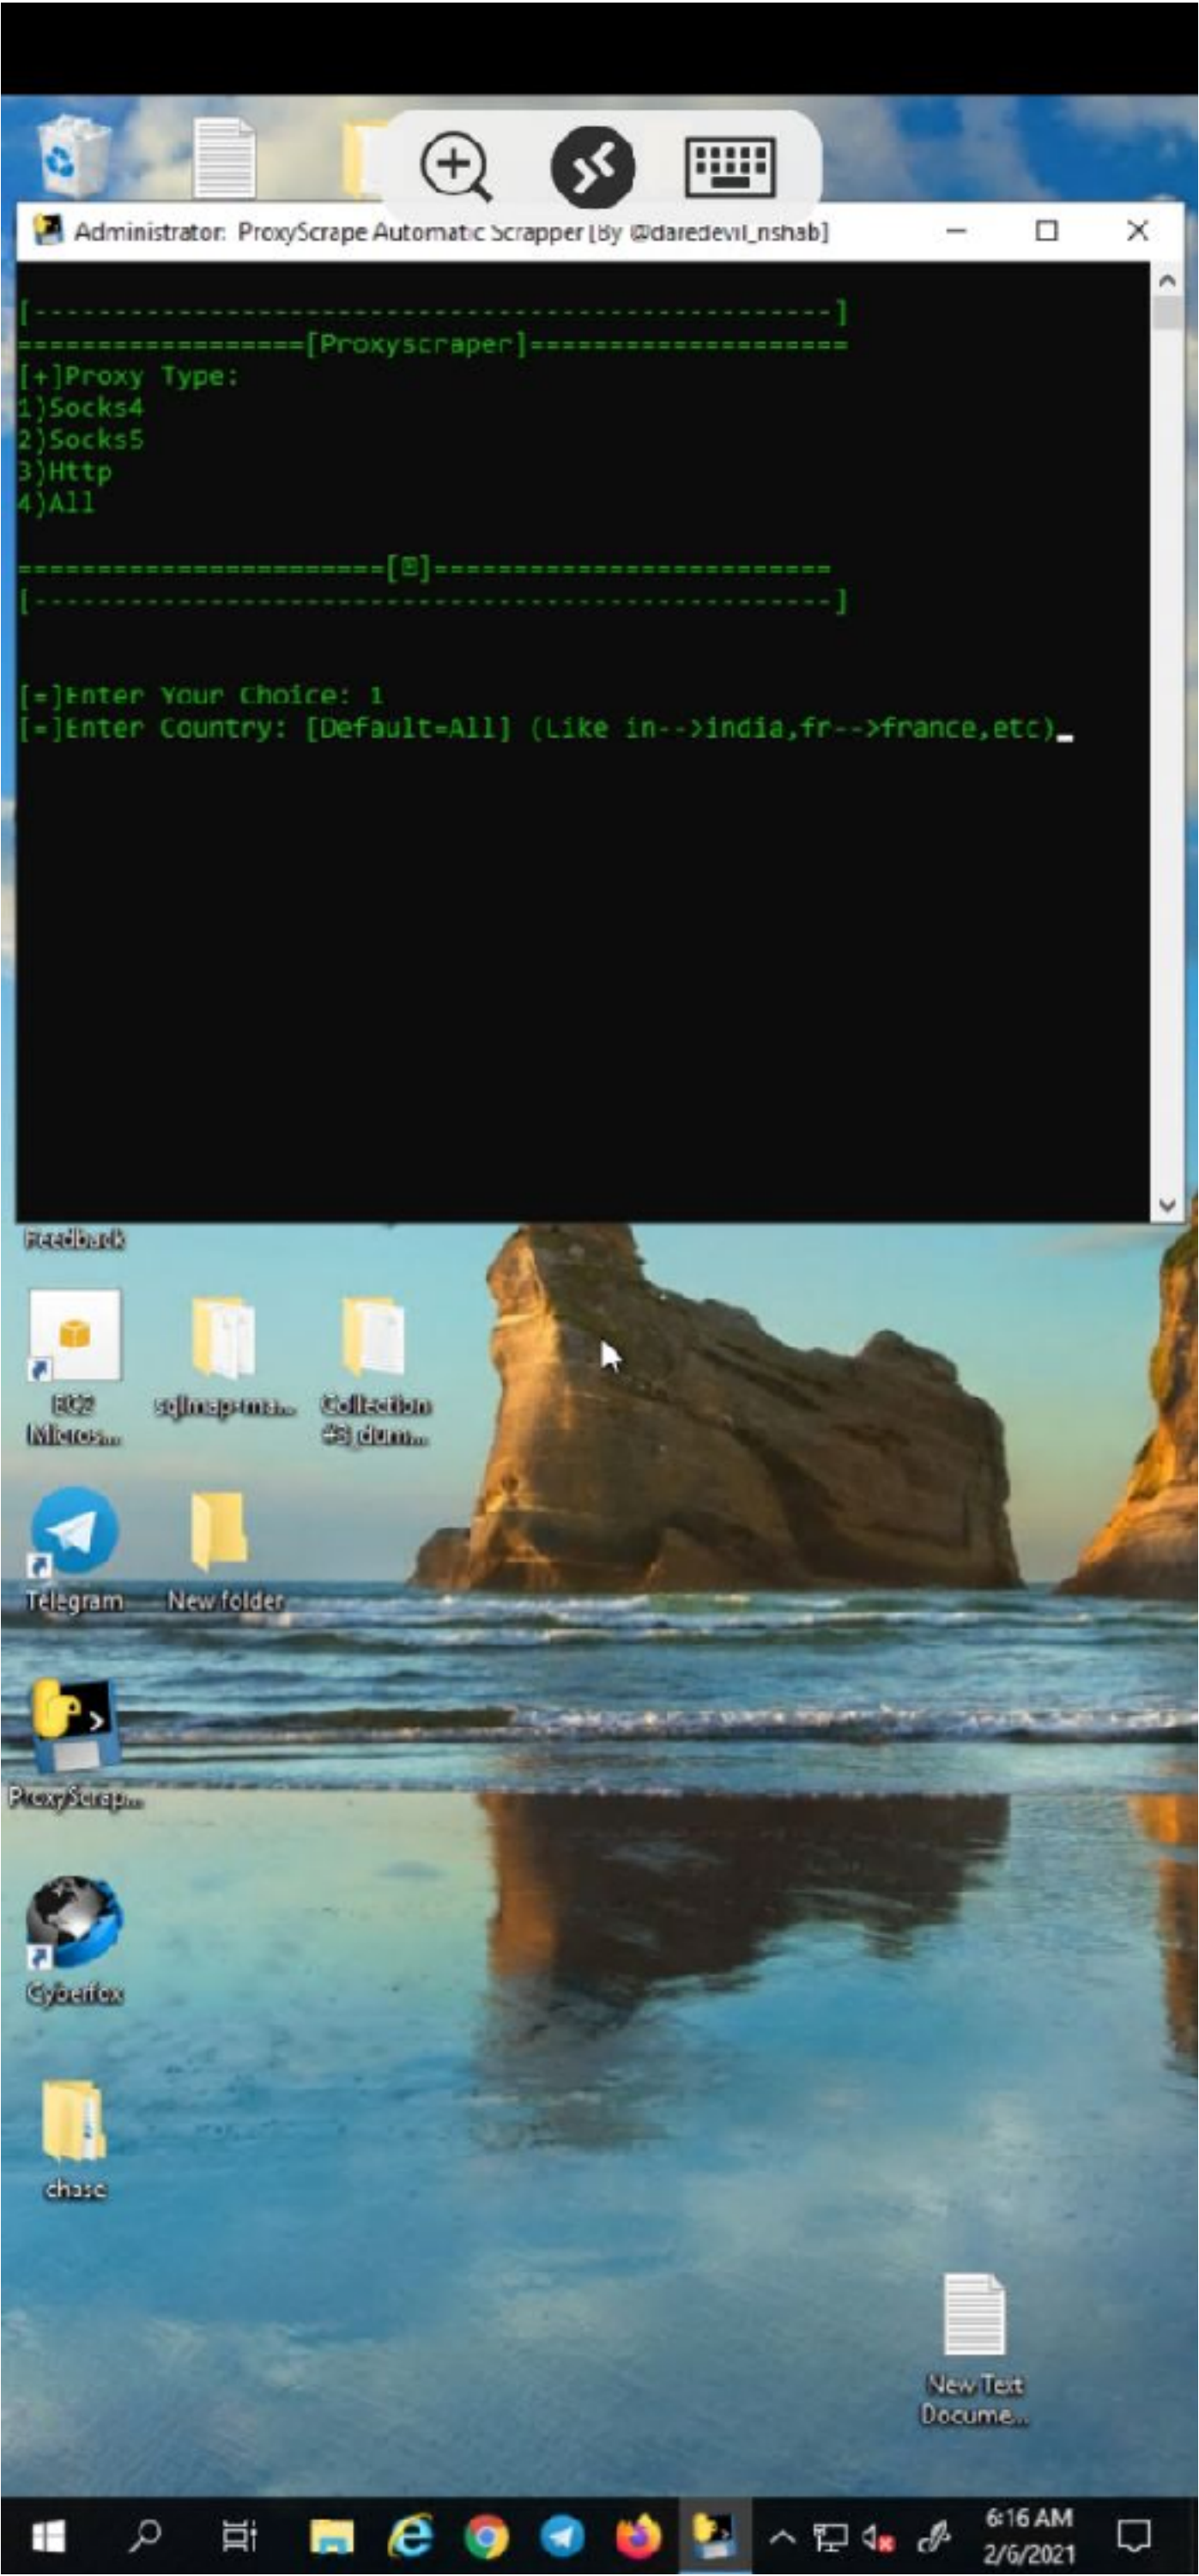

It's Super Easy,Let's Get Started

So I Am Gonna Use My Tool For Fresh Proxies.

# Double Tap To Run This Tool

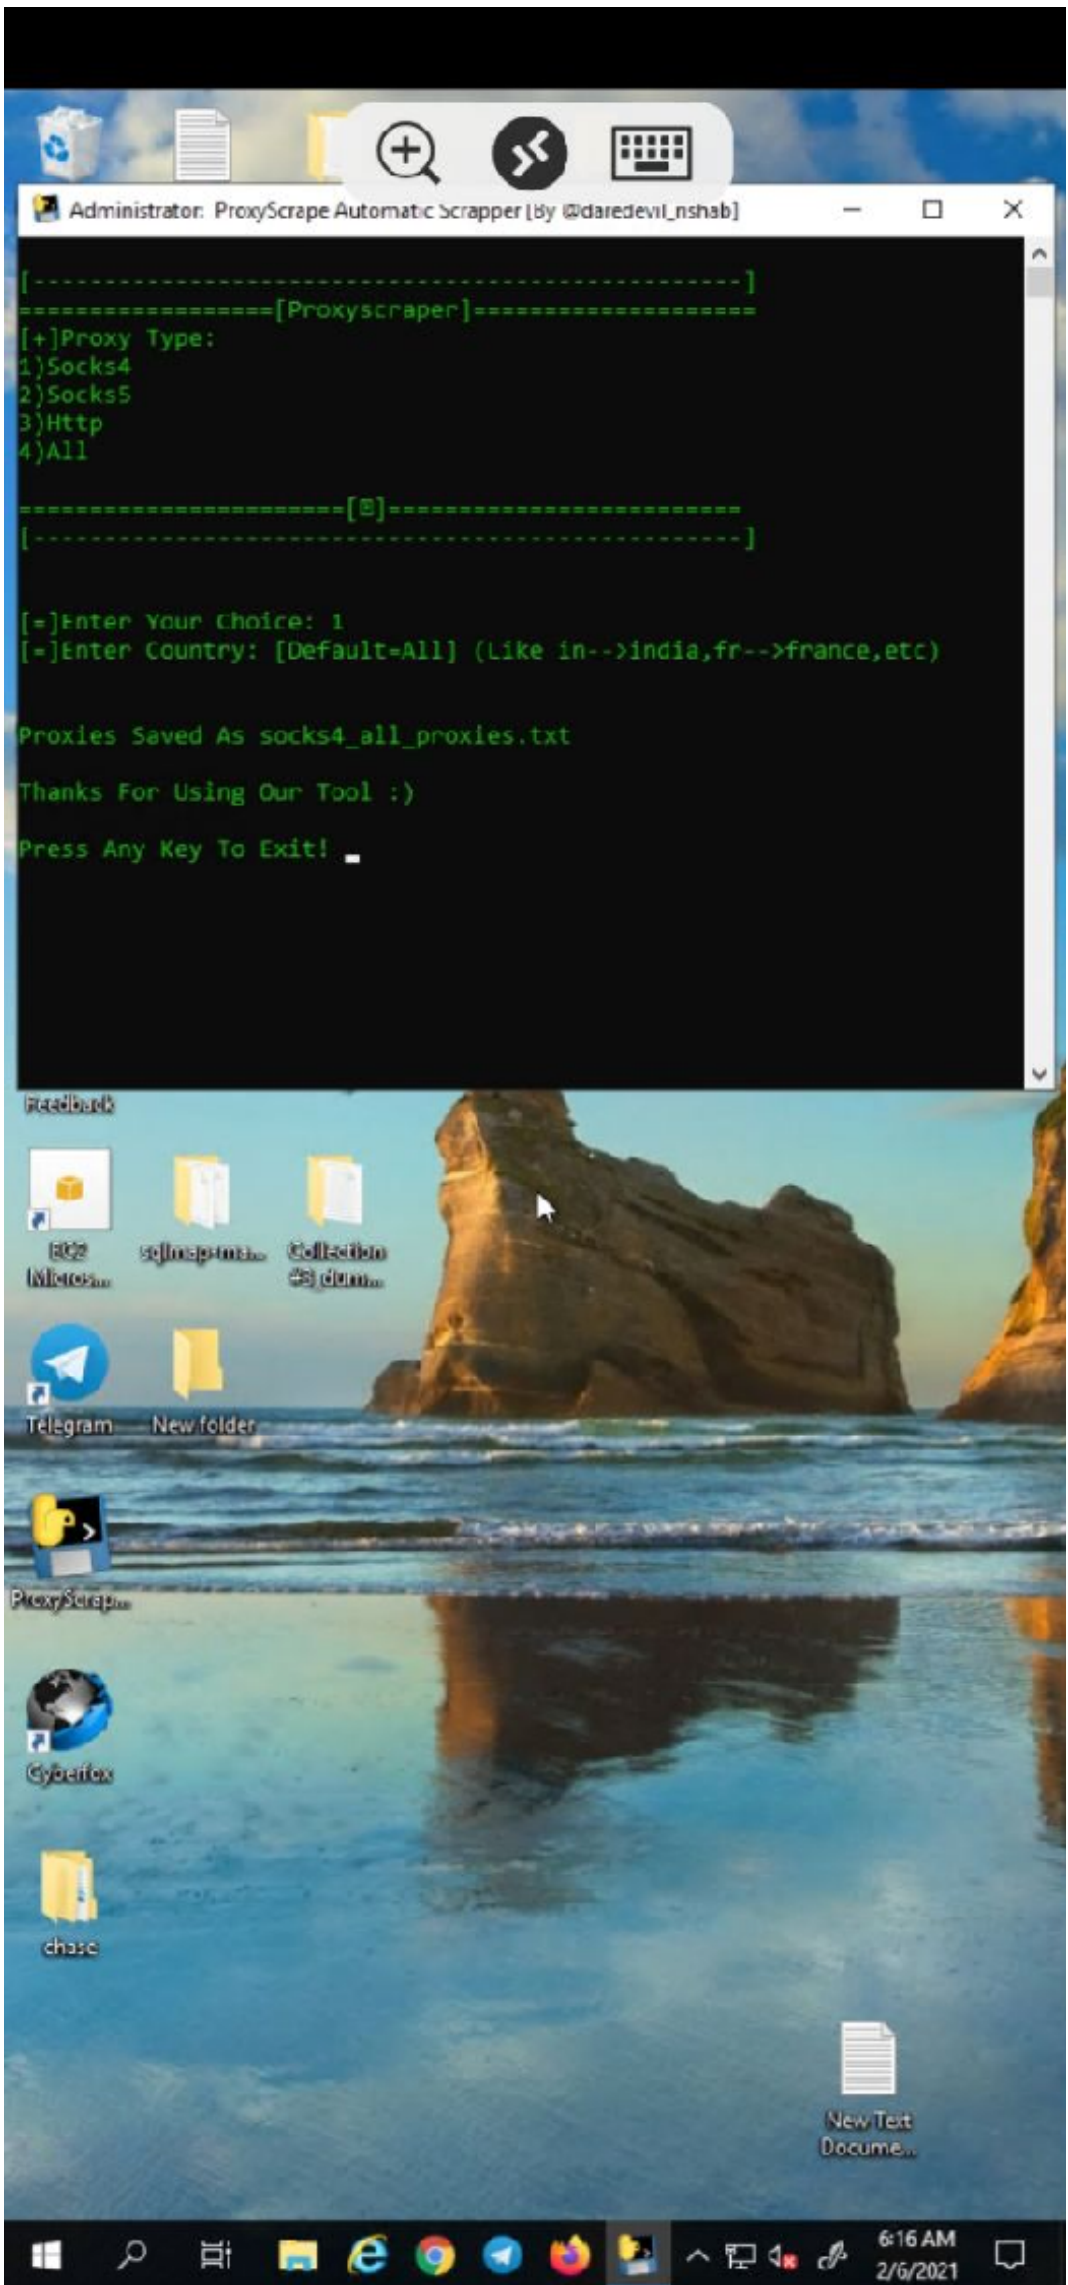

# Select The Type Of Proxies You Want,I Will Prefer Socks4 As It Is Fast

Then Choose The Country Of Proxies You Need,  
Note: It's Not Necessary To Use Indian Proxies With Indian Combo,  
Almost Everytime You Will Use All Counter Mix Proxies,Just In Some Cases We Need Country Specific Proxies

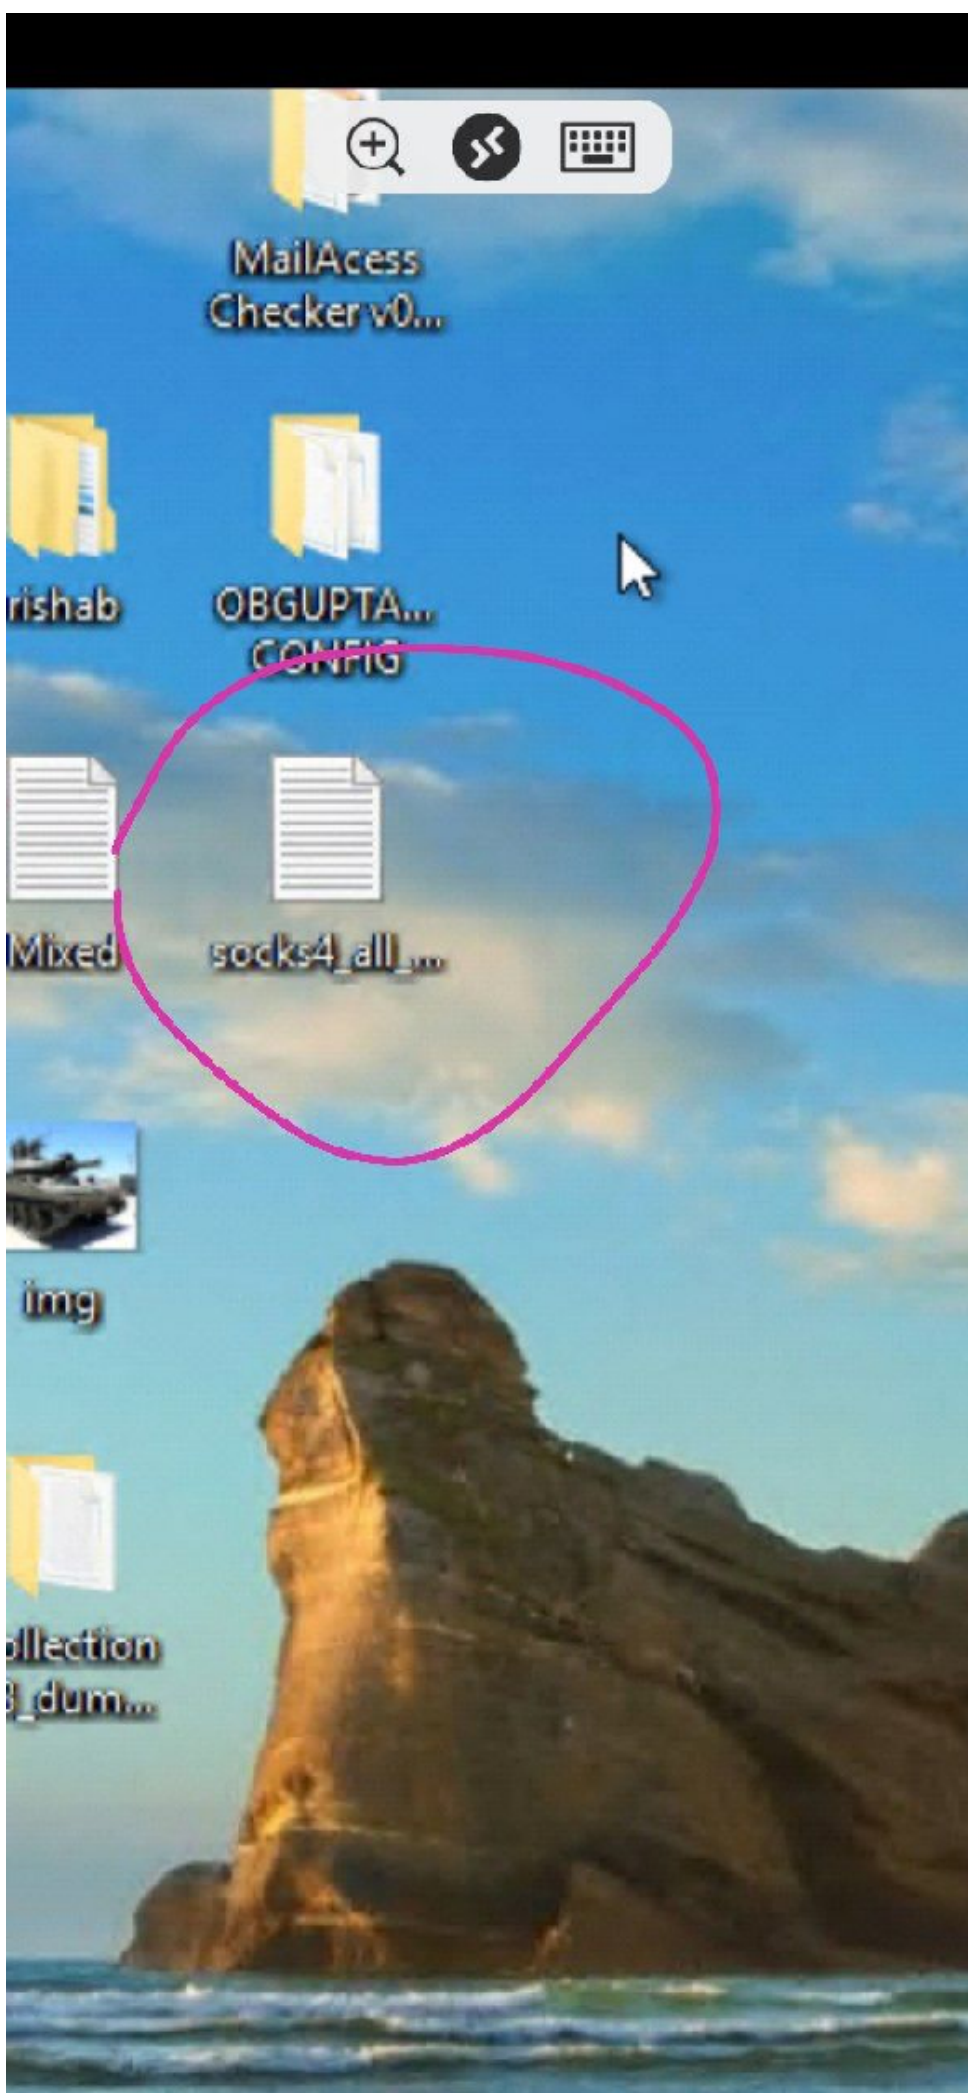

So Just Press Enter Without Entering Anything.

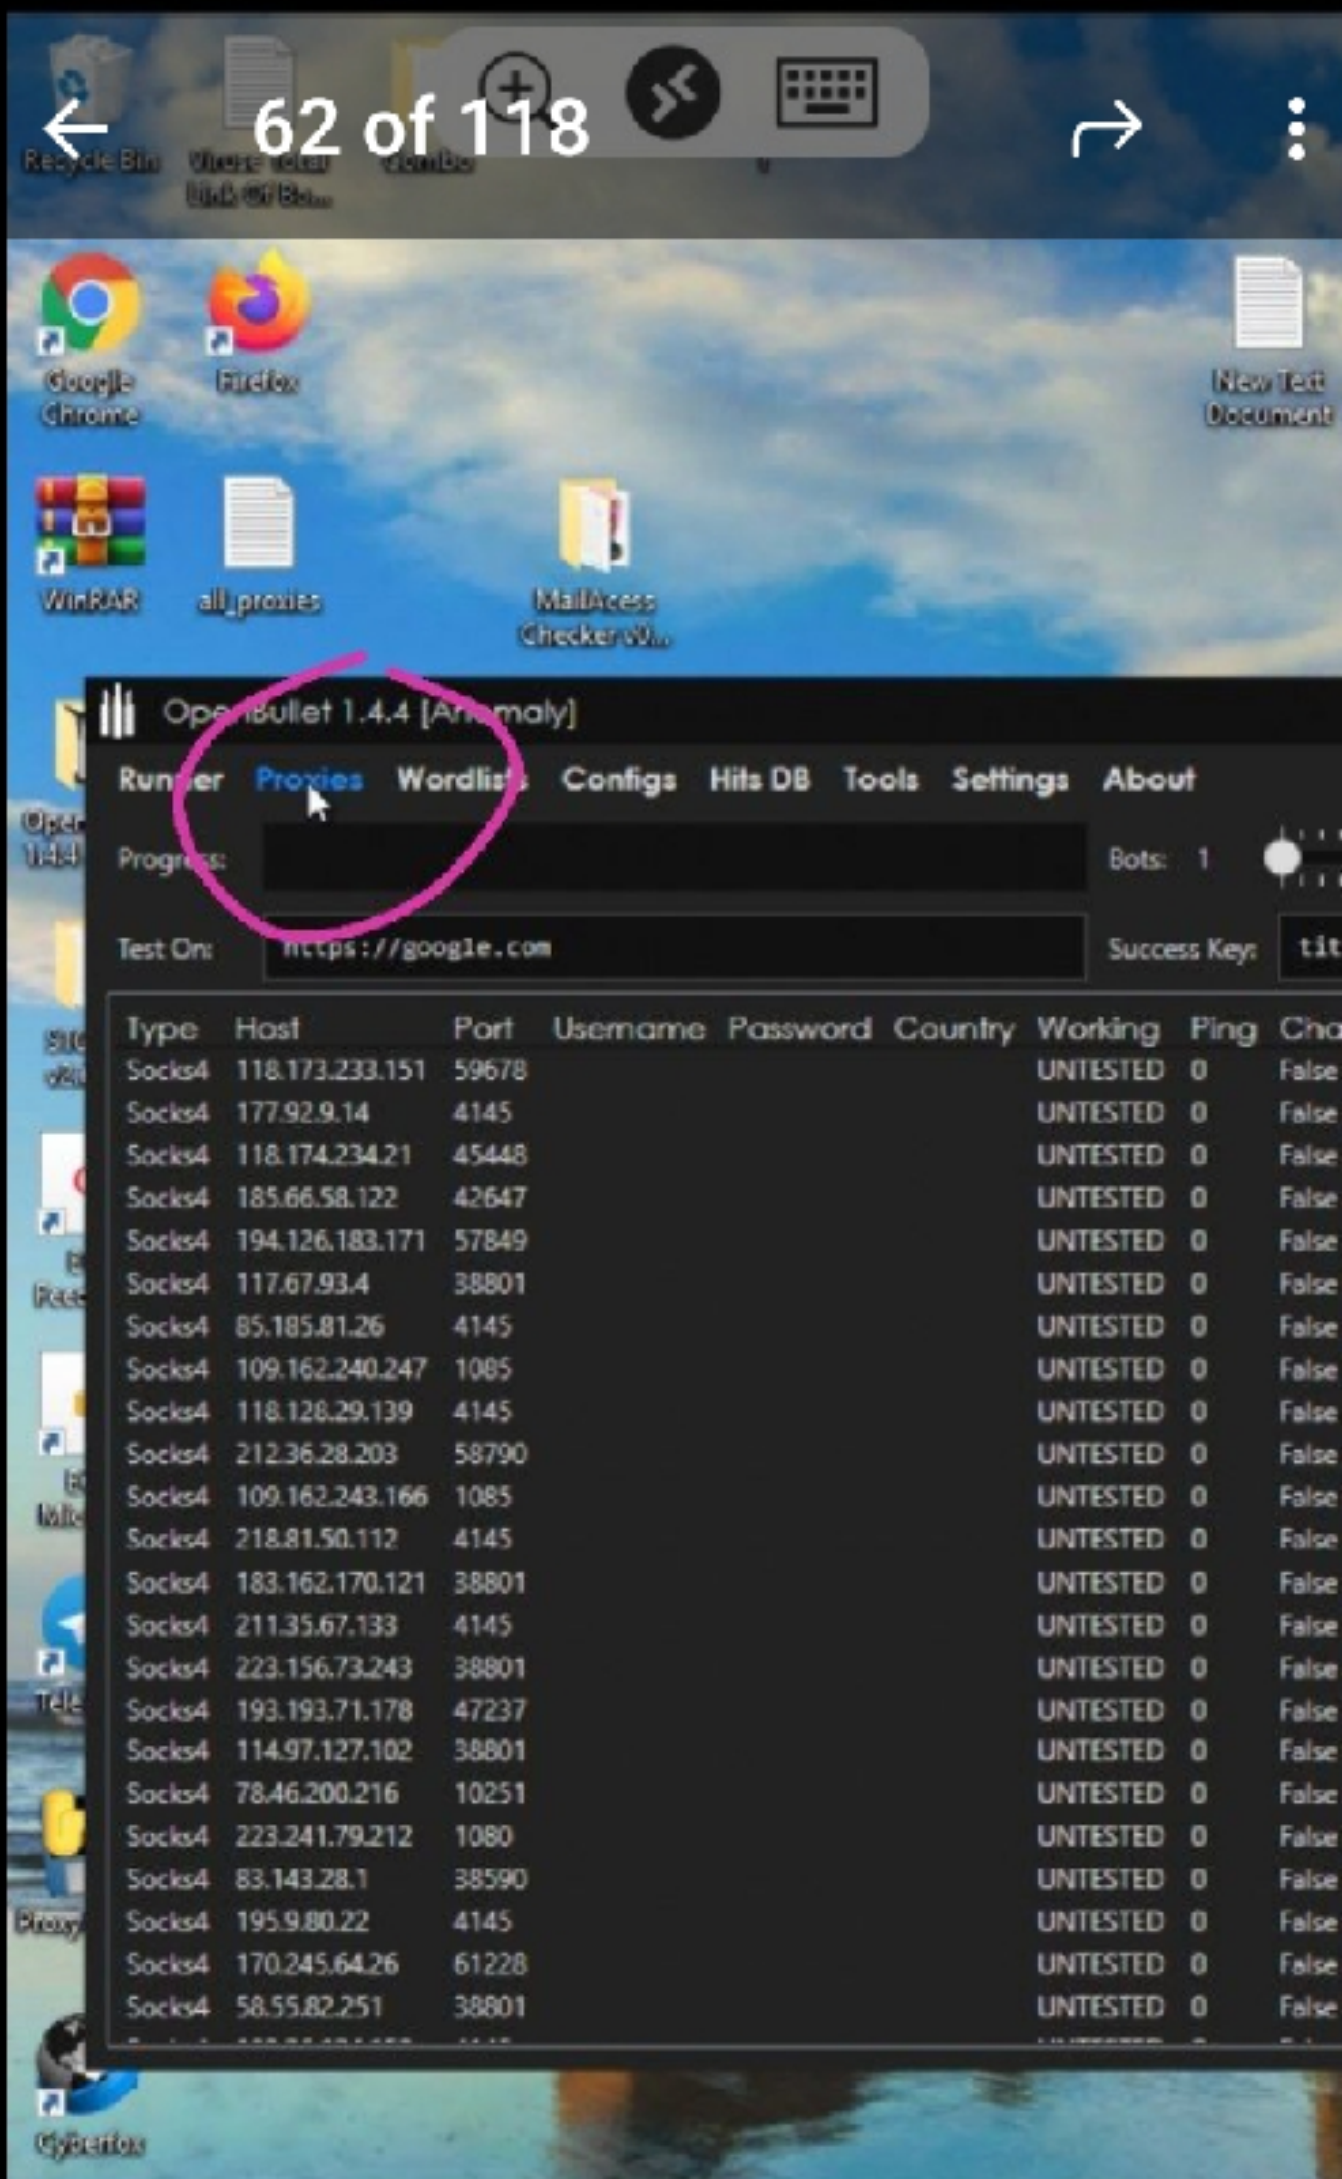

See It's Written Our Proxies Are Saved As socks4\_all\_proxies.txt

Here \_all\_ denotes that the proxies are of all country .

Here Is Our Proxy

Come to this proxy tab

One More Note:  
Configs Which Ends With .anom Will Only  
Work In This Open Bullet.

Configs With Other Extensions Are Not  
Made For This Tool So Ignore Those  
Configs Or Use Their Respective Tools.

So Finally We Have Completed Cracking  
Course,Now We Will Start Private Account  
Making Course Which Can Be Done On  
Android Without Rdp

=====XXXXXXXXXXXXXXXXXXXXX=====

So Now We Will Learn How Private Accounts Are Made ,  
As I Told Earlier There Are Two Types Trial One And Carded One

So We Are Not Gonna Learn Carded Ones Because I Don't Do Fraud With Others Money.

We Will Only Learn How To Make Trial Accounts

So Firstly Let Us Discuss The Methodology Behind It,

Firstly We Go To Any Site Which Gives Us Trial Like Amazon Prime,  
Then We Register An Account There With Fake Details .

Then We Put A Fake Credit Card Detail That Seems Real To The Website.

And Hence The Website Provides Us There Free Trial As Per There Rules ,Like Amazon Prime Provides 30Days Free Trial.

Note: You Can't Get Free Trial Without Providing Your Credit Card Details To Them.

This Was Just A Methodology ,Now Let Me Clear Some Doubts,

Any Random Credit Card Will Not Work,It's Not That Easy.

You Will Have To Provide A Credit Card Which Seems Real Then Only Site Will Accept That Card.

Some Terms:

CC==>Credit Card

Bin==> Bank Identification Number,It's The First 6digit Of Credit Card.

So You Will Get Many Telegram Channels Who Provides Latest Bins Time To Time For Many Sites.

Example bin:

 BIN PRIME VIDEO  

 |Bin: 455788050xxxxxxx

 |Fecha: 03/23

 |Cvv: Random

 | LINK: <https://www.primevideo.com/>

 | SIN VPN

 |Address: calle Málaga xxx

 |City: Madrid

 |State: Madrid

 |ZIP CODE : 28001

 |Phone: 9826xxxx

 SEND SCREENSHOT TO  
@INDIANSBINNERSBOT IF GOT  
SOMETHING.... 

Bins Do Not Work For Lifetime,They Gets Patched As Much As People Use Them To Create Accounts.

So Let Me First Tell How To Use This Bins To Creata Credit Card.

CC Generator:  
<https://namso-gen.com/>

Set The Expiry Date As Per Given Along With The Bin,  
And If Nothing Is Given Or Random Is Given Then Leave It Default Only.

@TeamBinnersOfficial  
@BinsCafe  
@ErrorBinnersOfficial  
@BinsZone  
@indians\_binners  
@IMPERIAL\_BINS

Requirements For Making Trial Accounts:

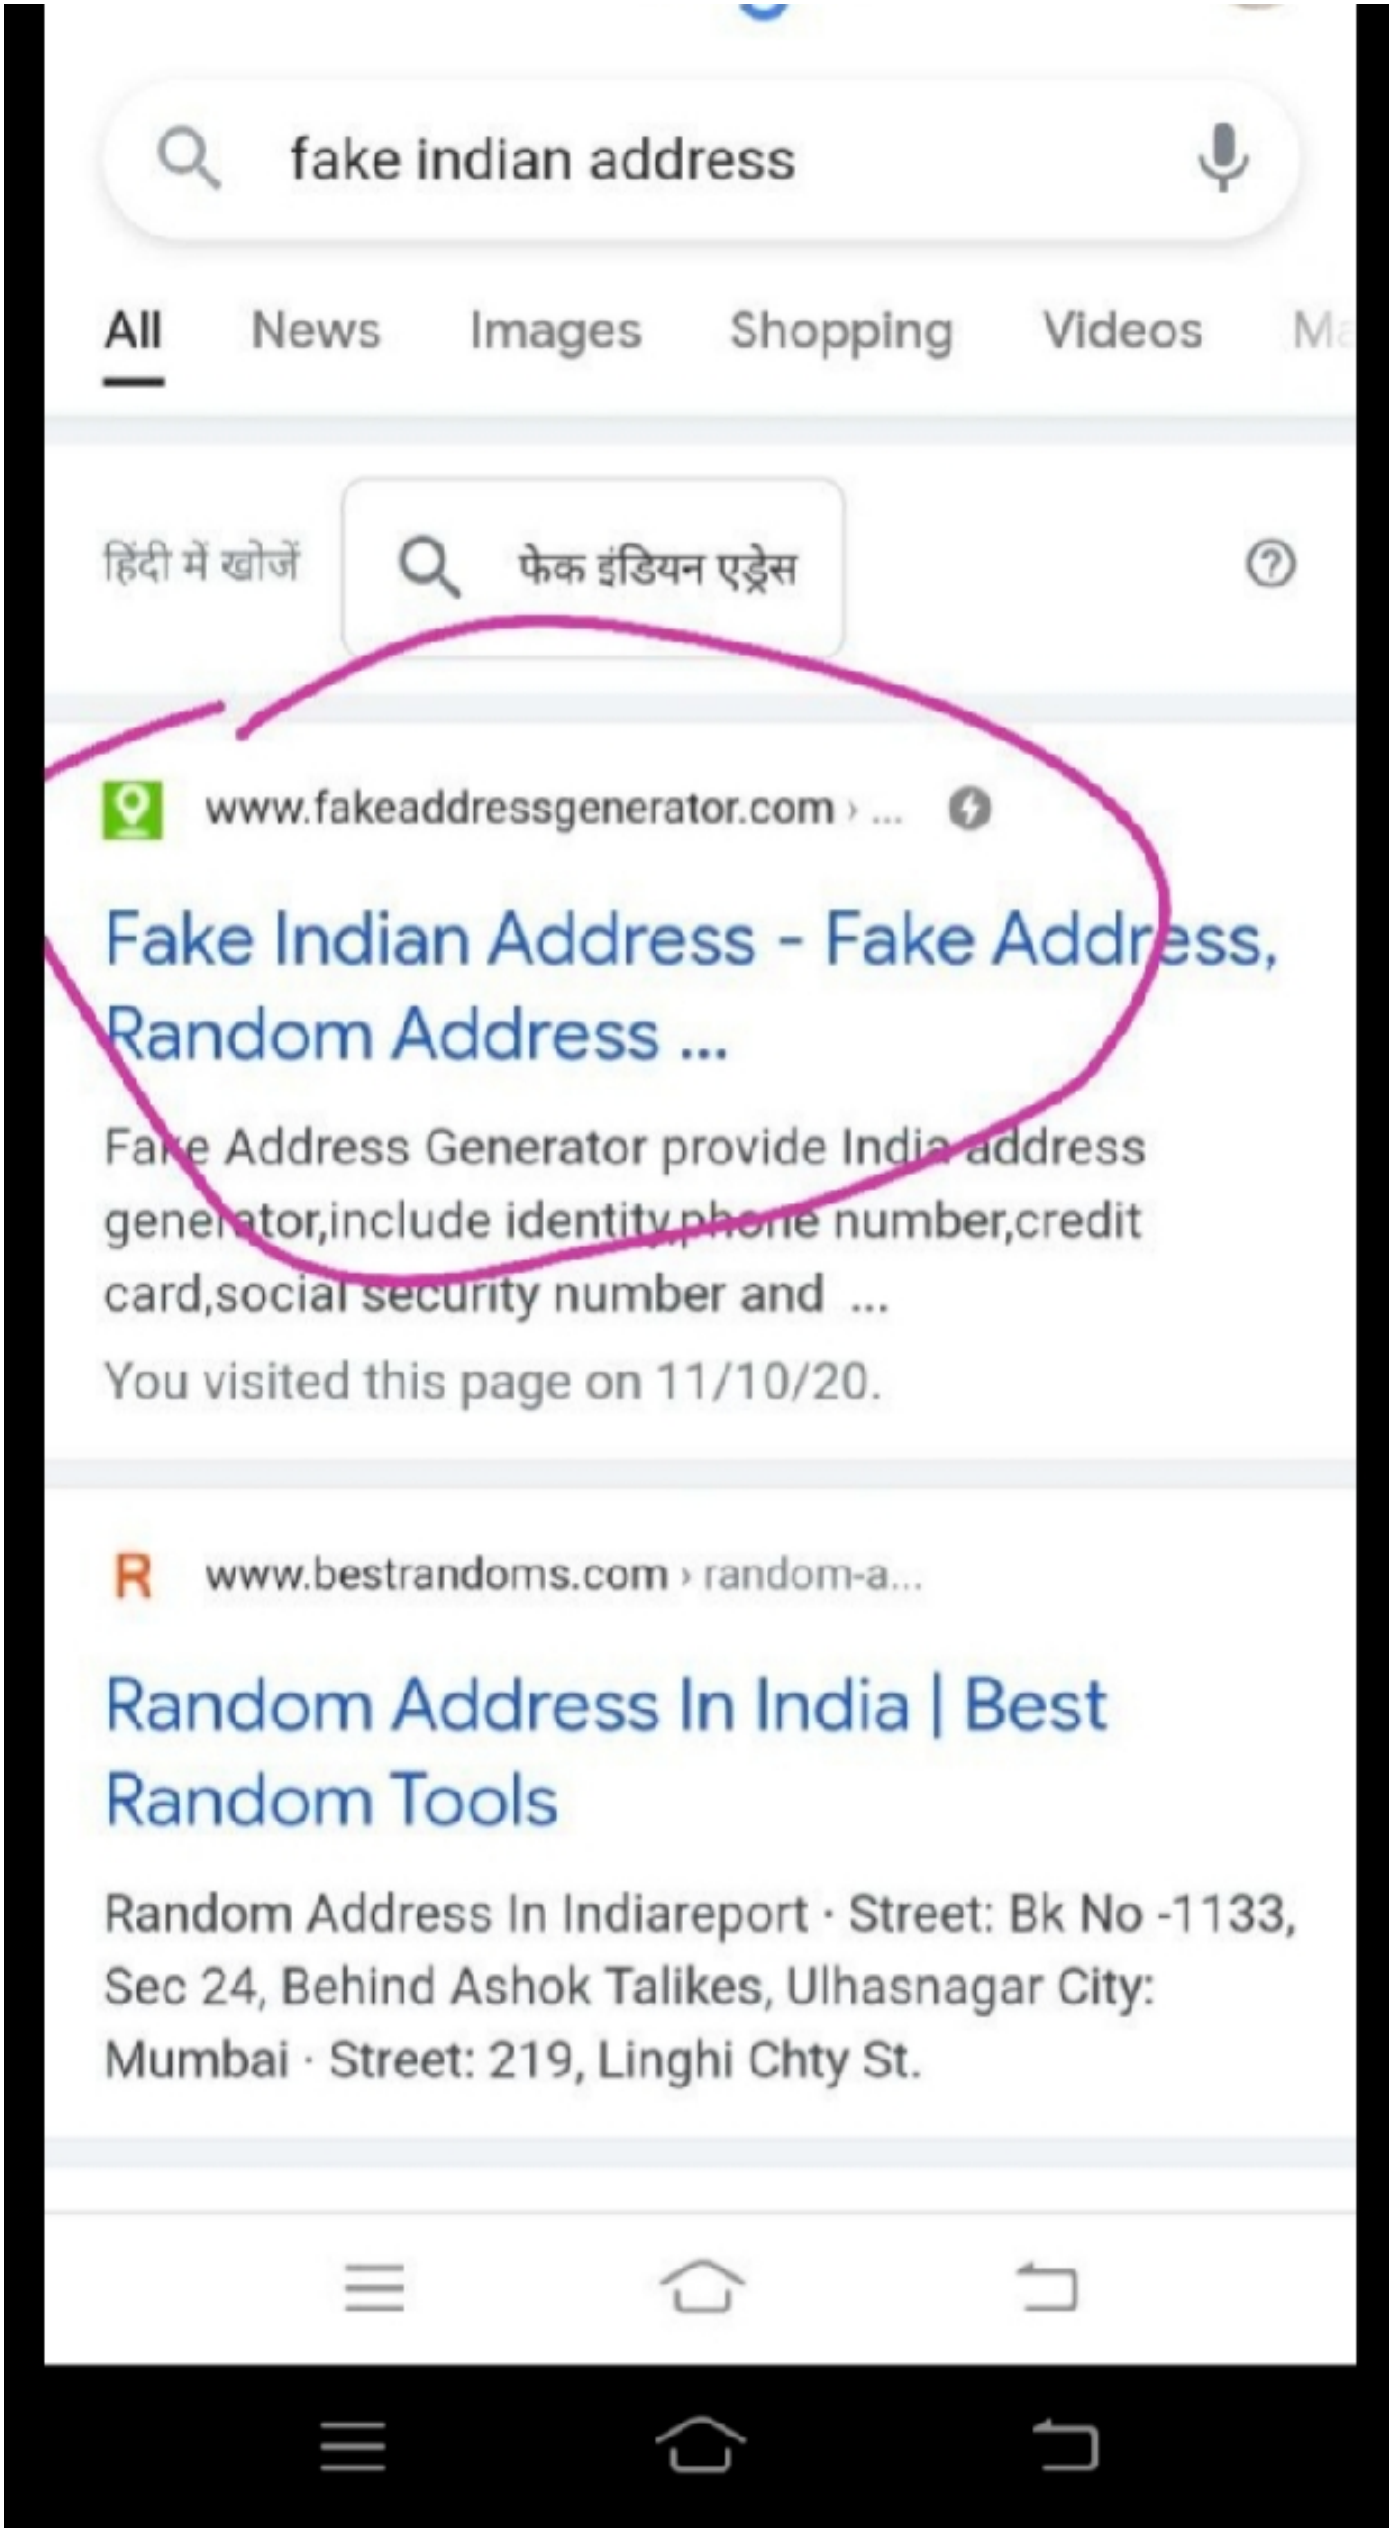

- 1)Phone/Laptop
- 2)Good Browser
- 3) Bin(Working,Not Patched One)
- 4) Gmail (Optional)
- 5)Fake Numbe (Optional)
- 6) Premium VPN

Site For Unlimited Temporary Emails:

<https://temp-mail.org/en/>

You Can Use Them In Many Sites To Create Accounts.

For Fake Address Just Seach On Google Like This And Always Use This Site,You Can Search For Fake Address Of Any Country As Per Your Need.

# We Can't Make Trial Accounts With Fake Details On Normal Browser Like Chrome,

Browsers We Can Use Are:

1)Firefox Focus (Not Just Firefox)

Link:

<https://play.google.com/store/apps/details?id=org.mozilla.focus>

2)Brave Browser

Link:

<https://play.google.com/store/apps/details?id=com.brave.browser>

3) Duck Duck Go

Link:

<https://play.google.com/store/apps/details?id=com.duckduckgo.mobile.android>

Note:

1) "IP/Country" Given Along With The Bin Is The Location To Which We Have To Connect Our VPN While Making Our Account Else Our Cards Will Not Work.

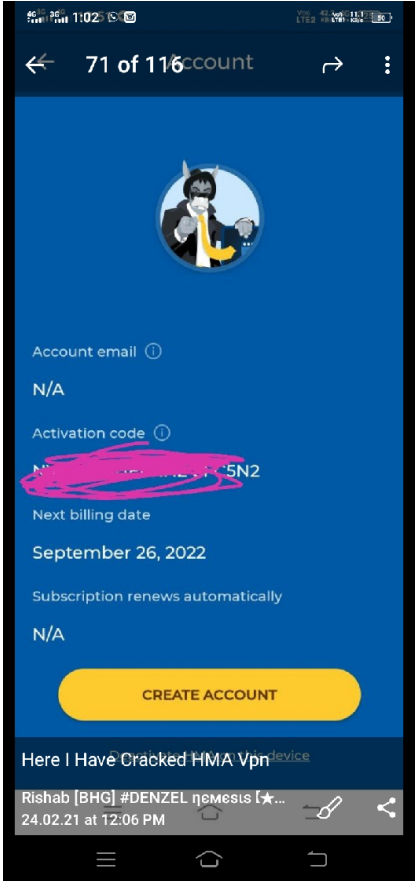

2)If Fake Address Is Given Along with The Bin Then You Have To Use That Address Only While Entering Billing Details.

And Replace xxxx By Random Number  
Like If Fake Address Is Street xx  
Then We Can Put  
Street 56  
Street 78  
Etc

Also Free VPN Will Not Work Many Times ,So You Will Need A Premium VPN Like HMA Vpn , Vypr VPN,Etc

You Can Get Those In Any Channel Or You Can Crack Yourself.

Here I Have Cracked HMA Vpn  
And Duck Duck Go Browser

For Fake Number:

<https://drive.google.com/file/d/1-RNdtrAemgN-wgrRZce95HJUUb03PfBp2/view?usp=drivesdk>

Install This App(TextNow) And Put Country Code As 712,423,528,etc

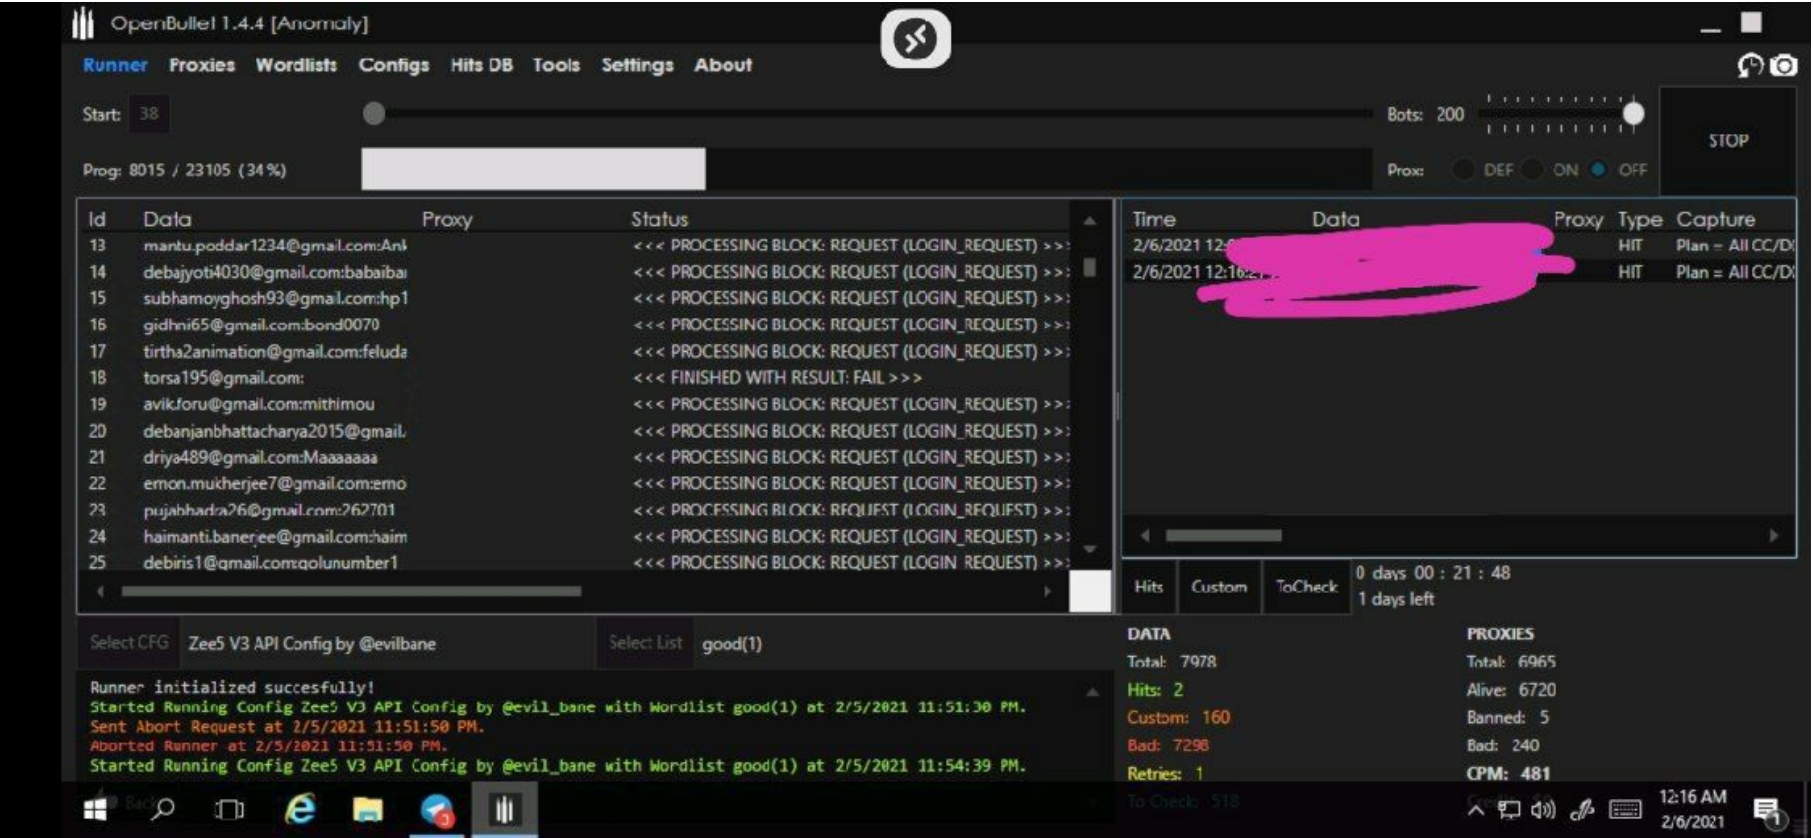

Some Of These Steps Are Optional And We Don't Need To Do This For All Sites,We Will Do It Only On Some Sites Which Ask Mobile Number For Creating Account Like Amazon Prime.

Till Now We Have Completed ,  
Cracking Theory  
Cracking Practical  
Trail Accounts Making Theory

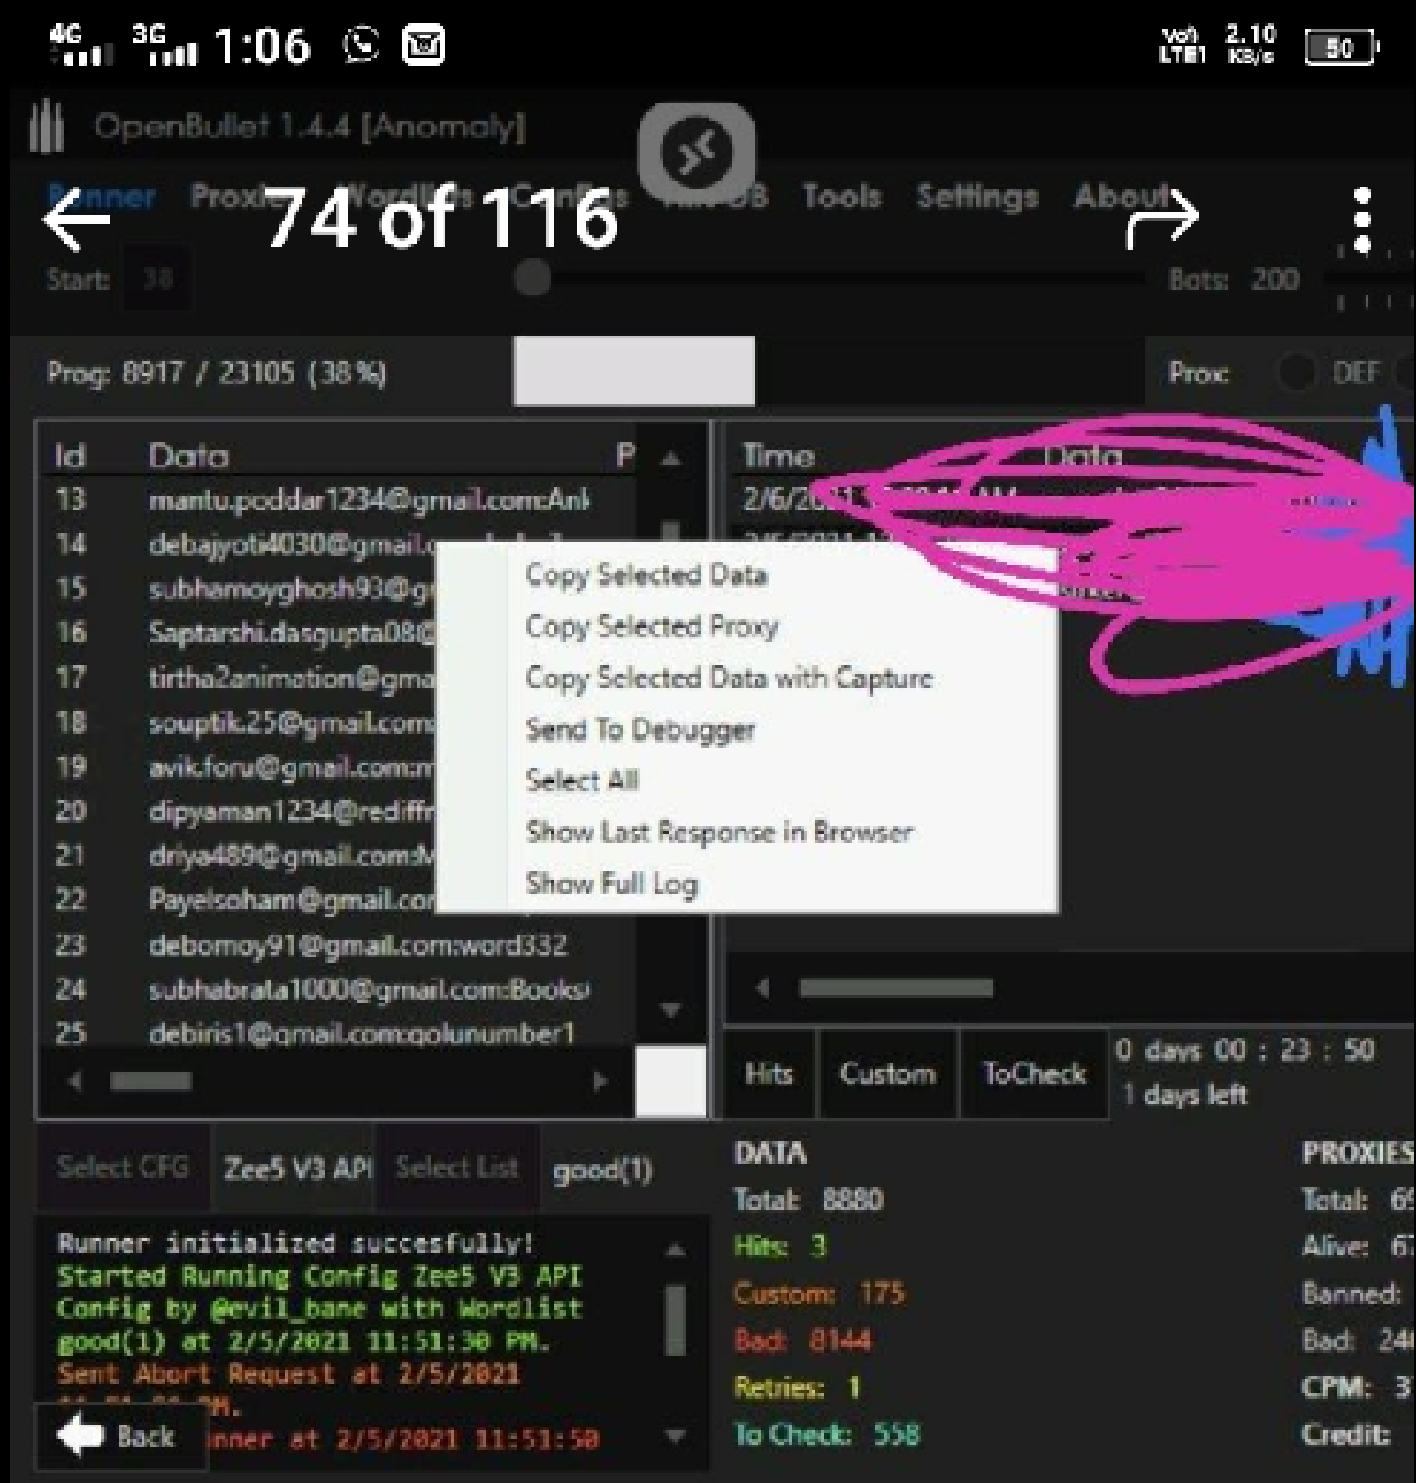

# Got 2 Zee5 Hits

Now I Will Tell You How To Save Them  
Because I Forgot To Mention That Earlier

# Here You Can See We Got An Error Of Invalid Payment Method

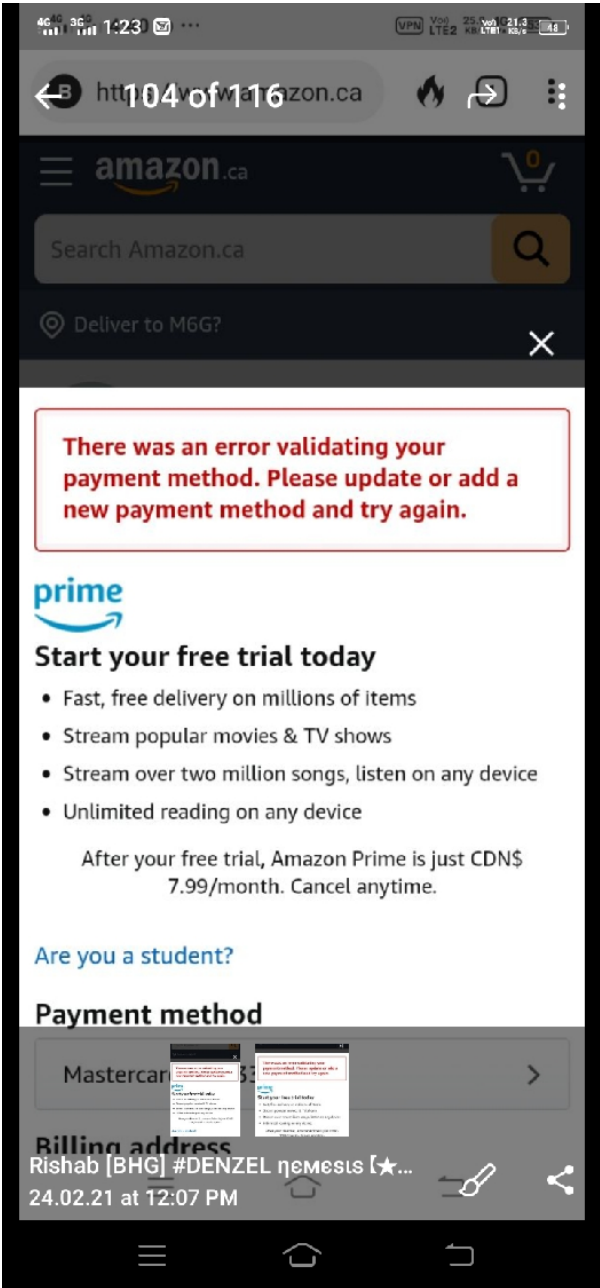

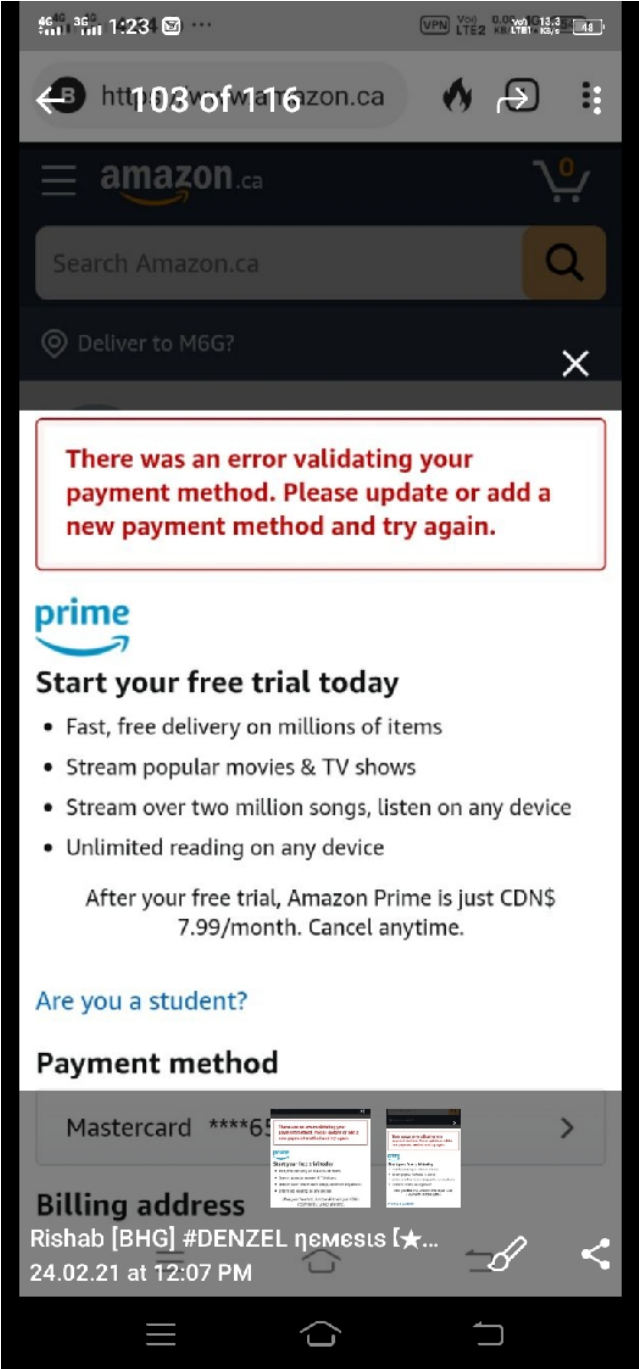

So It May Happen Due To:

- 1)Bad Vpn
- 2)Bad Card
- 3)Patched Bin

So My VPN Is Good Then 1 Case Is Not My Case

Now 2 And 3 Case Are Left

Let's Try Another Generated Cards Of Same Bin

So I Have Tried Total 3 Cards But  
Everytime Payment Method Was Detected  
Invalid.

It Means This May Be Patched.

But The Procedure Will Be Same Always  
For All Sites.

Now I Will Try To Find Some More

# This Was The Complete Procedure Of Using BIN

## For Any Website

And Here Our Complete Course Ends....🤔  
🤔

•If You Have Read Our Course Completely Then You Will Be Left With No Doubts...

Some Common Terms Used In Telegram By Sellers Or Customers , Everyday One New Person Asks That's Why I Am Telling.

1)Escrow==>

Seller And Customer Finds A Trusted Guy On Telegram Who Has A Good Reputation And Asks Him To Become Their Escrower, Now Firstly Customer Pays Escrower.

Then Escrower Sends Payment Screenshot To Seller.

Then Seller Gives The (Account/Any Stuff Which Is Being Purchased) To The Customer .

Then Customer Checks It And Notifies The Escrower.

If Something Is Wrong,Then Escrower Will Return Money To Customer Else He Will Give It You The Seller.

2)DVA==>(Deal Via Admin)

Procedure Is Same As Escrow But Any Trusted Person Can Do Escrow Whereas DVA Can Be Done Only By An Admin.
